From: Joe Sammartino
Topic: 1409 Message: 1443

OK, Folks ....

The feedback is in - thank you all for the great response.

The OFFICIAL unofficial club breakfast will move out to Saturday, March 17th.

Breakfast at Flight Deck Cafe followed by the shooting range for those interested in slinging lead. I believe we will have 1/2 hour of free range time thanks to Jim, KC7QPI.

As for this coming Saturday, March 10th, if anyone is interested in breakfast at Rudy's restaurant, let us know. Maybe we can also do that as well.

The club calendar will be updated to announce the next breakfast on the 17th.

Thank you,

Joe, N2QOJ

1446. Crown King by ATV

Yahoo group: Queen_Creek_Hams
Date: 2012-03-07 17:31:23 UTC
From: Norm
Topic: 1409 Message: 1446

This Saturday is now free. So, I've made arrangements for lunch in Crown King via ATVs, shooting my way to the top.

Will have radio and monitor:

· Ord 146.920-162.2

· Ord 445.500+100.0

· S.MT 442.050+100.0

· S.MT 927.2125-151.4 (new for Phx); Smith Pk, Ord, Pinal Pk, Greens,

· SmithPk

Note: 900 has great coverage for Phx since most areas in Phx area can access all of these location and more.

I won't have the 900 radio mounted on the ATV unless I have time. It should work more reliable on the trail to the summit. I'd like to test that statement. Maybe just a mag mount and bungee cord. Not sure where the mag mount will go, lots of plastics on ATV.

I may mount my TT4 (and associated radio, aux battery, and antenna) to track position. This will have to be mounted too.

My ATV is going to have as many antennas as my truck! That's good I think.

1450. Phoenix Area Fox Hunt - http://www.n6bg.com/foxhunt/

Yahoo group: Queen_Creek_Hams
Date: 2012-03-07 21:16:31 UTC
From: Joe Sammartino
Topic: 1450 Message: 1450

http://www.n6bg.com/foxhunt/ Phoenix Area Fox HuntCome join us March 17th, 2012 at 9AM
for a hidden transmitter hunt!
North Mountain Park (7th St. and Peoria)

- Open to anyone interested. You don't even need to be licensed!
- Designed for beginners. No experience necessary!
- Hunt as an individual, or as a team.
- Bring your own equipment if you have it. If you don't, just bring what you can. We will have some gear to loan.
- 9:00 AM until Noon with lunch to follow at a local restaurant.

Download a printable PDF flyer for this hunt<http://www.n6bg.com/foxhunt/March-17-Fox-Hunt.pdf>

Attend the TBARC antenna building party on March 10th<http://www.w7tbc.org/calendar.php?do=getinfo&e=11>

Looking for more information? Want to prepare?
http://www.w7tbc.org/calendar.php?do=getinfo&e=11 Homing In Website<http://homingin.com/> -
The main website for everything about T-Hunting!
Build a Tape Measure Yagi <http://www.ccars.org/Projects/TapeYagi/index.htm> -
Inexpensive, and works great! Or just google<http://www.google.com/search?sourceid=chrome&ie=UTF-8&q=Tape+Measure+Yagi+Beam+Antenna>
Build an Step Attenuator<http://www.arrl.org/files/file/Technology/tis/info/pdf/September1982_Attenuator.pdf>
-
Great for knocking down the signal as you get close.
Build an Active Attenuator <http://www.west.net/~marvin/k0ov.htm> - Perfect for the final sniff! Or just google<http://www.google.com/search?sourceid=chrome&ie=UTF-8&q=Active+Offset+Attenuator>

Questions? Comments? Please email byon@...

The most fun you have ham with Amateur Radio!

Joe.Thanks for the doing the coordination on this. The 17 will be Fine. But I can probably set it up for almost any Saturday if every one wants to fox hunt. It will most likely be a one time event or at least until I rack up a some of hours again.

Thanks, Jim Millyard

Fun

OK, Folks .....

The feedback is in - thank you all for the great response.

The OFFICIAL unofficial club breakfast will move out to
Saturday, March 17th.

Breakfast at Flight Deck Cafe followed by the shooting range
for those interested in slinging lead. I believe we will have 1/2 hour of
free range time thanks to Jim, KC7QPI.

As for this coming Saturday, March 10th, if anyone is
interested in breakfast at Rudy's restaurant, let us know. Maybe we can
also do that as well.

The club calendar will be updated to announce the next
breakfast on the 17th.

Thank you,

Joe, N2QOJ

Folks,
Please note...moving forward this event will be identified on our calendar and notices as:
Queen Creek CERT / Volunteer Communications Team Meeting
I think that describes the event accurately and better serves our members.
Thank you,
Joe, N2QOJ

1454. Re: ERC/EAARS 2-m net

Yahoo group: Queen_Creek_Hams
Date: 2012-03-08 13:25:32 UTC
From: Kenn Burnell
Topic: 1344 Message: 1454

ERC/EAARS 2-m net

For those interested in Emergency Communications --

Cris McBride vandcmcbride@...

On the *first Saturday* of every month we have the BCS-ERC net which is primarily for stake communication specialists in the Valley. We use the BCS Repeater 146.720 MHz - offset 100 Hz PL tone.

It starts immediately after the MARA net which starts at 8:15 am.

These are the repeaters for the 0845 ERC/EAARS net on *the second Saturday of each month*:

Linked repeaters: (all PL tones are 141.3)

146.86 Heliograph Peak
147.28 Guthrie Peak – Greenlee County
145.21 Jacks Peak New Mexico.
*145.41 Pinal Peak south of Globe AZ
147.16 Mt Lemmon near Tucson *
146.70 Greens Peak Near Show Low and Round Valley
145.27 South Mt-Alpine
147.08 Mule Mt near Bisbee

The main purpose of these ERC nets is to pass emergency traffic and general interest bulletins; and, to verify that our radio equipment is working properly.

And, as Paul Harvey used to say, "This is the rest of the story" ::>

ERC is Emergency Radio Communications
EAARS is the Eastern Arizona Amateur Radio Society (http://eaars.org/).

Dr. McBride is also associated with two other ERC Saturday morning VHF nets - the MARA Net and the BCS-ERC (BCS is Bishops' Central Storehouse and has to do with the location of the repeater) net. Those nets meet on the BCS-ERC repeater at 146.720 MHz (standard minus offset) with a PL tone of 100 Hz. The schedule is as follows:

MARA - Every Saturday at 0815.
BCS-ERC - The first Saturday of the month at 0845.

Then,
ERC/EAARS - The second Saturday of the month at 0845

There are also Saturday morning HF ERC nets but, I don't do HF ...

Traffic Alerts Map March 8-15
Traffic Alerts Map March 8-15
Posted Date: 3/8/2012

Traffic Restrictions:

1. *Rittenhouse Road/Village Loop Road South*
Crews will be installing a new traffic signal at this intersection, which will require some intermittent lane and shoulder restrictions between the hours of 8:30 a.m. and 4 p.m. until approximately March 15.

2. *The Town's Streets Department will be performing crack seal operations in the following subdivision the week of March 12-16:*

- Queen Creek Villages

Note: dates are approximate and those streets that are affected will be posted with temporary traffic control signs. Drivers are advised to obey all posted signs in the area where crews may be working.

The City of Mesa will be working in the area of Ellsworth and Ray roads; as well as Power Road between Pecos and Ray roads. More information on these and other restrictions in the City of Mesa can be found at http://www.mesaaz.gov/roads/LaneRestrictions.aspx.

PLEASE NOTE: Due to the nature of the work, dates and times are subject to change without prior notice. Motorists are encouraged to obey all posted signs, traffic control devices, and directions from law enforcement officers or flaggers who are controlling traffic.

1457. Re: Crown King by ATV

Yahoo group: Queen_Creek_Hams
Date: 2012-03-10 01:36:44 UTC
From: ars_k1atv
Topic: 1409 Message: 1457

Well, if you had ATV on your ATV we could all watch you on the White Tanks or Shaw Butte HAM TV repeaters :)

Bil,

I sometimes monitor 223.690 simplex since that is where my EchoLink node is parked. Feel free to check in sometime.

The node has an operation radius of 7-10 miles right now.

Regards,

Joe, N2QOJ

East Valley Repeater Group
Monday March 12, 2012
8:00 pm - 9:00 pm
(This event repeats every week.)
Location: 449.825 (-) PL 100

Notes:
We are a group of Amatuer Operators that have formed this group to provide emergency communications for two East valley hospitals. The two hospitals are the Chandler Regional Hospital located at 475 S. Dobson Rd. and the Mercy Gilbert Hospital located at 3555 S. Val Vista Dr.
Our home repeater is located in Gilbert AZ on the Mercy Gilbert hospital with a coordinated frequency of 449.825 with a 100.0 PL and a minus offset. A repeater on the Chandler Regional hospital is in the works and when ready will become our back-up frequency.
Everyone is welcome to join our net on Monday night at 8:00 P.M. on the 449.825 repeater.
Ron, 480-510-3025 cell or AJ7T@ cox.net. http://http://eastvalleyrg.ning.com/

1464. Re: "The ARRL Letter" for March 8, 2012

Yahoo group: Queen_Creek_Hams
Date: 2012-03-12 15:29:58 UTC
From: ars_k1atv
Topic: 1463 Message: 1464

3.3 GHz Band Plan

I don't see any dedicated frequencies for FSTV - HAM TV.

In the SoCal plan 3380 MHz and 3480 MHz are listed for ATV-WFM-Rpt Output.

AF6HP on Santiago Peak inputs on 10.4 GHz and outputs on 3480 MHz.
AF6HP on Sierra Peak inputs on 10.4 GHz, 2441.5 and 434.0 MHz and outputs on 3380 MHz.
AF6HP on Heaps Peak inputs on 10.4 GHz and 2441.5 MHz and outputs on 3380 MHz.

These belong to METS - The Microwave Experimental Television Society.

What did I miss?

I'm not an expert but I play one - on HAM TV.
Bil Munsil
K1ATV HAM TV
Mesa AZ
Hams should be seen as well as heard.

1465. Arizona Emergency Net - Maricopa, 3/12/2012, 9:00 pm

Yahoo group: Queen_Creek_Hams
Date: 2012-03-12 15:55:36 UTC
From: Queen_Creek_Hams@yahoogroups.com
Topic: 1465 Message: 1465

Reminder from: Queen_Creek_Hams Yahoo! Group
http://groups.yahoo.com/group/Queen_Creek_Hams/cal

Arizona Emergency Net - Maricopa
Monday March 12, 2012
9:00 pm - 10:00 pm
(This event repeats every week.)
Location: 147.24 ( ) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes:
AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

1466. Fwd: [Ballooning] ANSR-67 Flight Announcement

Yahoo group: Queen_Creek_Hams
Date: 2012-03-13 23:30:32 UTC
From: Joe Sammartino
Topic: 1466 Message: 1466

---------- Forwarded message ----------
From: "Bill McLean" <bmclean1@gmail.com>
Date: Mar 13, 2012 4:14 PM
Subject: Fwd: [Ballooning] ANSR-67 Flight Announcement
To: "Joe Sammartino" <jsammartino@...>

Joe,

Please share with the Queen Creek Hams.

Bill

---------- Forwarded message ----------

**

Arizona Near Space Research (ANSR) is pleased to announce the flight of ANSR-67. This high altitude balloon flight will take place on Saturday, March 31, 2012 at 9:00 A.M. The primary launch site will be at the UA Maricopa Agricultural Center in Maricopa, AZ (33 deg 04.42 min, 111 deg 58.97 min). Upper winds may cause a change in launch site, so watch for updates to this notice.

The balloon will carry seven student built payloads from the University of Arizona, Arizona State University, Pima Community College and South Mountain Community College. The payloads will contain a varity of scientific apparatus as part of Arizona Space Grant Consortium's ASCEND! program (www.spacegrant.arizona.edu/research/ascend).

The balloon will be a 3000 gram weather balloon, filled with helium. The expected burst altitude will be 90,000 feet or more. The flight is anticipated to last about 2.5 hours from launch to touchdown.

APRS Beacons will transmit position information as follows:
KA7NSR-11, 445.950 MHz
KA7NSR-12, 445.950 Mhz
KA7NSR-13, 144.340 MHz

The ANSR Cross-Band Repeater will operate with an input frequency of 145.56 MHz with a 162.2 Hz tone, and an output of 445.525 MHz. While contacts (especially DX) are welcome, please give priority to chase team members.

Our mobile cross band Digipeater will repeat the VHF and UHF beacon APRS data to the 144.390 MHz standard APRS frequency and subsequently will be I-GATED to the Internet for out-of-area trackers.

You can track the flight using the following links:
http://map.aprsworld.net/ka7nsr-11 (or -12, -13)

http://aprs.fi/?call=ka7nsr-11 (or -12, -13)
http://www.findu.com/cgi-bin/find.cgi?call=ka7nsr-11 (or -12, -13)

Be sure to check http://groups.yahoo.com/group/Ballooning for updates to this announcement prior to the flight.

Jack Crabtree, W7JLC
ANSR/AZ Space Grant Liaison

Kenn,

How did I sound through the repeater? Apparently not to good, NCS didn't repeat my name, so I assume he didn't get it.

East Valley Repeater Group
Monday March 19, 2012
8:00 pm - 9:00 pm
(This event repeats every week.)
Location: 449.825 (-) PL 100

Notes:
We are a group of Amatuer Operators that have formed this group to provide emergency communications for two East valley hospitals. The two hospitals are the Chandler Regional Hospital located at 475 S. Dobson Rd. and the Mercy Gilbert Hospital located at 3555 S. Val Vista Dr.
Our home repeater is located in Gilbert AZ on the Mercy Gilbert hospital with a coordinated frequency of 449.825 with a 100.0 PL and a minus offset. A repeater on the Chandler Regional hospital is in the works and when ready will become our back-up frequency.
Everyone is welcome to join our net on Monday night at 8:00 P.M. on the 449.825 repeater.

(This event repeats every week.)
Location: 147.24 ( ) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes:
AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

Traffic Alerts Map March 22-29
Traffic Alerts Map March 22-29
Posted Date: 3/22/2012

*Traffic Signals:
**
Rittenhouse Road/Village Loop South*
The construction of the new traffic signal remains on schedule. The contractor has installed both of the cabinets for the control equipment and battery back-up on the northwest corner, and all of the poles have been installed. Activation of the signal is expected by the end of April.*

**Traffic Restrictions*:
*
PLEASE NOTE: Due to the nature of the work, dates and times are subject to change without prior notice. Motorists are encouraged to obey all posted signs, traffic control devices, and directions from law enforcement officers or flaggers who are controlling traffic.*

1. *Rittenhouse Road/Village Loop Road South*
The east shoulder of Rittenhouse Road will be closed while work progresses, and drivers can expect lane closures on both Rittenhouse Road and Village Loop South at various times while the contractor completes the installation of a new traffic signal.

2. *Sossaman Road from Rittenhouse to Germann roads
*The City of Mesa will be completing surface seal on Sossaman Road between Germann Road and Pecos Road on Monday, March 26 and Tuesday, March 27. The contractor completing the work will be utilizing flaggers and pilot vehicles to control traffic in this segment. Drivers should plan to use an alternate route to avoid any delays.

The Town's Streets Department will be performing crack seal operations in the following subdivision the week of March 26-30:

**

3*. Ellsworth Road - Ocotillo to Rittenhouse roads
*Traffic restrictions will be in place for crack seal operations and may include flaggers and/or lane closures.**

Note: dates are approximate and those streets that are affected will be posted with temporary traffic control signs. Drivers are advised to obey all posted signs in the area where crews may be working.

The City of Mesa will be working in the area of Ellsworth and Ray roads; as well as Power Road between Pecos and Ray roads. More information on these

and other restrictions in the City of Mesa can be found at
http://www.mesaaz.gov/roads/LaneRestrictions.aspx.

Hi All,

The next foxhunt will be Saturday, April 28, starting at 9AM. I haven't picked a starting spot yet, nor have I decided if it will be walking, driving, or both. Check back to http://n6bg.com/foxhunt/ for those developments.

Thanks,
Byon

1487. ANSR Balloon launch update

Yahoo group: Queen_Creek_Hams
Date: 2012-03-27 17:28:42 UTC
From: William McLean
Topic: 1487 Message: 1487
Attachments: 1 described; binary payloads are missing from this source WARC

Update for the flight on Saturday. The attached file will open in Google earth and show flight prediction. These updates are available daily until flight date. Please advise if the list would like to be updated daily.

Bill K7WWM

The Tuesday 3/27 prediction for the flight of ANSR-67 is for a track of 24.0 miles on a bearing of 150.5º, or a landing 6 miles southwest of the I-8/I-10 interchange. This is a shift of 25º to the east from yesterday and may indicate the weather is moving more quickly than predicted.

The current plan is to launch from the University of Arizona Maricopa Agricultural Center, Maricopa, AZ (33º4.4’ N, 111º58.4’ W) at 0900 MST (1600 UT) on Saturday March 31, 2012.

A trough and cold front are forecast to push through Arizona on Sunday which will cause the winds aloft to increase and shift to the west. A launch just 7 hours later will travel 30 miles to the east, and a launch at 2100 MST travels 50 miles east.

Best Regards,

Bob Thompson, KC8BOB

1489. Fwd: ANSR-67 Flight Prediction - Saturday, 3/31/12

Yahoo group: Queen_Creek_Hams
Date: 2012-03-28 14:02:06 UTC
From: William McLean
Topic: 1489 Message: 1489
Attachments: 3 described; binary payloads are missing from this source WARC

This mornings prediction for Saturday's Flight. On Friday morning I will repeat the info for the frequencies we will be using.

Bill

Good Morning,

The Wednesday 3/28 prediction for the flight of ANSR-67 is for a track of 27.4 miles on a bearing of 143.3º, or a landing 4.4 miles south of the I-8/I-10 interchange in Arizona City. This is a small shift to the east from yesterday.

The current plan is to launch from the University of Arizona Maricopa Agricultural Center, Maricopa, AZ (33º4.4’ N, 111º58.4’ W) at 0900 MST (1600 UT) on Saturday March 31, 2012.

The winds aloft models have shifted, with the jetstream now staying north of Arizona this weekend. This should reduce the likelihood of large shifts in the track associated with a frontal passage.

Best Regards,

Bob Thompson, KC8BOB

1491. Fwd: ANSR-67 Flight Prediction - Saturday, 3/31/12

Yahoo group: Queen_Creek_Hams
Date: 2012-03-29 14:43:44 UTC
From: William McLean
Topic: 1489 Message: 1491
Attachments: 3 described; binary payloads are missing from this source WARC

This mornings flight prediction. This flight should give other hams plenty of chance to use the cross band repeater that will be flying,. 145.560 with a 162.2mhz tone for input and output is on 445.525 MHz Linked to IRLP Node 9255. APRS when repeater not in use on 445.950 MHz at 10, 20, 40, and 50 seconds UTC time via KA7NSR-11

Landing prediction after burst at 15 and 45 seconds UTC time via KA7NSR (no -SSID) on APRS
Internet tracking via I-Gate
For general use: Track KA7NSR-11 on aprs.fi

Bill

Good Morning,

The Thursday 3/29 prediction for the flight of ANSR-67 is for a track of 10.3 miles on a bearing of 214.3º, or a landing 5.5 miles south of the village of Ak Chin in an area of open farm fields. One should be able to stand in one place and watch the entire two hour flight. Amazing!

The current plan is to launch from the University of Arizona Maricopa Agricultural Center, Maricopa, AZ (33º4.4’ N, 111º58.4’ W) at 0900 MST (1600 UT) on Saturday March 31, 2012.

Best Regards,

Bob Thompson, KC8BOB

Traffic Alerts Map March 29-April 5
Traffic Alerts Map March 29-April 5
Posted Date: 3/29/2012

Traffic Restrictions:

1. *Rittenhouse Road/Village Loop Road South*
The east shoulder of Rittenhouse Road will be closed while work progresses, and drivers can expect lane closures on both Rittenhouse Road and Village Loop South at various times while the contractor completes the installation of a new traffic signal.

2. *Riggs Road from Ellsworth to Hawes roads
*The Maricopa County Department of Transportation has authorized the closure of Riggs Road in this area beginning on Monday, April 23 and continuing through Saturday, April 28. The closure is required for the continued construction on the bridge over the Sonoqui Wash. For more information about this closure, check MCDOT's website at www.mcdot.maricopa.gov or call 602-506-8600.

**

3*. Ellsworth Road from Ocotillo to Rittenhouse roads*
Crews will be working in the area completing street widening. Traffic restrictions will be in place closing the east shoulder of Ellsworth Road, as well as shifting traffic in this area while work progresses.

The City of Mesa will be working in the area of Ellsworth and Ray roads, as well as Power Road between Pecos and Ray roads. More information on these and other restrictions in the City of Mesa can be found at http://www.mesaaz.gov/roads/LaneRestrictions.aspx.

Please Note: Due to the nature of the work, dates and times are subject to change without prior notice. Motorists are encouraged to obey all posted signs, traffic control devices, and directions from law enforcement officers or flaggers who are controlling traffic.

1494. Fwd: [Ballooning] ANSR-67 Flight Announcement Update - Go!

Yahoo group: Queen_Creek_Hams
Date: 2012-03-30 14:39:48 UTC
From: William McLean
Topic: 1494 Message: 1494

The latest information about tomorrow's flight. The flight will last about 2-2.5 hours.

Bill K7WWM

Preparations continue for the flight of ANSR-67 scheduled for Saturday, March 31,2012 at 9:00 MST (1600 UTC). Upper air and surface weather conditions are quite favorable for the flight. Flight particulars are mostly unchanged from the initial flight announcement, and that announcement is repeated below.

ANSR Flight Prediction guru Bob Thompson, KC8BOB, says "The Friday 3/30 prediction for the flight of ANSR-67 is for a track of 6.2 miles on a bearing of 230.0º, or a landing 3.0 miles south of the center of Maricopa in an area of open farm fields. It continues to be the case that one will be able to watch the entire two hour flight while walking from the launch point to the landing. Amazing!" Surface weather is expected to be clear with the temperature reaching a balmy 94. Winds at launch are expected to be light but increasing to 5-9 mph as the day goes on.

We plan to live stream the launch and possibly the recovery at http://www.ustream.tv/discovery/live/all?q=w7jlc

There will be a preflight briefing Friday night followed by a short Go/No Go announcement posted on our Yahoo Groups page.

(announcement repeat)
Arizona Near Space Research (ANSR) is pleased to announce the flight of ANSR-67. This high altitude balloon flight will take place on Saturday, March 31, 2012 at 9:00 A.M. The launch site will be at the UA Maricopa Agricultural Center in Maricopa, AZ (33 deg 04.42 min, 111 deg 58.97 min).

The balloon will carry seven student built payloads from the University of Arizona, Arizona State University, Pima Community College and South Mountain Community College. The payloads will contain a variety of scientific apparatus as part of Arizona Space Grant Consortium's ASCEND! program (www.spacegrant.arizona.edu/research/ascend). The balloon will be a 3000 gram weather balloon, filled with helium. The expected burst altitude will be 90,000 feet or more. The flight is anticipated to last about 2.5 hours from launch to touchdown.

APRS Beacons will transmit position information as follows:
KA7NSR-11, 445.950 MHz
KA7NSR-12, 445.950 MHz
KA7NSR-13, 144.340 MHz

The ANSR Cross-Band Repeater will operate with an input frequency of 145.56 MHz with a 162.2 Hz tone, and an output of 445.525 MHz. While contacts (especially DX) are welcome, please give priority to chase team members.

Our mobile cross band Digipeater will repeat the VHF and UHF beacon APRS data to the 144.390 MHz standard APRS frequency and subsequently will be I-GATED to the Internet for out-of-area trackers.

You can track the flight using the following links:
http://map.aprsworld.net/ka7nsr-11 (or -12, -13)
http://aprs.fi/?call=ka7nsr-11 (or -12, -13)

Hey Folks,
Looks like Tom, K8PNW, is heading north this weekend.
You can track him via APRS:
http://aprs.fi/#!mt=roadmap&z=13&call=a%2FK8PNW-9&timerange=900
Regards,
Joe, N2QOJ

1496. Fwd: ANSR-67 Flight Prediction - Saturday, 3/31/12

Yahoo group: Queen_Creek_Hams
Date: 2012-03-31 13:20:56 UTC
From: William McLean
Topic: 1489 Message: 1496
Attachments: 4 described; binary payloads are missing from this source WARC

Predicted flight time is 122 minutes.

Bill

Good Morning,

The final prediction for today’s flight of ANSR-67 is for a track of 12.0 miles on a bearing of 232.9°, or a landing 5.0 miles southwest of the village of Ak Chin and 5.4 miles west of Hwy 347 on the west edge of open farm fields .

From NOAA Weather:

Today: Sunny, with a high near 94. South wind between 5 and 10 mph.

Tonight: Mostly clear, with a low around 52. West southwest wind between 7 and 14 mph, with gusts as high as 20 mph.

It is going to be warm!

The plan is to launch from the University of Arizona Maricopa Agricultural Center, Maricopa, AZ (33°4.4’ N, 111°58.4’ W) at 0900 MST (1600 UT) today, Saturday March 31, 2012.

Best Regards,

Bob Thompson, KC8BOB

Kf6ezt and N2QOJ had a short qso via the balloon cross band repeater about
10 minutes ago.

445.525 output
145.560 input with 162.4 Pl

Great fun!

Regards,

Joe

1500. Fwd: ANSR-67 Preliminary Post-Mortem

Yahoo group: Queen_Creek_Hams
Date: 2012-03-31 23:13:01 UTC
From: William McLean
Topic: 1500 Message: 1500
Attachments: 6 described; binary payloads are missing from this source WARC

Good Afternoon,

You will find attached to this email, the four KML/Z files that represent the three predicted paths and the actual path of ANSR-67:

1. This file was generated about 0430 MST at the British website, http://habhub.org/predict.
2. This file was generated by the Balloon Prediction 0.9.0.5 program about 1300 MST using actual sounding winds.
3. This file is the KA7NSR-11 actual flight data from www.aprs.fi following the flight.
4. The last file is from Balloon Track for Windows 1.9.4 and is that which I sent to you this morning about 0430 MST as part of the prediction email.

If you click on each of these files, they should open as overlays in Google Earth if you have the program installed. The actual flight was back and forth in an east-west orientation and only the habhub.org correctly predicted that behavior, although it did not predict all of the reversals and other changes in direction! The distance from actual landing to predicted landing for the three models were as follows:

1. Habhub predicted 7.9 miles further to the WSW
2. Balloon Prediction 0.9.0.5 predicted 23.1 miles further to the SSW
3. Balloon Track for Windows 1.9.4 predicted 10.5 miles to the SSW

I used Balloon Track for my predictions leading up to today's flight and occasionally looked at Habhub and Balloon Prediction for confirmation. ANSR-67 travelled 55 miles over the ground and landed 6.3 miles from the launch site!

I have included two JPG images which are elevation profiles from the Google Earth overlays. The first is the actual profile as reported by KA7NSR-11, and the second is the predicted profile from Habhub.org. Notice the similarities.

Congratulations to the launch and recovery team!!

Best Regards,

Bob Thompson, KC8BOB

Yes. Communist China broadcasts in Esperanto, too - and publishes a slick, glossy magazine El Popolo Chinio - From People's China.

But on the other side, Vatican Radio ALSO has Esperanto broadcasts.

Arizona Emergency Net - Maricopa
Monday April 2, 2012
9:00 pm - 10:00 pm
(This event repeats every week.)
Location: 147.24 ( ) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes:
AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

I just heard a new ham (?) on 2-meters say that to get a W call sign you had to live east of the Mississippi.

WRONG!

Perhaps other new hams think that also.

From: Kenn Burnell
Topic: 1518 Message: 1518

This is an interesting link. The site has a link to an app. If you put it on your computer it will install a window on your monitor that shows you present conditions on the ham band (solar) and at the same time you can look up ham calls in the same window.

http://hamqsl.com/solar.html

This site, by the way, is a ham was set up by an Arizona ham.

1521. RG8/U Coax

Yahoo group: Queen_Creek_Hams
Date: 2012-04-06 04:08:47 UTC
From: ScottM
Topic: 1521 Message: 1521

Does anyone in the group have any RG8/U coax that they would like to sell or maybe trade for about 50 foot of RG58. I need at least 75 foot but would buy more just to make sure I have enough.

Thanks, Scott-KB9JTN

Scott,

The Superstition Radio club has/had a lot of "thick" 75 ohm coax for a few cents a foot that is said to work as well as 50 ohm coax for lead-in to an antenna with about 2dB per hundred feet of loss at 450 MHz.

Here's the link::>

1524. Queen Creek: Traffic Alerts for March 6-12

Yahoo group: Queen_Creek_Hams
Date: 2012-04-06 15:37:30 UTC
From: Joe Sammartino
Topic: 1524 Message: 1524

Traffic Alerts for March 6-12
Posted Date: 4/5/2012

*Traffic Restrictions: *

1. *Rittenhouse Road/Village Loop Road South
*Work continues for the installation of a new traffic signal at this intersection. Drivers can expect lane restrictions throughout the work day, as well as shoulder closures overnight until the work is completed.
2. *Riggs Road from Ellsworth to Hawes roads
*The Maricopa County Department of Transportation<http://www.mcdot.maricopa.gov/>has authorized Riggs Road to be closed for construction of a new bridge over the wash. The closure will begin on Monday, April 16 and continue through Saturday, April 21. For more information about this closure, check MCDOT's website at www.mcdot.maricopa.gov or call 602-506-8600.
3. *Ellsworth Road from Ocotillo to Rittenhouse roads
*Road widening work continues on Ellsworth Road in Town Center. Drivers can expect lane restrictions and heavy equipment moving throughout the area while work progresses. Questions about this project may be directed to the Project Hotline: 480-898-4090.

*Pavement Preservation Seal will be taking place at the following locations and days. Work hours are anticipated to occur between 8:30 a.m. and 4 p.m. Motorists should anticipate traffic restrictions and reduced speeds in these areas.
*
MONDAY, APRIL 9 and TUESDAY, APRIL 10:

1. Signal Butte Road south of Ocotillo Road
2. Ocotillo Road from 208th Place to Rittenhouse Road
3. Rittenhouse Road from Ocotillo to Village Loop road

WEDNESDAY, APRIL 11 and THURSDAY, APRIL 12:

1. Ellsworth Road from Germann to Queen Creek roads
2. Crismon Road from Queen Creek to Ocotillo roads

Temporary center line will remain in the roadway until restriping of the street occurs, which should follow each location approximately two days later.

*Work Outside Town Limits: *

1. *Power and Williams Field roads:
*Construction on Power Road improvements continues. For further information visit http://www.mesaaz.gov/roads/LaneRestrictions.aspx or

call 480-644-3800.

*NOTE: Due to the nature of the work, dates and times are subject to change without prior notice. Motorists are encouraged to obey all posted signs, traffic control devices, and directions from law enforcement officers or flaggers who are controlling traffic. *

Hi Scott

It will be really interesting to see how the Isotron performs . I have read their web page , and I must admit I am a little confused.

I would like to see it in operation, when you get it going .

East Valley Repeater Group
Monday April 9, 2012
8:00 pm - 9:00 pm
(This event repeats every week.)
Location: 449.825 (-) PL 100

Notes:
We are a group of Amatuer Operators that have formed this group to provide emergency communications for two East valley hospitals. The two hospitals are the Chandler Regional Hospital located at 475 S. Dobson Rd. and the Mercy Gilbert Hospital located at 3555 S. Val Vista Dr.
Our home repeater is located in Gilbert AZ on the Mercy Gilbert hospital with a coordinated frequency of 449.825 with a 100.0 PL and a minus offset. A repeater on the Chandler Regional hospital is in the works and when ready will become our back-up frequency.
Everyone is welcome to join our net on Monday night at 8:00 P.M. on the 449.825 repeater.

1531. [QTH.com Classifieds] Scam warning

Yahoo group: Queen_Creek_Hams
Date: 2012-04-11 04:00:45 UTC
From: Kenn Burnell
Topic: 1531 Message: 1531

Dear QTH.com <http://qth.com/> Ham Radio Classifieds user:

We've seen an alarming increase in the number of scammers utilizing our website (and it seems most other ham radio classified sites, too, based on reports coming in). I wanted to take this opportunity to explain what some of these scammers are doing, in hopes it will better protect you from them, when you are selling equipment on the QTH.com Classifieds at http://swap.qth.com.

Common scammer traits:

1) They will use some else's callsign, and they will create an email address that contains that callsign, usually with a free email provider like gmail, yahoo, hotmail, etc. They sometimes pose as foreign callsigns (especially UK and Spain) but recently have been using USA callsigns.

2) They will sometimes post "For Sale" ads, but also will sometimes answer "Wanted" ads. Usually the prices are a little too good to be true.

3) They will use pictures of equipment they have found on the Internet (they don't really own the equipment).

4) They seem to like payments via Western Union (no protection for the buyer), but will also use PayPal (hoping to drain their account before the buyer realizes they have been scammed).

5) They seem to know ham radio jargon. For all we know, these scammers are hams, but we can't be sure.

6) They are sophisticated enough to use "proxy servers" so their IP address cannot be easily detected. This makes it difficult for us to block the scammers. We are constantly tweaking our filters to block these guys when possible, but it is a constant cat and mouse game.

What can you do to protect yourself?

* Ask for a phone number and call the person before agreeing on any deal. This is probably the #1 way to expose the rats.

* Check to see if the email address they used matches what is listed for that person on their QRZ.com <http://qrz.com/> profile. It could be a red flag if there is a mismatch.

* Be especially cautious of dealing with foreign hams. Not all foreign hams are scammers, of course! Just be extra careful!!

* Never use Western Union. Be very cautious of using Money Orders and Cashier's Checks. PayPal and Credit Cards seem to be the best option, as

far as having any buyer protection. Money Orders & Cashier's Checks are perfectly acceptable if you are absolutely sure who you are dealing with.

* Read all of my "Safe Trading Tips" at
http://chat.qth.com/viewtopic.php?t=12

About 100,000 ads are placed each year in the QTH.com Classifieds, and only a tiny, tiny fraction wind up being fraudulent. I do not want to scare you into thinking that it is unsafe to trade online. Rather, I simply want to arm you with knowledge, so that you will be able to sniff out the bad guys, and stay safe.

If you have any questions, feel free to contact me directly at ka9fox@...<http://us.mc1612.mail.yahoo.com/mc/compose?to=ka9fox@...>
.

1535. RE: [Queen_Creek_Hams] QC HAMS Breakfast, 4/14/2012, 8:00 am

Yahoo group: Queen_Creek_Hams
Date: 2012-04-12 17:21:17 UTC
From: Norm
Topic: 1532 Message: 1535

Are you all aware of the Devry Hamfest Saturday morning? .. I have to give in to a strong DNA desire to brave an adventurous stroll through a parking lot far far away in the wind, the cold, and .. the rain at some pre-dawn 0 dark time; missing a warm friendly breakfast with everyone.

Norm Johnson, aa7oo

1537. Queen Creek: Traffic Alerts Map April 12-19

Yahoo group: Queen_Creek_Hams
Date: 2012-04-12 23:52:49 UTC
From: Joe Sammartino
Topic: 1537 Message: 1537

Traffic Alerts Map April 12-19
Traffic Alerts Map April 12-19
Posted Date: 4/12/2012
Traffic Alerts Map April 12-19 (#1 of 2)<http://www.queencreek.org/Modules/ShowDocument.aspx?documentid=10611>
Traffic Alerts Map April 12-19 (#2 of 2)<http://www.queencreek.org/Modules/ShowDocument.aspx?documentid=10610>

Traffic Restrictions: (#1 of 2)

1. *Rittenhouse Road/Village Loop Road South*
Work continues for the installation of a new traffic signal at this intersection. Drivers can expect lane restrictions throughout the work day, as well as shoulder closures overnight until the work is completed.

2. *Riggs Road from Ellsworth to Hawes roads*
The Maricopa County Department of Transportation has authorized Riggs Road to be closed for construction of a new bridge over the wash. The closure will begin on Monday, April 23 and continue through Saturday, April 28. For more information about this closure, check MCDOT's website at www.mcdot.maricopa.gov or call 602-506-8600.

**

3*. Ellsworth Road from Ocotillo to Rittenhouse roads*
Road widening work continues on Ellsworth Road in Town Center. Drivers can expect lane restrictions and heavy
equipment moving throughout the area while work progresses. This work will require the closure of Ellsworth Road in
two phases:

*Phase I *will begin on Wednesday, April 18, closing Ellsworth Road between Ocotillo Road and Victoria Lane (Heritage Loop Road) between 8:30 a.m. and 4 p.m., as well as closing Victoria Lane and Heritage Loop Road. Traffic will be able to travel on both Victoria Lane and Heritage Loop Road, with access to local businesses; however, there will be no access to Ellsworth Road during the closure. Library access will be maintained from Ocotillo and Ellsworth Loop roads.

Phase 2 will begin on Thursday, April 19, closing Ellsworth Road between Victoria Lane and Rittenhouse Road between 8:30 a.m. and 4 p.m, as well as closing Maya Road. Traffic will be able to travel on Maya Road with access to local businesses; however, there will be no access to Ellsworth Road during the closure.

Construction on Power Road improvements continues. For further information visit http://www.mesaaz.gov/roads/LaneRestrictions.aspx or call 480-644-3800

.

SURFACE SEAL: (#2 of2)

1 *Queen Creek Road from Power to Hawes roads: *crews will be performing surface seal in this area on Monday, April 16 and Tuesday, April 17. Drivers should expect lane closures, turn restrictions and short-term residential street closures in the area. Local assess will be maintained throughout the work.

2. *Germann Road from Power to Rittenhouse roads: *crews will be performing surface seal in this area on Wednesday, April 18, Thursday, April 19 and Monday, April 23. Drivers should expect lane closures, turn restrictions and short-term residential street closures in the area. Local access will be maintained throughout the work.

3. *Rittenhouse Road from Power to Germann roads*: crews will be performing surface seal in this area on Wednesday, April 19, Thursday April 19, and Monday, April 23. Drivers should expect lane closures, turn restrictions and short-term residential street closures in the area. Local access will be maintained throughout the work.

**

**

*Work Outside Town Limits:

*

Riggs Road from Ellsworth to Hawes roads: the Maricopa County Department of Transportation has authorized Riggs Road to be closed for construction of a new bridge over the wash. The closure will begin on Monday, April 23, and continue through Saturday, April 28. For further information, visit www.mcdot.maricopa.gov or call 602-506-8600.

**

Power and Williams Field roads: construction on Power Road improvements continues. For further information, visit http://www.mesaaz.gov/roads/LaneRestrictions.aspx or call 480-644-3800.

PLEASE NOTE: Due to the nature of the work, dates and times are subject to change without prior notice. Motorists are encouraged to obey all posted signs, traffic control devices, and directions from law enforcement officers or flaggers who are controlling traffic.

1538. Queen Creek: Riggs Road to close for six days to finish new bridge

Yahoo group: Queen_Creek_Hams
Date: 2012-04-12 23:53:53 UTC
From: Joe Sammartino
Topic: 1538 Message: 1538

Riggs Road to close for six days to finish new bridge
Road closed April 23-28

Posted Date: 4/12/2012

[image: Maricopa County Department of Transportation]Beginning at 5 a.m., Monday, April 23, the Maricopa County contractor will temporarily close Riggs Road from east of Hawes Road to west of 203rd Place for six days to accommodate final construction activities on the new bridge crossing.

During this time, Hawes Road and 203rd Place will remain open. Hunt Highway/Empire Boulevard, Chandler Heights Road and Ellsworth Road may be used as an alternate route.

Riggs Road will reopen with traffic routed onto the new bridge by 6 p.m., Saturday, April 28.

*Safety Matters
*Access will be maintained for emergency vehicles at all times. Please allow extra time to travel through the area as there may be traffic delays.

*24-hour Construction Hotline: *(480) 350-9288

*About the Project
*Sonoqui Wash improvements include channel excavation and slope stabilization between Chandler Heights Road and Riggs Road, the construction of a multi-use path and the construction of a new channel eastward to Crismon Road along the south side of Riggs Road.

The Riggs Road crossing project includes construction of a new bridge over the Sonoqui Wash with sidewalk, bike lanes and equestrian accommodation under the bridge linking to the Town of Queen Creek's trail system. In addition, this project is constructing a new east/west roadway (Marsh Road) south of Riggs Road between just west of the 202nd Place and 204th Street alignments.

In accordance with seasonal changes, the contractor may begin activities as early as 6 a.m. and work until 7 p.m. Some evening or weekend work may be required. All construction activities are expected to be completed by late May; however the Maricopa County contractor will continue to maintain newly landscaped areas within the project limits through September.

What section of part 97 makes [yourcallsign-TV] illegal ?

From: ars_k1atv <wmunsil@...>
To: Queen_Creek_Hams@yahoogroups.com
Sent: Friday, August 19, 2011 9:28 PM
Subject: [Queen_Creek_Hams] Who was the first HAM TV operator?

Who was the first HAM TV operator?

Well, we know that W1BHD, Melvin Dunbrack was authorized by the FCC to sign W1BHD-TV in the early 1930's - arguably the only amateur station ever to be allowed to use the -TV suffix - which is only authorized for television stations to use. Even today HAM TV operators are not legally allowed to use it.

We know that W5AGO, Truett Kimzey, was broadcasting mechanical TV in 1934 at the time that television was still experimental and all TV stations had the letter X (for experimental) as the first letter in the suffix of their call signs.

According to my sources the first experimental TV station licensed was 3XN in 1927.

In the late 1920's and early 1930's mechanical television broadcasts were only allowed between 2.0 and 2.1 MHz - a 100 KHz band width.

Because they were in the HF band their broadcasts could be received hundreds - if not thousands - of miles away.

Bil Munsil
K1ATV HAM TV

Let's not start one of those Part 97 debates here, please ----

Bil is trying to pass on some interesting historical information and we should enjoy that information for what it is and not begin a potential legal debate that most of us won't have any interest in.

Thanks,

Joe, N2QOJ

Attachments: 1 described; binary payloads are missing from this source WARC

I just cut and pasted for all. The flyer is attached (I think)

ARCA Member Clubs,

This note is just a short reminder that ARCA is co-hosting (with the Arizona Amateur Radio Club) the April Hamfest at DeVry this coming Saturday, April 14, from 0600 to Noon at DeVry University (2149 West Dunlap in Phoenix). Due to the cancellation of this year's Scottsdale hamfest, this is the only hamfest taking place this spring in the Phoenix area. A copy of the hamfest flyer is attached to this email.

Because the ARCA staff will be working this event with the AARC, the normal 1100 start time for the ARCA meeting will be delayed until 1300. The meeting will be a working lunch held at Denny's Restaurant; 9030 N. Black Canyon Highway (northwest corner of I-17 and Dunlap - about 3/4 of a mile west of DeVry - map available on the web site at www.arca-az.org <http://www.arca-az.org/>). A copy of the meeting agenda is attached.

Hope to see you all there!

73,
KD7OED/Lee
ARCA Chair 2011-2012

Please note: We will also be conducting a GoToMeeting at this meeting. An invitation and directions on how to join the meeting will be emailed to you later today or early tomorrow. For detailed instructions on joining a GoToMeeting, visit the ARCA web site at www.arca-az.org and follow the link.

73,
Chris, N7PVL

East Valley Repeater Group
Monday April 16, 2012
8:00 pm - 9:00 pm
(This event repeats every week.)
Location: 449.825 (-) PL 100

Notes:
We are a group of Amatuer Operators that have formed this group to provide emergency communications for two East valley hospitals. The two hospitals are the Chandler Regional Hospital located at 475 S. Dobson Rd. and the Mercy Gilbert Hospital located at 3555 S. Val Vista Dr.
Our home repeater is located in Gilbert AZ on the Mercy Gilbert hospital with a coordinated frequency of 449.825 with a 100.0 PL and a minus offset. A repeater on the Chandler Regional hospital is in the works and when ready will become our back-up frequency.
Everyone is welcome to join our net on Monday night at 8:00 P.M. on the 449.825 repeater.

Arizona Emergency Net - Maricopa
Monday April 16, 2012
9:00 pm - 10:00 pm
(This event repeats every week.)
Location: 147.24 ( ) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes:
AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

1551. Queen Creek: Portions of Ellsworth Road to close on April 18, 19 for improvements

Yahoo group: Queen_Creek_Hams
Date: 2012-04-16 22:17:20 UTC
From: Joe Sammartino
Topic: 1551 Message: 1551

Portions of Ellsworth Road to close on April 18, 19 for improvements
Posted Date: 4/16/2012

As part of the Ellsworth Road Interim Improvement Project, construction crews are scheduled to slurry seal <http://en.wikipedia.org/wiki/Asphalt>and stripe Ellsworth Road from north of the Ocotillo Road intersection to south of the Rittenhouse Road intersection from April 18-20.

On Wednesday, April 18 from approximately 8:30 a.m.-4 p.m., Ellsworth Road will be closed from Ocotillo Road to just north of the Victoria Lane intersection to slurry seal this section of the road. Businesses will have access from their Ocotillo Road entrances or, for the Queen Creek Library<http://www.queencreek.org/Index.aspx?page=712>, from Ellsworth Loop Road.

On Thursday, April 19 from approximately 8:30 a.m.-4 p.m., Ellsworth Road will be closed between Victoria Lane and Rittenhouse Road to slurry seal this section of the road. Businesses will have access from their entrances on Heritage Loop Road, Rittenhouse Road, Ellsworth Loop Road or Maya Road as applicable.

On Friday, April 20, striping will take place for the entire stretch of Ellsworth Road from Ocotillo Road to Rittenhouse Road. Ellsworth Road will remain open for travel with restrictions for this activity, and emergency access will be maintained at all times.

Questions and comments about the Ellsworth Road Interim Improvement Project may be directed to the project hotline at 480-898-4090. For the latest traffic news in Queen Creek, visit QueenCreek.org<http://www.queencreek.org/Index.aspx?page=295>or www.facebook.com/queencreek.

1552. ANSR-68 Flight Announcement April 28, 2012 Maricopa

Yahoo group: Queen_Creek_Hams
Date: 2012-04-17 23:01:19 UTC
From: William McLean
Topic: 1552 Message: 1552

Arizona Near Space Research (ANSR) is pleased to announce the flight of ANSR-68. This high altitude balloon flight will take place on Saturday, April 28, 2012 at 9:00 A.M. The primary launch site will be the University of Arizona Maricopa Agricultural Center, near Maricopa, AZ (33 deg 04.42 min, 111 deg 58.97 min). The final launch site choice will depend on the predicted winds aloft. Watch for additional announcements prior to launch day.

The balloon will be a 3000-gram weather balloon, filled with helium. The expected burst altitude will be 90,000 feet or more. The flight is anticipated to last about 2.5 hours from launch to touchdown.

The balloon will carry ten student-built payload packages containing a variety of scientific apparatus as well as digital cameras to photo-document the flight. This flight is part of the Northern Arizona University and Arizona Space Grant "Changes in Altitude" program. This project involves six elementary, Middle and High Schools from across Arizona.

We thank NAU and AZ Space Grant for helping us fulfill our goal of "Promoting Science and Education through Amateur Radio and High Altitude Balloons."

APRS Beacons will transmit position information as follows:
KA7NSR-11 and KA7NSR-12 both on 445.950 MHz, KA7NSR-13 on 144.34 MHZ

The ANSR Cross-Band Repeater will operate with an input frequency of 145.56 MHz with a 162.2 Hz tone, and an output of 445.525 MHz. While contacts (especially DX) are welcome, please give priority to chase team members.

It is planned to place the repeater on IRLP node 9256.

Our mobile cross band Digipeater will repeat the beacon(s) APRS data to the
144.390 MHz standard APRS frequency and subsequently will be I-GATED to the
Internet for out-of-area trackers. You can track the flight using the following
links:
http://map.aprsworld.net/ka7nsr-11 or -12, -13
http://aprs.fi/?call=ka7nsr-11 or -12,-13
http://www.findu.com/cgi-bin/find.cgi?call=ka7nsr-11 or -12,-13

Be sure to check http://groups.yahoo.com/group/Ballooning for updates to this
announcement prior to the flight.

1554. Fwd: ANSR-68 Initial Flight Prediction - Saturday, 4/28/12

Yahoo group: Queen_Creek_Hams
Date: 2012-04-21 14:57:40 UTC
From: William McLean
Topic: 1554 Message: 1554
Attachments: 3 described; binary payloads are missing from this source WARC

The Flight prediction for next Saturday.

Good Morning,

The initial prediction for the flight of ANSR-68 is for a track of 48.6 miles on a bearing of 111º, or 17 miles NE of Picacho Peak along Hwy. 79. This prediction is based on the model at www.habhub.org. A prediction using Balloon Prediction 0.9.1.2 lands 2.8 miles south of Habhub. This is excellent agreement between models. The three attached files are the Habhub (HH) predicted track, the Balloon Prediction 0.9.1.2 (BP) track, and a JPEG of the tracks on Google Earth.

The Jetstream is forecast to be way to the north with just a mild southeasterly flow over Arizona. High temperatures are predicted to be near 90ºF. No precipitation is forecast.

The current plan is to launch from the University of Arizona Maricopa Agricultural Center, Maricopa, AZ (33º4.4’ N, 111º58.4’ W) at 0900 MST (1600 UT) on Saturday April 28, 2012.

Best Regards,

Bob Thompson, KC8BOB

Queen Creek Fire Department offers free weather safety class
Posted Date: 4/23/2012

The Queen Creek Fire Department<http://www.queencreek.org/Index.aspx?page=160>, in conjunction with the National Weather Service <http://weather.gov/>, is offering residents of all ages the opportunity to learn how to identify and report severe weather. Participants will learn about thunderstorms, cloud features associated with microbursts and tornadoes, estimating wind speeds and how local weather spotters can assist the National Weather Service issue warnings and advisories.

This free class will be offered on Saturday, May 5 at 10 a.m. in the Queen Creek Library <http://www.queencreek.org/Index.aspx?page=712>, Zane Grey Conference Room, located at 21802 S. Ellsworth Road. Seating is limited to 50 participants. To register, contact Joe LaFortune at 480-358-3502 or joe.lafortune@....

To keep updated with the Queen Creek Fire Department visit QueenCreek.org<http://www.queencreek.org/Index.aspx?page=160>or join us at
www.facebook.com/qcfire.

1560. Fwd: ANSR-68 Tuesday Flight Prediction for Saturday, 4/28/12

Yahoo group: Queen_Creek_Hams
Date: 2012-04-24 16:44:21 UTC
From: William McLean
Topic: 1560 Message: 1560
Attachments: 3 described; binary payloads are missing from this source WARC

Good Morning,

The Tuesday prediction for the flight of ANSR-68 is for a track of 35.3 miles on a bearing of 93.5º, landing in Florence just 0.4 miles SE of the Central Arizona Detention Center. This prediction is based on the model at www.habhub.org and is 20 miles shorter than yesterday's prediction. A prediction using Balloon Prediction 0.9.1.2 lands 6.2 miles SW of Habhub. The three attached files are the Habhub (HH) predicted track, the Balloon Prediction 0.9.1.2 (BP) track, and a JPEG of the tracks on Google Earth.

The Jetstream is forecast to be well to the north with a southeasterly flow over Arizona. The weather Saturday is forecast to be clear with high temperatures near 91ºF and light winds.

The current plan is to launch from the University of Arizona Maricopa Agricultural Center, Maricopa, AZ (33º4.4' N, 111º58.4' W) at 0900 MST (1600 UT) on Saturday April 28, 2012.

Best Regards,

1561. HAMS GATHERING SIGNATURES ON PETITION TO VOID ANTENNA PROHIBITIONS

Yahoo group: Queen_Creek_Hams
Date: 2012-04-25 00:06:28 UTC
From: Kenn Burnell
Topic: 1561 Message: 1561

From: Allen Brier N5XZ <n5xz@...>
HAM GATHERING SIGNATURES ON PETITION TO VOID ANTENNA PROHIBITIONS

PLEASE CROSS-POST THIS TO AS MANY REFLECTORS, SEND TO AS MANY HAMS AND NON-HAMS AND PRINT IN AS MANY NEWSLETTERS AS POSSIBLE!!

FROM QRZ.COM <http://qrz.com/>:

RADIO LAW: HAM GATHERING SIGNATURES ON PETITION TO VOID ANTENNA PROHIBITIONS

N4UM tells Newsline that he has begun a petition drive to the FCC. This, in an attempt to get the regulatory agency to void antenna prohibitions by developers and Home Owners Associations.

As of this report the petition has garnered over 1000 signatures. N4UM says that he is doing this now because the FCC is currently requesting formal comments on emergency communications in amateur radio. The agency also wants to know the effects of impediments to the amateur radio service as part of the Docket GN 12-91 inquiry.

Comments on this federal study close on May 17th. N4UM says that his petition will also close on this same day. You can find his petition on-line at tinyurl.com/antenna-rights (N4UM)

I don't know how much good this will do, but I can't see how it could hurt any pending efforts. At minimum it will bring some more attention to the subject by all concerned. In any case, PLEASE SIGN THE PETITION!

Allen N5XZ / KL5DX

1567. Important Announcement Concerning the Queen Creek Repeaters

Yahoo group: Queen_Creek_Hams
Date: 2012-04-28 17:33:27 UTC
From: Joe Sammartino
Topic: 1567 Message: 1567

Folks,

In anticipation of reprogramming our QC repeater to a new frequency pair,
I've put online a second repeater - actually the QC Portable Repeater
System - to offload our main repeater while the change-over is completed.

The QC Portable Repeater System is online as of 10 AM today and will be for
the next few days.

Here are the access details:

Frequency: 446.575 Mhz
Offset: (-) 5 Mhz
PL/Tone Encode: 141.3 Hz

Two more important points.....

1. The N2QOJ-R / KF6EZT EchoLink Node will also be moved over to the
portable repeater system on Sunday.

2. The weekly QC Emergency Volunteer Training Net will also be held on the
portable repeater system until the main repeater change-over is completed.

So, to summarize, please begin using the QC Portable Repeater System
immediately for local and net operations.

If anyone has any questions or comments, please don't hesitate to give me

1568. Re: [QCComTeam] Important Announcement Concerning the Queen Creek Repeaters

Yahoo group: Queen_Creek_Hams
Date: 2012-04-28 19:30:55 UTC
From: Joe Sammartino
Topic: 1568 Message: 1568

Great question, Tom!

The portable repeater frequency should always be in memory.

We use it for Town events, exercises, and for any other situation that could benefit from additional repeater capacity.

All of the volunteers should have it already programmed in and ready for service.

Thanks,

Joe

1570. QC Repeater Information

Yahoo group: Queen_Creek_Hams
Date: 2012-04-30 00:21:34 UTC
From: Joe Sammartino
Topic: 1570 Message: 1570

Hello Members,

Please note:

1 - The Queen Creek Amateur Radio Repeater at 448.775 will cease operations at 8 PM / 20:00 hours local time this evening. All traffic - including this evening's Emergency Communications Volunteer Net at 9 PM - should be via the Queen Creek Amateur Radio Portable Repeater at 446.575 (-) 141.3 Hz.

2 - EchoLink Node Activity will also be transferred to the Queen Creek Amateur Radio Portable Repeater at 8 PM / 20:00 hours local time.

3 - When the QC Amateur Radio Repeater is back in operation on its new frequency assignment, an announcement will be made via this Group's email distribution and also repeated on the Portable Repeater System.

Thanks,

Joe, N2QOJ

Topic: 1574 Message: 1574

Reminder from: Queen_Creek_Hams Yahoo! Group
http://groups.yahoo.com/group/Queen_Creek_Hams/cal

Arizona Emergency Net - Maricopa
Monday April 30, 2012
9:00 pm - 10:00 pm
(This event repeats every week.)
Location: 147.24 ( ) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes:
AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

1575. Queen Creek Amateur Radio Repeater back online

Yahoo group: Queen_Creek_Hams
Date: 2012-05-01 03:41:09 UTC
From: Joe Sammartino
Topic: 1575 Message: 1575

Folks,

This is an announcement for all users of the Queen Creek Repeater Systems.

Our main repeater is back on line with a new frequency:

442.300 Megahertz
(+) shift (that's up 5 Mhz)
PL/Encode is 136.5 Hertz

Please resume all local UHF traffic on our main repeater. The Portable Repeater will cease operation by Wednesday of this week.

It's important for us to wring out this new frequency pair quickly so we can document and get formal frequency coordination as soon as possible.

Please report anything out of the ordinary that you may experience on the new frequency to either me or Bruce, KF6EZT. Please join me in thanking Doug, WB7TUJ, for his time and expertise in re-tuning our duplexer on such short notice. Our main repeater was actually off line for less than 24 hours.

And - as always - please program (replace 448.775) this frequency as your main QC repeater and also program another memory location for the the repeater output as "TalkAround" - that's 442.300 Mhz, simplex.

Thank you all for your support.

Regards,

Joe, N2QOJ

Folks,

If you program your Wouxun radio with a USB cable, this manual is for you.

It is written by the same person that recently contributed the new UV3D manual that was posted a couple of days ago.

I personally verified his suggested remedies for USB driver issues and can tell you it is sound advice.

You can find the file in the "Files" section of the Group by following the link in the announcement email while logged in to YAHOO, or, just navigate to my link and download a copy:

1595. Old Rigs - Pics and Specs and more

Yahoo group: Queen_Creek_Hams
Date: 2012-05-14 12:43:53 UTC
From: Kenn Burnell
Topic: 1595 Message: 1595

Here's fun Web site - a database of old rigs for us "old guys" who remember
-- Ham-gear, communication receivers, scanners, CB and "Freeband" radios
plus professional, military and various license-free radios and more.

http://www.rigpix.com/index.shtml

73, Kenn (moving to San Tan Valley ...)

1596. Arizona Emergency Net - Maricopa, 5/14/2012, 9:00 pm

Yahoo group: Queen_Creek_Hams
Date: 2012-05-14 15:55:33 UTC
From: Queen_Creek_Hams@yahoogroups.com
Topic: 1596 Message: 1596

Reminder from: Queen_Creek_Hams Yahoo! Group
http://groups.yahoo.com/group/Queen_Creek_Hams/cal

Arizona Emergency Net - Maricopa
Monday May 14, 2012
9:00 pm - 10:00 pm
(This event repeats every week.)
Location: 147.24 ( ) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes:
AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

1599. List dog

Yahoo group: Queen_Creek_Hams
Date: 2012-05-17 05:01:04 UTC
From: Joe Sammartino
Topic: 1599 Message: 1599

Folks,

A dear friend has lost her dog. She is a Husky, black and white with a white tipped tail. She is wearing a pink collar with only a name tag which reads "Aspen".

She was last seen at Germann and 188th Street this morning.

If you any information or have the dog - please ask your friends and neighbors - its not uncommon for folks around here to rescue list dogs, please contact ASAP - 480.381.2993.

Regards,

Joe

Some kind person found Aspen and brought her to a Mesa animal shelter that had received one of the lost pet posters just a couple of hours earlier.

She is home with her family!

Thanks,

Joe

1604. Queen Creek: Traffic Alerts Map May 17-24

Yahoo group: Queen_Creek_Hams
Date: 2012-05-18 04:24:07 UTC
From: Joe Sammartino
Topic: 1604 Message: 1604

Traffic Alerts Map May 17-24
Traffic Alerts Map May 17-24
Posted Date: 5/17/2012

LOCAL TRAFFIC RESTRICTIONS:

1. *Queen Creek Road: Crismon to 220th Street
*Flaggers and off-duty deputies will be in place controlling traffic in this area while crews install new utilities. Work began on Friday, May 4 and is anticipated to continue through Friday, May 25, between the hours of 8:30 a.m. and 4 p.m.

2. *Ocotillo and Ellsworth roads
*Crews will be working on the west side of the intersection completing repairs within the westbound travel lane and eastbound left turn lane. The work will be occurring on Thursday, May 17 between 8:30 a.m. and 4 p.m.

3. *Power and Brooks Farm roads
*Crews will be completing work on utility lines at the southwest corner of the intersection. The west shoulder will be closed while work is taking place between Tuesday, May 8 and Friday, May 18.

4. *Ellsworth and Chandler Heights roads
*Crews will be working on utilities in the area. The southbound right travel lane will be closed beginning on the north side of Chandler Heights Road. Work began on Wednesday, May 9 and will continue through Thursday, May 24, between 8:30 a.m. and 4 p.m.

WORK OUTSIDE TOWN LIMITS:

- *Power and Williams Field roads
* Construction on Power Road improvements continues. For further information visit http://www.mesaaz.gov/roads/LaneRestrictions.aspx or call 480-644-3800.
**
- *Ellsworth and Ray roads
*Construction for the new State Route 24 is underway. For further information visit http://www.mesaaz.gov/roads/LaneRestrictions.aspx or call 480-644-3800.

Traffic Alerts Map May 17-24<http://www.queencreek.org/Modules/ShowDocument.aspx?documentid=10798>

PLEASE NOTE Due to the nature of the work, days and times are subject to change without prior notice. Motorists are encouraged to obey all posted signs, traffic control devices, and directions from law enforcement officers or flaggers who are controlling traffic.

1612. Arizona Emergency Net - Maricopa, 5/21/2012, 9:00 pm

Yahoo group: Queen_Creek_Hams
Date: 2012-05-21 15:55:34 UTC
From: Queen_Creek_Hams@yahoogroups.com
Topic: 1612 Message: 1612

Reminder from: Queen_Creek_Hams Yahoo! Group
http://groups.yahoo.com/group/Queen_Creek_Hams/cal

Arizona Emergency Net - Maricopa
Monday May 21, 2012
9:00 pm - 10:00 pm
(This event repeats every week.)
Location: 147.24 ( ) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes:
AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

1613. Got Questions?

Yahoo group: Queen_Creek_Hams
Date: 2012-05-24 01:03:18 UTC
From: Joe Sammartino
Topic: 1613 Message: 1613

Hello Folks,

I just wanted to remind the members of this YAHOO Group that this is the place to ask questions or look for information on most ham related topics.

If one of the more "seasoned" hams can't address it directly, we'll try to research an answer for you.

You can post your question by visiting the Group online or by sending an email to which ever Group you belong to - or both!

Just send your question from the email address that you had registered with to:

Queen_Creek_Hams@yahoogroups.com

Or, call the Queen Creek Amateur Radio hot line and leave a message with your question:

480.389.1426 - 480.389.1HAM

We may even create a short video in response to your questions if it makes sense!

Regards,

Joe, N2QOJ

1614. House for rent in Cortina

Yahoo group: Queen_Creek_Hams
Date: 2012-05-24 15:51:06 UTC
From: Joe Sammartino
Topic: 1614 Message: 1614

Folks,

This is a bit off topic, but I am the owner/moderator so it's good to be in control!

Some of you may know I have another home in Cortina on Swan Drive. We just found out last week that our wonderful tenant needs to move.

If you are interested, or know of a family that is need of a great rental home, follow this link for all the details and photos:

http://www.n2qoj.com/SWAN/

Obviously, I am a ham-friendly landlord!

Regards,

Joe, N2QOJ

I could not find any working link to Ukraine call book but.....

Have you tried to Google the call sign? I find that Googling call signs
these days usually brings some interesting hits back with lots of
information if the ham is active.

Let us know how you do....

From: Jim Henderson
Topic: 1613 Message: 1620

It would have helped to mention the callsign in question.

But if you go to DX Summit and SEARCH SPOTS on the callsign you think you copied, you may get more info.

http://www.dxsummit.fi/Search.aspx

Often there is a long lag with certain countries and their submissions to the international database.

1621. need pc fans for the repeater

Yahoo group: Queen_Creek_Hams
Date: 2012-05-26 22:15:07 UTC
From: Joe Sammartino
Topic: 1621 Message: 1621

Hi Folks,

If anyone is throwing out an old PC tower or desktop box, please remove the cooling fans.

I need 2 to 4 of the 12 volt box fans for upcoming repeater build into the town's equipment rack. Those type of fans would be perfect for radio cooling.

Just send me a note or give me a call if you have any fans to donate.

Thanks!

East Valley Repeater Group
Monday May 28, 2012
8:00 pm - 9:00 pm
(This event repeats every week.)
Location: 449.825 (-) PL 100

Notes:
We are a group of Amatuer Operators that have formed this group to provide emergency communications for two East valley hospitals. The two hospitals are the Chandler Regional Hospital located at 475 S. Dobson Rd. and the Mercy Gilbert Hospital located at 3555 S. Val Vista Dr.
Our home repeater is located in Gilbert AZ on the Mercy Gilbert hospital with a coordinated frequency of 449.825 with a 100.0 PL and a minus offset. A repeater on the Chandler Regional hospital is in the works and when ready will become our back-up frequency.
Everyone is welcome to join our net on Monday night at 8:00 P.M. on the 449.825 repeater.

1628. Re: [Queen_Creek_Hams] need pc fans for the repeater

Yahoo group: Queen_Creek_Hams
Date: 2012-05-29 18:18:19 UTC
From: Joe Sammartino
Topic: 1621 Message: 1628

Hi Folks,

Thank you for the great response to my fan request.

Here's what's been offered:

Janet - fan available but needs to be de-installed from tower
Norman - a couple a fans to donate
Jim - also a couple to donate but requires fanectomy also
Tom - Tom has (3) fans available to donate

Having a bunch to select from will make it easier to size/fabricate a solution, plus, ending up with spares and extras is a very good thing.

If I forgot anyone, please let me know.

Since this request had a very successful response, I need to make some additional requests, I need the following to support the emergency planning effort:

- (1) Cadillac Escalade, or similar, to transport me back and forth for these activities (prefer American made but any similar German vehicles will be fine)

- (1) complete mobile HF/VHF/UHF station - with state-of-the-art antenna system to allow me to communicate while in transit for these activities

- (1) vacation home in Maui or Fiji to test out-of-area emergency HF communications from Queen Creek.

- (1) life time pass to Chik-Fil-A for consulting sessions with Doug, WB7TUJ

Thank you,

Joe, N2QOJ

Traffic Alerts Map May 31-June 7
Traffic Alerts Map May 31-June 7
Posted Date: 5/31/2012

LOCAL TRAFFIC RESTRICTIONS:

1. *Chandler Heights Road west of Hawes Road to 204 Street
*Crews will be in the area completing a utility crossing. Drivers can expect shoulder closures, lane restrictions and off-duty deputies controlling traffic in this area.

2. *Power Road north of Riggs Road*
Crews will begin working on Monday, June 4 to widen Power Road just north of Riggs Road for a new development. Flaggers will be present while work progresses.

WORK OUTSIDE TOWN LIMITS:

**1. *Power and Williams Field roads
*Construction on Power Road improvements continues. For further information visit www.mesaaz.gov/roads/LaneRestrictions.aspx or call 480-644-3800.**

2. *Ellsworth and Ray roads*
Construction for the new State Route 24 is underway. For further information, visit www.mesaaz.gov/roads/LaneRestrictions.aspx or call 480-644-3800.

3. *Hunt Highway west of Power Road*
Crews from the Maricopa County Department of Transportation (MCDOT) will be working in this area. Drivers can expect flaggers controlling traffic while work progresses.
Traffic Alerts Map May 31-June 7<http://www.queencreek.org/Modules/ShowDocument.aspx?documentid=10841>

NOTE: Due to the nature of the work, dates and times are subject to change without prior notice. Motorists are encouraged to obey all posted signs, traffic control devices, and directions from law enforcement officers or flaggers who are controlling traffic.

1632. Queen Creek: Queen Creek invites community to free Ice Cream Social June 9

Queen Creek invites community to free Ice Cream Social June 9
Posted Date: 5/31/2012

[image: Ice Cream Social logo]Come cool off with your friends and neighbors at the Town of Queen Creek's free Ice Cream Social<http://www.queencreek.org/Index.aspx?page=290>from 10 a.m. to noon on Saturday, June 9 at Queen Creek Library <http://www.queencreek.org/Index.aspx?page=712>, Zane Grey Room, 21802 S. Ellsworth Road. Hosted by the Queen Creek Town Council, this event is an opportunity for residents to "get the scoop" on what's happening in the Town.

This fun and casual community gathering will provide residents an opportunity to have their opinions heard and encourage them to learn about projects affecting Queen Creek. Town representatives will be on hand to answer questions and display upcoming projects.

Topics to be covered include Town Council's five-year goals<http://www.queencreek.org/Index.aspx?page=377>, Town Center Plan <http://www.queencreek.org/Index.aspx?page=761>, road improvements, sewer and wastewater <http://www.queencreek.org/Index.aspx?page=201>projects, General Plan<http://www.queencreek.org/Index.aspx?page=76>update, economic development <http://www.queencreek.org/Index.aspx?page=119> goals and strategies, dust control <http://www.queencreek.org/Index.aspx?page=205>initiatives, Queen Creek water <http://www.queencreek.org/Index.aspx?page=472> service, fire <http://www.queencreek.org/Index.aspx?page=160>service and public safety, trash and recycling <http://www.queencreek.org/Index.aspx?page=853> services, and more.

For more information please visit QueenCreek.org<http://www.queencreek.org/Index.aspx?page=290>. To keep updated on Town news and happenings, follow www.facebook.com/queencreek or www.twitter.com/TOQC_official.

1634. Phoenix to Tucson video link.

Yahoo group: Queen_Creek_Hams
Date: 2012-06-02 22:44:01 UTC
From: ars_k1atv
Topic: 1634 Message: 1634

Starting tomorrow (Sunday) a gang of HAM TV guys plus the guru from California, WA6SVT, will be working on the Mt Lemmon end of the two-way HAM TV link.

Among other things it will entail mounting a large dish antenna at the 110 ft level of the 160 ft tower on top of 9000 ft Mt Lemmon.

When completed it will allow the HAM TV guys in Phoenix and Tucson to see and hear one another.

East Valley Repeater Group
Monday June 4, 2012
8:00 pm - 9:00 pm
(This event repeats every week.)
Location: 449.825 (-) PL 100

Notes:
We are a group of Amatuer Operators that have formed this group to provide emergency communications for two East valley hospitals. The two hospitals are the Chandler Regional Hospital located at 475 S. Dobson Rd. and the Mercy Gilbert Hospital located at 3555 S. Val Vista Dr.
Our home repeater is located in Gilbert AZ on the Mercy Gilbert hospital with a coordinated frequency of 449.825 with a 100.0 PL and a minus offset. A repeater on the Chandler Regional hospital is in the works and when ready will become our back-up frequency.
Everyone is welcome to join our net on Monday night at 8:00 P.M. on the 449.825 repeater.

Joe,

It was I that was watching your video tonight. I was at work and unable to use the radio, but I received your email about the internet stream and was able to view for the last part. Thanks for doing the stream. What a great idea! One comentary the audio when you receive is somewhat difficult to hear. Thanks again!

Hi Michael,

Thank you for watching....you have some tolerance to pain.

And thank you for your input. I must agree, the audio must be pretty awful on the stream side. It was really a last minute thing.

I'll put some thought to providing better audio next time around.

BTW, the repeater and other local frequencies we use, are streamed 24/7 at radioreference.com. You can click on this link, bookmark it, and listen in from anywhere with a pc, laptop, or smartphone / tablet:

http://www.radioreference.com/apps/audio/?action=wp&feedId=10544

Thanks again for watching and for your input.

Regards,

Joe, N2QOJ

1641. Arizona Emergency Net - Maricopa, 6/4/2012, 9:00 pm

Yahoo group: Queen_Creek_Hams
Date: 2012-06-04 15:55:40 UTC
From: Queen_Creek_Hams@yahoogroups.com
Topic: 1641 Message: 1641

Reminder from: Queen_Creek_Hams Yahoo! Group
http://groups.yahoo.com/group/Queen_Creek_Hams/cal

Arizona Emergency Net - Maricopa
Monday June 4, 2012
9:00 pm - 10:00 pm
(This event repeats every week.)
Location: 147.24 ( ) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes:
AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

1648. Queen Creek: Traffic Alerts Map June 7-14

Yahoo group: Queen_Creek_Hams
Date: 2012-06-07 17:25:30 UTC
From: Joe Sammartino
Topic: 1648 Message: 1648

Traffic Alerts Map June 7-14
Traffic Alerts Map June 7-14
Posted Date: 6/7/2012

LOCAL TRAFFIC RESTRICTIONS:

1. *Chandler Heights Road east of Hawes Road
*Crews will be in the area completing a utility crossing. Drivers can expect shoulder closures, lane restrictions and off-duty deputies controlling traffic in this area.

2. *Power Road north of Riggs Road
*Work to widen Power Road just north of Riggs Road for a new development is continuing. Flaggers will be present while work progresses.

3. *Hawes and Chandler Heights roads
*Utility work will begin the week of June 11, which will require that north and southbound traffic be shifted (to the east or west) on Hawes Road, to about 1500 feet south of Chandler Heights Road. Flaggers and off-duty law enforcement may also be present controlling traffic between 8:30 a.m. and 4 p.m. on weekdays while the work progresses.

4. *Traffic Signal at Chandler Heights and Hawes roads*
The traffic signal at Chandler Heights and Sossaman roads has been placed into an "all-flash" mode, due to technical issues. Four-way stop signs will be installed and remain in place until the permanent signal is operational. Construction of this signal is estimated to begin this Fall, with the signal anticipated to be operational in November.

WORK OUTSIDE TOWN LIMITS:

**1. *Power and Williams Field roads
*Construction on Power Road improvements continues. For further information visit http://www.mesaaz.gov/roads/LaneRestrictions.aspx or call 480-644-3800 .**

2. *Ellsworth and Ray roads*
Construction for the new State Route 24 is underway. For further information, visit http://www.mesaaz.gov/roads/LaneRestrictions.aspx or call 480-644-3800.

3. *Hunt Highway west of Power Road*
Crews from the Maricopa County Department of Transportation (MCDOT) will be working in this area. Drivers can expect flaggers controlling traffic while work progresses.
Traffic Alerts Map June 7-14<http://www.queencreek.org/modules/ShowDocument.aspx?documentid=10873>

NOTE: Due to the nature of the work, dates and times are subject to change without prior notice. Motorists are encouraged to obey all posted signs, traffic control devices, and directions from law enforcement officers or flaggers who are controlling traffic.

East Valley Repeater Group
Monday June 11, 2012
8:00 pm - 9:00 pm
(This event repeats every week.)
Location: 449.825 (-) PL 100

Notes:
We are a group of Amatuer Operators that have formed this group to provide emergency communications for two East valley hospitals. The two hospitals are the Chandler Regional Hospital located at 475 S. Dobson Rd. and the Mercy Gilbert Hospital located at 3555 S. Val Vista Dr.
Our home repeater is located in Gilbert AZ on the Mercy Gilbert hospital with a coordinated frequency of 449.825 with a 100.0 PL and a minus offset. A repeater on the Chandler Regional hospital is in the works and when ready will become our back-up frequency.
Everyone is welcome to join our net on Monday night at 8:00 P.M. on the 449.825 repeater.

Topic: 1657 Message: 1657

Reminder from: Queen_Creek_Hams Yahoo! Group
http://groups.yahoo.com/group/Queen_Creek_Hams/cal

Arizona Emergency Net - Maricopa
Monday June 11, 2012
9:00 pm - 10:00 pm
(This event repeats every week.)
Location: 147.24 ( ) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes:
AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

1660. Queen Creek: Traffic Alerts Map June 14-21

Yahoo group: Queen_Creek_Hams
Date: 2012-06-14 16:58:58 UTC
From: Joe Sammartino
Topic: 1660 Message: 1660

Traffic Alerts Map June 14-21
Traffic Alerts Map June 14-21
Posted Date: 6/14/2012

LOCAL TRAFFIC RESTRICTIONS:

1. *Chandler Heights Road east of Hawes Road
*Crews will be in the area completing a utility crossing. Drivers can expect shoulder closures, lane restrictions and off-duty deputies controlling traffic in this area.

2. *Hawes and Chandler Heights roads*
Utility work will begin the week of June 11, which will require that north and southbound traffic be shifted (to the east or west) on Hawes Road, to about 1500 feet south of Chandler Heights Road. Flaggers and off-duty law enforcement may also be present controlling traffic between 8:30 a.m. and 4 p.m. on weekdays while the work progresses.

3. *Queen Creek and Sossaman roads*
On Wednesday, June 20 between 8:30 a.m. and 4 p.m., crews will be milling and repaving the asphalt within the intersection. Drivers can expect lane closures, flaggers and off-duty law enforcement controlling traffic while the work progresses. Drivers should also be aware that left turns will be restricted at this intersection during this same time period.

4. *Traffic Signal at Chandler Heights and Hawes roads*
The traffic signal at Chandler Heights and Sossaman roads has been placed into an "all-red flash" mode, due to technical issues. Four-way stop signs have been installed and will remain in place until the permanent signal is operational. Construction of this signal is estimated to begin this Fall, with the signal anticipated to be operational in November.

WORK OUTSIDE TOWN LIMITS:

**1. *Power and Williams Field roads
*Construction on Power Road improvements continues. For further information visit http://www.mesaaz.gov/roads/LaneRestrictions.aspx or call 480-644-3800
.

2. *Ellsworth and Ray roads*
Construction for the new State Route 24 is underway. For further information, visit http://www.mesaaz.gov/roads/LaneRestrictions.aspx or call 480-644-3800.

3. *Hunt Highway west of Power Road*
Crews from the Maricopa County Department of Transportation (MCDOT) will be working in this area. Drivers can expect flaggers controlling traffic while

work progresses.

- Traffic Alerts Map June 14-21<http://www.queencreek.org/Modules/ShowDocument.aspx?documentid=10921>

NOTE: Due to the nature of the work, dates and times are subject to change without prior notice. Motorists are encouraged to obey all posted signs, traffic control devices, and directions from law enforcement officers or flaggers who are controlling traffic.

From: Joe Sammartino
Topic: 1668 Message: 1668
Attachments: 2 described; binary payloads are missing from this source WARC

Folks,

Our first annual Field Day is coming up this weekend at Founders' Park. The Town is letting us use the Community Center building which is *air conditioned and very comfortable.* Please find below the text of the flyer that has been created for press and publicity. It should also be attached to this message along with a picture of Founders' Park.

Any local hams interested in assisting with setup, operating, and/or breakdown should contact Joe, N2QOJ. We need lots of participation to make this a successful event. All local area hams are invited to participate. We start setup on Saturday morning at about 8 AM, begin the Field Day formerly at 11 AM, conclude on Sunday at 2 PM, then breakdown the site. So, there is plenty of opportunity to come down and lend a hand, operate, bring visitors and family, etc. We will have two operating stations and a third station dedicated to "GOTA", that's "Get on the Air" for new hams and non-hams. This is your chance to operate HF across the US and Canada even if your license class is Technician. And if you do not want to operate a station, you can assist by logging the contacts. If you would like to formerly participate, please contact Joe by email or phone to schedule and let him know your specific interests: jsammartino@..., 480.270.4563.

Besides the complete stations that N2QOJ and KF7E are providing, KFRYX and NU0Z have generously donated the use of their "Go Boxes" as additional stations for demonstrations. These are state-of-the-art Go Boxes designed for emergency communications and remote station communications.

Regards,

Joe, N2QOJ

Members of the Queen Creek Amateur Radio Club (QCARC) and Town of Creek Volunteer Emergency Communications Team / CERT (QCECT) prepare for Field Day 2012, to be held from Saturday, June 23, through Sunday, June 24, at Founders’ Park.

Field Day is a picnic, a campout, practice for emergencies, an informal contest and, most of all, FUN!

ARRL Field Day is the single most popular on-the-air event held annually in the US and Canada. On the fourth weekend of June of each year, more than 35,000 radio amateurs gather with their clubs, groups or simply with friends to operate from remote locations.

It is a time where many aspects of Amateur Radio come together to highlight our many roles. While some will treat it as a contest, other groups use the opportunity to practice their emergency response capabilities. It is an excellent opportunity to demonstrate Amateur Radio to the organizations that Amateur Radio might serve in an emergency, as well as the general public. For many clubs, ARRL Field Day is one of the highlights of their annual calendar.

The contest part is simply to contact as many other stations as possible and to learn to operate our radio gear in abnormal situations and less than optimal conditions.

We use these same skills when we help with events such as marathons and bike-a- thons; fund-raisers such as walk-a-thons; celebrations such as parades; and exhibits at fairs, malls and museums — these are all large, preplanned, non-emergency activities.

But despite the development of very complex, modern communications systems — or maybe because they ARE so complex — ham radio has been called into action again and again to provide communications in crises when it really matters. Amateur Radio people (also called “hams”) are well known for our communications support in real disaster and post-disaster situations.

What is the ARRL?

The American Radio Relay League is the 150,000+ member national association for Amateur Radio in the USA. ARRL is the primary source of information about what is going on in ham radio. It provides books, news, support and information for individuals and clubs, special events, continuing education classes and other benefits for its members.

What is Amateur Radio

Often called “ham radio,” the Amateur Radio Service has been around for a century. In that time, it’s grown into a worldwide community of licensed operators using the airwaves with every conceivable means of communications technology. Its people range in age from youngsters to grandparents. Even rocket scientists and a rock star or two are in the ham ranks. Most, however, are just normal folks like you and me who enjoy learning and being able to transmit voice, data and pictures through the air to unusual places, both near and far, without depending on commercial systems.

The Amateur Radio frequencies are the last remaining place in the usable radio spectrum where you as an individual can develop and experiment with wireless communications. Hams not only can make and modify their equipment, but can create whole new ways to do things.

For more Information, please contact: Joe Sammartino (QCARC) at JSammartino@... or Bruce Barnes (QCECT) at BruceKBarnes@....

Folks,

Does anyone have a G5RV that we can borrow for the first annual Queen Creek Field Day at Founders' Park? Any 80-10 meter wire antenna would be fine.

If you, please contact me asap.

Thanks,

Joe N2QOJ

Subject: Queen Creek: Queen Creek Radio Hams to conduct public demonstration of emergency communications

Queen Creek Radio Hams to conduct public demonstration of emergency communications
Posted Date: 6/21/2012

Despite the Internet, cell phones, e-mail and modern communications, every year whole regions find themselves in the dark. Tornadoes, fires, storms, ice and even the occasional cutting of fiber optic cables leave people without the means to communicate. In these cases, the one consistent service that has never failed has been Amateur Radio<http://www.arrl.org/new-to-ham-radio>.
These radio operators, often called "hams" provide backup communications for everything from the American Red Cross <http://www.redcross.org/> to FEMA <http://www.fema.gov/> and even for the International Space Station<http://www.nasa.gov/mission_pages/station/main/index.html>.
Queen Creek area "hams" will join with thousands of other Amateur Radio operators showing their emergency capabilities this weekend.

Over the past year, the news has been full of reports of ham radio operators providing critical communications during unexpected emergencies in towns across America including the California wildfires, winter storms, tornadoes and other events world-wide. When trouble is brewing, Amateur Radio's people are often the first to provide rescuers with critical information and communications. On the weekend of June 23-24, the public will have a chance to meet and talk with Queen Creek area ham radio

operators and see for themselves what the Amateur Radio Service is about as hams across the USA will be holding public demonstrations of emergency communications abilities.

This annual event, called "Field Day" is the climax of the week long "Amateur Radio Week" sponsored by the ARRL <http://www.arrl.org/>, the national association for Amateur Radio. Using only emergency power supplies, ham operators will construct emergency stations in parks, shopping malls, schools and backyards around the country. Their slogan, "When All Else Fails, Ham Radio Works" is more than just words to the hams as they prove they can send messages in many forms without the use of phone systems, internet or any other infrastructure that can be compromised in a crisis. More than 35,000 amateur radio operators across the country participated in last year's event.

"The fastest way to turn a crisis into a total disaster is to lose communications," said Allen Pitts of the ARRL. "From the earthquake and tsunami in Japan to tornadoes in Missouri, ham radio provided the most reliable communication networks in the first critical hours of the events. Because ham radios are not dependent on the Internet, cell towers or other infrastructure, they work when nothing else is available. We need nothing between us but air."

In the Queen Creek area, the Queen Creek Volunteer Emergency Communications Team, and Queen Creek Amateur Radio Club<http://dl.dropbox.com/u/34195852/QCARC/index.htm>, will be demonstrating Amateur Radio at Founders' Park<http://www.queencreek.org/Index.aspx?page=195>, 22407 S. Elllsworth Road, on June 23 through June 24. They invite the public to come and see ham radio's new capabilities and learn how to get their own FCC radio license before the next disaster strikes.

Amateur Radio is growing in the US. There are now over 700,000 Amateur Radio licensees in the US, and more than 2.5 million around the world. Through the ARRL's Amateur Radio Emergency Services<http://www.arrl.org/ares>program, ham volunteers provide both emergency communications for thousands of state and local emergency response agencies and non-emergency community services too, all for free.

To learn more about Amateur Radio, visit emergency-radio.org<http://www.arrl.org/emergency-radio-org>. The public is cordially invited to come, meet and talk with the hams. See what modern Amateur Radio can do. They can even help you get on the air!

Folks,

Here is some detailed information for our upcoming Field Day on Saturday:

For links to park information and a map, visit this link:

www.n2qoj.com/fieldday

Please pass on the above link to family, friends, and other hams!

Regards, Joe - N2QOJ

Queen Creek Amateur Radio Club

and

Queen Creek Emergency Communications Team

2012 Field Day

When: June 23 - June 24, 2012

Where: Community Center, Founders'
Park<http://queencreek.org/Index.aspx?page=195>

Address: 22407 S. Ellsworth Road,Queen Creek, AZ 85142<http://goo.gl/maps/51sn>

Contact: Joe Sammartino, N2QOJ, jsammartino@..., 480.389.1426

Field Day Event Details:

Air Conditioned Community Center !

(2) Stations - 80M-10M

(1) GOTA "Get On The Air" Station - 40 M, 6 M, 2M, 70 cm

N3FJP Field Day Logging Software

Build Project - 6M Quad Loop

KF7RYX "Go-Box"

NU0Z "Go-Box"

100% Off Grid Stations, Generator and Battery

Saturday 11 AM Start Time

Saturday 8:30 AM - Equipment staging, Laptop setups, Logging software prep

Sunday 2 PM Stop Time

Sunday 2 PM - Breakdown

Come help us setup, operate, breakdown, meet local hams, get on the air on the HF bands! Bring family and friends. We'll be happy to provide demonstrations.

If someone can bring an audio/video monitor I can bring my Barbie Cam - in Barbie Pink.

OR

If someone can bring a 12 VDC power supply which will take a cigarette lighter plug and a cable-ready analog TV and a set of rabbit ears I'll try to bring my UHF HAM TV station.

HAM TV is basically all I do in ham radio - as if you couldn't tell.

1693. Time to program your radios for the new repeater frequencies

Yahoo group: Queen_Creek_Hams
Date: 2012-06-29 22:43:57 UTC
From: Joe Sammartino
Topic: 1693 Message: 1693

Hello Folks,

Thanks to the very prompt efforts by a few folks, we already have the new repeater frequency pair up and running on our main Queen Creek Amateur Radio repeater system. Thanks Doug, WB7TUJ, for tuning the duplexer and Dennis, KF7RYX, for providing a very comfortable environment to do the work, Bruce, KF6EZT, for getting us this new frequency pair, and Dave, N7DJZ, for invaluable frequency coordination consultation.

Please note the new frequency data:

449.475 MHz
(-) Shift
PL remains 136.5 Hz

It is online and working since 3 PM on Friday afternoon.

Our backup repeater at 446.575 MHz (-) PL 141.3 Hz will remain operational throughout the weekend but will come offline Sunday night at 9 PM.

Please re-program your radios, spread the word, 449.475 MHz is the repeater frequency to use for all local repeater communications and QC Emergency Communications Team Net.

The EchoLink node will be moved to the new frequency in time for the Sunday night net.

Regards,

Joe, N2QOJ

Good stuff!

Special thanks to all the helpers that shared the hot sun getting it all set up.

Lots of people came by to see and partake. I believe we sowed some seeds of interest.

1702. Queen Creek: Sheriff's Office offers tips to prevent vehicle burglary

Yahoo group: Queen_Creek_Hams
Date: 2012-07-05 20:23:52 UTC
From: Joe Sammartino
Topic: 1702 Message: 1702

This may be off topic but I think it has some value to us as residents. I did not know about the Town curfews but, then again, my kids are 24 and 21! I'm not sure what logic goes into such curfews. It seems to be that a motivated delinquent minor can do lots of damage between sun up and 9:59 PM. I don't think good kids become evil at sun down because of opportunity. Maybe the local public safety folks know more than me - hope so!

Joe

Sheriff's Office offers tips to prevent vehicle burglary
Posted Date: 7/5/2012

Over the past several months, the Maricopa County Sheriff's Office's (MCSO) Queen
Creek Division <http://www.queencreek.org/Index.aspx?page=137> has recorded an increased number of vehicle burglaries. Although the deputies are employing a variety of proactive measures and have made arrests, the situation has continued. The Sheriff's Office offers the following suggestions to reduce your chances of being a victim:

- *Lock your vehicle. *In the majority of cases, unlocked vehicles are targeted.
- *Remove valuables from your vehicle.* Many of the cases reported in Queen Creek included the theft of wallets, purses, cameras and other valuables that were left in plain view.
- *Report suspicious activity. *Please call MCSO's non-emergency hotline, 602-876-1011, to report suspicious people or vehicles in your neighborhood.

The Town of Queen Creek <http://www.queencreek.org/> has a curfew ordinance that prohibits minors 15 years and younger from being out past 10 p.m. Minors ages 16-18 years may not be out past midnight. Several of the reports of vehicular burglary have involved minors. Please know where your children are and report curfew violations.

For more information about MCSO visit www.MCSO.org. To keep updated on Town news and happenings visit
QueenCreek.org<http://www.queencreek.org/Index.aspx?page=126>,
or follow www.facebook.com/queencreek or www.twitter.com/TOQC_official.

1704. RE: [Queen_Creek_Hams] Field Day Photos

Yahoo group: Queen_Creek_Hams
Date: 2012-07-06 18:11:22 UTC
From: Norm
Topic: 1697 Message: 1704

Looks like you had a great FD. Nice setup. Interesting photos and videos. Joe, we need you to take some videos for us. What was the public attendance like since you were in the park? I take it Jim was voluntarily hitting it hard on the CW; it almost looks like he's locked up in that room and you slipped food under the door. And definitely there weren't any threats of shutting off the air to that room .. J

First time I've seen the go boxes, nice job.

Congratulation to all the Queen Creek Hams on putting this together. It's a mammoth effort especially the first time to get a team coordinated, putting the equipment together, and operating. I'm impressed. I'm assuming this is a 2A team. I didn't catch what your FD call was. We may have worked you from Gentry Fire Tower.

From: Joe
Topic: 1697 Message: 1705

Hi Norm,
On behalf of all those who participated at our first Field Day, thank you for those kind words. I just uploaded another photo depicting one of our youngest visitors on the air.
We learned a lot! The Field Day call was Jim's - "KF7E". We operated with the highest license privileges of other members when Jim was not present.
While we did not log a tremendous amount of contest contacts, the majority turned out to be Jim's CW contacts. We still need to sort out the details and prepare our Field Day submission to the ARRL. We even logged a few DX contacts.
We had a great many visitors - friends, family, local hams, etc. - especially Saturday afternoon and evening. We had at least two local hams new to our little group that were invaluable during setup - Ted, KB7RED and Joe, kE7WHE. David, KF7RZJ, one of our own die-hard members, did a fantastic job during our setup and antenna raising.
The backbone crew for the event - Dennis - KF7RYX, Jim - KF7E, David - KF7RZJ, and our Town liaison - Jim - KC7QPI - were top notch and very much up to the task. Of course, the Town - via Joe LaFortune's assistance with both the loan of the Community Center and public information assistance, was impressively supportive.
Fred, AC7JF, brought along some friends (including Gary, AC7R) and setup an information/VEC table that was right on target with both the spirit and objectives of the event.
We were also very lucky to have loaned equipment from Chris - NU0Z, Conrad - K1EC, Bruce - KF6EZT, Jim - KC7QPI, Dennis, KF7RYX, Bill - K7WWM, Jim - KF7E (lots), and probably others.
Just about all of the breakdown was performed by Jim - KF7E, Dennis - KF7RYX, and Jim - KC7QPI. If I forgot anyone, please accept my apologies and let us know who I missed.
Some local "Get On the Air" assistance was provided by Doug, WB7TUJ. We had first-time HF contacts for some local hams and first-time on the air for several non-hams. It was great to experience their excitement.
All in all, it was one of the best Field Day experiences I have ever had.
Regards,
Joe, N2QOJ

From: Joe Sammartino
Topic: 1716 Message: 1716

The better repeater antenna has been checked out and re-connected to the
Queen Creek Repeater system.

Please use it and report on it's operation and performance if you can.

Regards,

Joe, N2QOJ

Folks,

On the subject of power connectors, specifically Anderson Power Poles, I have noted a link below to a very good basic introduction to this very popular power connection scheme.

http://www.prc68.com/I/PowerPole.shtml

I will also post a PDF document in this YAHOO Group's Files Section:

http://groups.yahoo.com/group/Queen_Creek_Hams/files/Anderson_Power_Pole.pdf

If you have any trouble downloading the file, contact me and I will send it to you directly.

Reminder from: Queen_Creek_Hams Yahoo! Group
http://groups.yahoo.com/group/Queen_Creek_Hams/cal

Arizona Emergency Net - Maricopa
Monday July 23, 2012
9:00 pm - 10:00 pm
Location: 147.24 ( ) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes:
AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

Folks,

I will be changing over to another antenna system this afternoon. The Repeater will be off the air for about an hour sometime this afternoon (Monday).

Not sure exactly when, but if you can't key the repeater, no worries, it will be back.

Regards,

Joe

OK, folks ---

There is now a nice new antenna for the repeater on my second floor patio for the monsoons and haboobs to knock around.

If you are radio active, and any distance from Queen Creek today, please check in to see what kind of signal performance you can achieve. There will be a few of us listening for your call.

Thank you,

Joe, N2QOJ

Reminder from: Queen_Creek_Hams Yahoo! Group
http://groups.yahoo.com/group/Queen_Creek_Hams/cal

Arizona Emergency Net - Maricopa
Monday August 6, 2012
9:00 pm - 10:00 pm
Location: 147.24 ( ) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes:
AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

1748. EchoLink and APRS

Yahoo group: Queen_Creek_Hams
Date: 2012-08-10 18:18:14 UTC
From: Joe Sammartino
Topic: 1748 Message: 1748

Folks,

Thanks for your participation last night at the Volunteer Emergency Communications Team meeting.

Unfortunately, we ran of time and managed to only address EchoLink - somewhat.

To learn more about *EchoLink*, please follow-up and review the tutorial and FAQ pages at:

www.echolink.org

EchoLink apps exist for Windows (best for at home full experience and features), iPhone, Android, MAC, and Linux.

The Windows app is available at the EchoLink web site. The iPhone app is available through iTunes (free) and the Android app is available through Google Play (formerly Android Market). If you need EchoLink for MAC or Linux, just Google and you will find sources.

Remember, if you are new to EchoLink, you must download the app first - preferably Windows - install it and sign in with your call sign and create a password. That is considered a "validation request". After you complete that, you then visit the www.echolink.org website and select "Authentication".

You will be give several choices to Authenticate:

1. Via telephone - must have a publicly listed phone number that you have access to
2. Via Credit Card - a $1 charge for this method but works quickly and well
3. Scan your license credentials and upload or FAX

Using EchoLink the first few times can be tricky. The most important thing is to use the "Echo Test Server" feature. It will help you set your audio levels correctly so you can be sure other EchoLink stations will be able to hear you clearly and at the proper level.

Switching to APRS:

Unlike the EchoLink website, which is one of the best, APRS is a bit more of a beast to learn conceptually.

Visit the following websites to learn more:

www.aprs.org by the creator of APRS, Bob Bruninga, WB4APR
www.aprs.net

Best site for seeing the APRS vehicles, objects, etc. is definitely:

http://www.aprs.fi

APRS stations can be radio based, internet based, both of the former, digipeaters, Igates, and other experimental items (customized home routers with built-in APRS functions).

For purposes of transponding our location information - or more commonly referred to as automatically reporting our positions - there are now apps available for smart phones and tablets that take advantage of their cellular / Internet connectivity to report position reports, facilitate 2-way APRS messaging, alert on "buddy" movements, report on the temperature and battery condition of your RV, and more.

Here's what I recommend for Android devices:

1. U2APRS - fantastic and free app from a ham in Japan; it even has APRS.fi viewing built-in, voice-to-text assisted messaging (speech recognition), and text-to-speech announcing for incoming messages. This app is strongly recommended for Android devices.

It is not available through the Google Play store. You can get it (free) and learn how to use from here:

http://fujisangoro.web.fc2.com/indexe.html

A copy of the software is also in the Queen Creek Com Team YAHOO Group Files section in the APRS folder (with instructions too).

2. APRSDroid - Another popular Android APRS app. It is available through the Google Play store for $4.49. You can also get it FREE, legally, if you send me a direct email. The developer does make it available free to tech heads like me. I don't want to put it in the Group files section because I don't recommend it as first choice.

Click on this link for the more info from the Google Play store:

https://play.google.com/store/apps/details?id=org.aprsdroid.app&feature=nav_result#?t=W251bGwsMSwyLDNd

Developer's site: http://aprsdroid.org/?pc=Market

Here's what I recommend for iPhone:
*
*
*iBCNU *(get it?....I be seeing you)

This app is available through the iTunes app store for $1.99. I strongly recommend because the alternative free app - and other paid apps - require you to have accounts at other APRS web portals for it to function - I say "blah" to that nonsense.

Just search for "APRS" or "iBCNU", pay for it, and install it.

Here is the very important part:

In order to pass positional information TO the worldwide APRS information network, one must have an official APRS PASSCODE generated for them for their specific call sign. This passcode can be requested via the app or obtained through me. I can generate this passode anytime, so just drop me a line and I'll be happy to get it for you so you have it in advance. This is a requirement if you plan on using PC apps, iPhone apps, or Android apps. It's how we hams protect the APRS worldwide network from non ham use.

In closing....

If you have any question on EchoLink - especially how to access nodes via our repeater - call me or send an email. Same for APRS, especially Android. I don't use the app for iPhone but can help a little.

Best regards,

Joe, N2QOJ

Topic: 1749 Message: 1749

Regarding Anderson Powerpoles....

Here are some YouTube videos I found that add to what was presented by Bruce Thursday night.

It appears that Anderson Powerpole connectors are so popular that there are plenty of good videos already available.

Try these out:

http://youtu.be/y8ODI8fAU_k

(not ham radio themed but best produced and most informative. The presenter specifies precisely what gauge wire is best for each of the different amp rated types.)

http://youtu.be/tRdd2ow02eI

http://youtu.be/ejeRqEARzac

1754. Important: The Name of the QC Emergency Communications Team has changed!

Yahoo group: Queen_Creek_Hams
Date: 2012-08-16 17:27:31 UTC
From: Joe
Topic: 1754 Message: 1754

Folks,

Moving forward, our friends at the Queen Creek Emergency Communications Team (QCECT) have changed the name of their organization and will now be known as:

Queen Creek Emergency Communications Group (QCECG)

Since some members of QC Amateur Radio Club (this Group!) are connected to that organization, it is fitting that we have an announcement to our members as well.

The name of our their YAHOO Group has been changed also and can now be found at:

http://groups.yahoo.com/group/QCComGroup

If you are interested in joining that group of volunteers to support Queen Creek and the local area disaster preparedness efforts, contact Bruce, KF6EZT, for assistance.

Regards,

Joe, N2QOJ

Reminder from: Queen_Creek_Hams Yahoo! Group
http://groups.yahoo.com/group/Queen_Creek_Hams/cal

East Valley Repeater Group
Monday August 20, 2012
8:00 pm - 9:00 pm
Location: 449.825 (-) PL 100

Notes:
We are a group of Amatuer Operators that have formed this group to provide emergency communications for two East valley hospitals. The two hospitals are the Chandler Regional Hospital located at 475 S. Dobson Rd. and the Mercy Gilbert Hospital located at 3555 S. Val Vista Dr.
Our home repeater is located in Gilbert AZ on the Mercy Gilbert hospital with a coordinated frequency of 449.825 with a 100.0 PL and a minus offset. A repeater on the Chandler Regional hospital is in the works and when ready will become our back-up frequency.
Everyone is welcome to join our net on Monday night at 8:00 P.M. on the 449.825 repeater.

1757. Arizona Emergency Net - Maricopa, 8/20/2012, 9:00 pm

Yahoo group: Queen_Creek_Hams
Date: 2012-08-20 15:01:09 UTC
From: Queen_Creek_Hams@yahoogroups.com
Topic: 1757 Message: 1757

Reminder from: Queen_Creek_Hams Yahoo! Group
http://groups.yahoo.com/group/Queen_Creek_Hams/cal

Arizona Emergency Net - Maricopa
Monday August 20, 2012
9:00 pm - 10:00 pm
Location: 147.24 ( ) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes:
AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

Traffic Alerts Map August 16-23
Traffic Alerts Map August 16-23
Posted Date: 8/16/2012

LOCAL TRAFFIC RESTRICTIONS:

1.* Queen Creek Road: Crismon Road to 220th Street*
Crews continue to work to widen Queen Creek Road in this area. Drivers can expect the north shoulder to remain closed along with trucks hauling material and other heavy equipment working in the area.

WORK OUTSIDE TOWN LIMITS:

1. *Power and Williams Field roads
*Construction on Power Road improvements continues. For further information visit http://www.mesaaz.gov/roads/LaneRestrictions.aspx or call 480-644-3800
.

2. *Ellsworth and Ray roads*
Construction for the new State Route 24 is underway. For further information, visit http://www.mesaaz.gov/roads/LaneRestrictions.aspx or call 480-644-3800.
Traffic Alerts Map August 16-23<http://www.queencreek.org/Modules/ShowDocument.aspx?documentid=11220>

*NOTE: Due to the nature of the work, dates and times are subject to change without prior notice. Motorists are encouraged to obey all posted signs, traffic control devices, and directions from law enforcement officers or flaggers who are controlling traffic.

From: Thomas Miller
Topic: 1749 Message: 1759

All of my radios are converted to Power Pole Connectors as quickly as I can get to them. The Power Pole has the lowest contact resistance available allowing small physical connectors to be used without heating. Turning the direction is not needed. The "Amateur Radio Emergency Service" is pretty much adhering to a standard for 12V. connectors. When looking into the connectors the red is on the Right and both tabs on the top. This promotes total compatibility among power supplies and radios nation wide. An extension cord adhering to this standard on both ends will work without error and batteries hooked to chargers will also always be correct. Kinda neet its like a no mistake system. I found several crimpers that work. The club could invest in the proper crimp set and bring it to the meetings for anyone to use. Aircraft owners can do what they want. They probably don't swap equipment any way.

Regarding Anderson Powerpoles....

Here are some YouTube videos I found that add to what was presented by Bruce Thursday night.

It appears that Anderson Powerpole connectors are so popular that there are plenty of good videos already available.

Try these out:

http://youtu.be/y8ODI8fAU_k

(not ham radio themed but best produced and most informative. The presenter specifies precisely what gauge wire is best for each of the different amp rated types.)

I believe Tom is referring to the remote control aircraft hobby which was the driving force behind one of the video links I offered. It has no bearing on the topic of Anderson powerpoles.

And we do have a complete powerpoles kit with crimp tool for the Queen Creek Emergency Communications Group volunteers to use.

1773. Local Ham Radio Audio Feed

Yahoo group: Queen_Creek_Hams
Date: 2012-09-03 03:13:06 UTC
From: Joe
Topic: 1773 Message: 1773

Folks,

Remember that you can always listen to the local ham radio operations by visiting the following link:

http://www.radioreference.com/apps/audio/?action=wp&feedId=10544

A scanner is on 24/7 listening to the following local frequencies:

Simplex - 146.500 Mhz, Queen Creek Simplex
Simplex - 146.460 Mhz Valley-wide Emcomm Simplex, Radios-in-the-Park
Repeater - 449.475, Queen Creek Ham Repeater
Repeater - 449.825, East Valley Repeater Group
Repeater - 446.575, Queen Creek Event and Portable
Repeater - 147.380, N2ULY/WB7TUJ, Commonly referred to as White Tanks
Repeater - 449.325

Of course, since it is a scanner, the first active frequency takes priority.

There is usually a delay of about 30-35 seconds. I'd recommend "bookmarking" the link in your favorite browser. It's a great way to monitor the local ham activity when you are not local with a radio. All you need is a PC, MAC, smartphone, or tablet with a a good browser and Internet connection.

Regards,

Joe, N2QOJ

Arizona Emergency Net - Maricopa
Monday September 3, 2012
9:00 pm - 10:00 pm
Location: 147.24 ( ) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes:
AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

1780. Ocotillo Repeater Videos

Yahoo group: Queen_Creek_Hams
Date: 2012-09-08 20:41:11 UTC
From: Joe Sammartino
Topic: 1780 Message: 1780

Folks,

I tagged along yesterday with Dennis, KF7RYX, while Doug, WB7TUJ, and Dave, N7DJZ, installed the new Ocotillo Repeater.

I was the videographer and photographer for this special occasion.

Here's the links to the Queen Creek Youtube Channel for three short videos introducing the repeater, some technical information, and an important customization announcement from Dave:

http://youtu.be/69FEsrTRVSo

http://youtu.be/nD-aoX2BSmw

http://youtu.be/ijVvEiOKG58

Please feel free to share these links with other QC ARC or QC Emergency Communications Group members but not with anyone else outside these two groups.

Enjoy,

Joe, N2QOJ

East Valley Repeater Group
Monday September 17, 2012
8:00 pm - 9:00 pm
Location: 449.825 (-) PL 100

Notes:
We are a group of Amatuer Operators that have formed this group to provide emergency communications for two East valley hospitals. The two hospitals are the Chandler Regional Hospital located at 475 S. Dobson Rd. and the Mercy Gilbert Hospital located at 3555 S. Val Vista Dr.
Our home repeater is located in Gilbert AZ on the Mercy Gilbert hospital with a coordinated frequency of 449.825 with a 100.0 PL and a minus offset. A repeater on the Chandler Regional hospital is in the works and when ready will become our back-up frequency.
Everyone is welcome to join our net on Monday night at 8:00 P.M. on the 449.825 repeater.

1793. Arizona Emergency Net - Maricopa, 9/17/2012, 9:00 pm

Yahoo group: Queen_Creek_Hams
Date: 2012-09-17 15:01:08 UTC
From: Queen_Creek_Hams@yahoogroups.com
Topic: 1793 Message: 1793

Reminder from: Queen_Creek_Hams Yahoo! Group
http://groups.yahoo.com/group/Queen_Creek_Hams/cal

Arizona Emergency Net - Maricopa
Monday September 17, 2012
9:00 pm - 10:00 pm
Location: 147.24 ( ) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes:
AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

1799. HF sked?

Yahoo group: Queen_Creek_Hams
Date: 2012-09-21 16:47:42 UTC
From: W5NRA
Topic: 1799 Message: 1799

Hey all you HeiFers... or HFers haha... I finally got some of my HF equipment back on the air.
I am running an ICOM IC-7000 for my mobile rig with a Comet UHV-6 doing 6M, 10M, 15M, and 40M. I am also running an ICOM IC-718 with an MFJ "hamstick" on 40M.

Joe, can you change that APRS code on my link to w5nra-10. I am kind of sporadic with the APRS now but will try to remember to turn it on...

Terry

Hi Terry,

I made the change to the APRS link to W5NRA-10 as requested.

I hope you get some responses to the HF Sked request....

Give us an idea of when you are typically HF mobile and active?

Regards,

Joe, N2QOJ

It varies a lot... the last two days I have been off due to lack of mail volume.. today I am leaving in a couple minutes...My "normal" hours are 9-5pm, so 30-60 min after work is the best time.. or later in the evenings.I am always available on Sunday afternoons... I know that kind of makes it hard to hook up...

Ok....

When I am going to do some HF stuff, I will text to you as much (assuming you have the same cell number as before), plus, I will also tweet.

My Twitter ID is "n2qoj". How novel !

Anytime I am in my shack, I usually also run SKYPE and my Skype name is "joesammartino".

Hopefully, that will help announce my availability for any interested parties.

Regards,

Joe, N2QOJ

1803. off topic, pool motor

Yahoo group: Queen_Creek_Hams
Date: 2012-09-21 23:19:43 UTC
From: Joe Sammartino
Topic: 1803 Message: 1803

This is off topic but I have to ask....

Does anyone on this list have any experience repairing an Emerson pool motor, model 1081?

This is the second motor that has been ruined because my pool filler got stuck on and flooded the ground area with the motor. The filter motor came on with the automatic schedule during the night and poof.

At least this time the motor hums so something is still left to work with.

Please let me know if anyone can rework such a beast or may have a referral for a good motor re-builder.

I have a guy that can get me some a wholesale unit for about $200 bucks plus installation but I'm hoping for a simpler, less expensive, quick fix.

Thanks,

Joe

1807. Queen Creek: Traffic Alerts Sept. 20-27

Yahoo group: Queen_Creek_Hams
Date: 2012-09-24 17:05:07 UTC
From: Joe Sammartino
Topic: 1807 Message: 1807

Traffic Alerts Sept. 20-27
Posted Date: 9/24/2012
LOCAL TRAFFIC RESTRICTIONS:

1. Queen Creek Road: Crismon Road to 220th Street
Crews continue to work to widen Queen Creek Road in this area. Traffic will be shifted while the work progresses. Drivers can expect reduced posted speed limits, and flaggers and off-duty law enforcement controlling traffic in this area.

2. Power Road north of Riggs Road
Crews continue to work to widen Power Road in this area. The east shoulder will remain closed while the work continues.

3. Sossaman Road north of Riggs Road
The northbound right travel lane will be closed while repair work takes place.

WORK OUTSIDE TOWN LIMITS:

1. Power and Williams Field roads
Construction on Power Road improvements continues. For further information visit http:// <http://www.mesaaz.gov/roads/LaneRestrictions.aspx> www.mesaaz.gov <http://www.mesaaz.gov/roads/LaneRestrictions.aspx>/roads/<http://www.mesaaz.gov/roads/LaneRestrictions.aspx> LaneRestrictions.aspx <http://www.mesaaz.gov/roads/LaneRestrictions.aspx>or call 480-644-3800.

2. Ellsworth and Ray roads
Construction for the new State Route 24 is underway. For further information, visit http://<http://www.mesaaz.gov/roads/LaneRestrictions.aspx> www.mesaaz.gov <http://www.mesaaz.gov/roads/LaneRestrictions.aspx>/roads/<http://www.mesaaz.gov/roads/LaneRestrictions.aspx> LaneRestrictions.aspx <http://www.mesaaz.gov/roads/LaneRestrictions.aspx>or call 480-644-3800.

Traffic Alerts Map Sept. 20-27

NOTE: Due to the nature of the work, dates and times are subject to change without prior notice. Motorists are encouraged to obey all posted signs, traffic control devices, and directions from law enforcement officers or flaggers who are controlling traffic.

1810. Queen Creek: Traffic Alerts Map Sept. 27-Oct. 4

Yahoo group: Queen_Creek_Hams
Date: 2012-09-27 17:51:31 UTC
From: Joe Sammartino
Topic: 1810 Message: 1810

Traffic Alerts Map Sept. 27-Oct. 4
Traffic Alerts Map Sept. 27-Oct. 4
Posted Date: 9/27/2012

NOTICE: Beginning Oct. 1 and continuing through Oct. 14, the Town's contractor, CPC Construction, will be making improvements to intersections in the Queen Creek Villages that have round-abouts. Further information is included in the news release<http://www.queencreek.org/Modules/ShowDocument.aspx?documentid=11404>, as well as a site map<http://www.queencreek.org/Modules/ShowDocument.aspx?documentid=11403>showing locations where work will be taking place.

LOCAL TRAFFIC RESTRICTIONS:

1.* Queen Creek Road east of Sossaman Road
*A material haul will be taking place on Monday, Oct. 1 and Tues., Oct. 2 between 6 a.m. and 4 p.m. Trucks will be hauling westbound on Queen Creek Road to Sossaman Road, then north for a short distance. Drivers can expect slow-moving vehicles in this area.

2. *Ellsworth and Ocotillo roads
*Crews will be working north of Ocotillo Road in the southbound through-lane and left-turn lanes on Monday, Oct. 1 between 8:30 a.m. and 4 p.m. Drivers can expect lane restrictions on Ellsworth Road while the work progresses. Turn restrictions are not anticipated at this time, and access to local businesses will remain open.

3. *Ocotillo Road east of Ellsworth Road**
*Crews will be working on the south shoulder of Ocotillo Road in this area. Traffic restrictions are not anticipated at this time.

4. *Sossaman Road north of Riggs Road*
The northbound right travel lane will be closed while repair work takes place.

5. *Power Road north of Riggs Road*
Crews continue to work to widen Power Road in this area. The east shoulder will remain closed, and speeds will be reduced, while the work continues.

WORK OUTSIDE TOWN LIMITS:

1. *Power and Williams Field roads
*Construction on Power Road improvements continues. For further information visit http://www.mesaaz.gov/roads/LaneRestrictions.aspx or call 480-644-3800
.

East Valley Repeater Group
Monday October 1, 2012
8:00 pm - 9:00 pm
Location: 449.825 (-) PL 100

Notes:
We are a group of Amatuer Operators that have formed this group to provide emergency communications for two East valley hospitals. The two hospitals are the Chandler Regional Hospital located at 475 S. Dobson Rd. and the Mercy Gilbert Hospital located at 3555 S. Val Vista Dr.
Our home repeater is located in Gilbert AZ on the Mercy Gilbert hospital with a coordinated frequency of 449.825 with a 100.0 PL and a minus offset. A repeater on the Chandler Regional hospital is in the works and when ready will become our back-up frequency.
Everyone is welcome to join our net on Monday night at 8:00 P.M. on the 449.825 repeater.

Reminder from: Queen_Creek_Hams Yahoo! Group
http://groups.yahoo.com/group/Queen_Creek_Hams/cal

Arizona Emergency Net - Maricopa
Monday October 1, 2012
9:00 pm - 10:00 pm
Location: 147.24 ( ) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes:
AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

Traffic Alerts Map Oct.4-11
Traffic Alerts Map Oct.4-11
Posted Date: 10/4/2012

*LOCAL TRAFFIC RESTRICTIONS: *

1. *Village Loop Road South - Sierra Park to Rittenhouse Road
*Crews will be working through Friday, Oct. 12 to add pedestrian ramps at each of the traffic circles along Village Loop South. Drivers can expect flaggers and off-duty deputies controlling traffic when approaching the traffic circles.
2. *Victoria Lane West of Ellsworth Loop Road
*Victoria Lane will be closed west of Ellsworth Loop Road until Wednesday, Oct. 10 while work progresses to widen the south side of the street. Local traffic will be able to travel on Victoria Lane, west of Ellsworth Loop Road to the first driveway into Queen Creek Marketplace. The west driveway existing onto Victoria Lane will be closed.

*WORK OUTSIDE TOWN LIMITS: *

1. *Power and Williams Field roads
*Construction on Power Road improvements continues. For more information visit http://www.mesaaz.gov/roads/LaneRestrictions.aspx or call 480-644-3800.
2. *Ellsworth and Ray roads
*Construction for the new State Route 24 is underway. For more information visit http://www.mesaaz.gov/roads/LaneRestrictions.aspx or call 480-644-3800.

Traffic Alerts Map
Oct.4-11<http://www.queencreek.org/Modules/ShowDocument.aspx?documentid=11422>

*NOTE: Due to the nature of the work, dates and times are subject to change without prior notice. Motorists are encouraged to obey all posted signs, traffic control devices, and directions from law enforcement officers or flaggers who are controlling traffic. *

Jim,

I don't normally monitor these frequencies because of the higher traffic, which I don't want to hear. However, if you'll give a shout on the QC or Ocotillo repeater when you take off, I'll start monitoring then.

Where is your place?

Bruce

East Valley Repeater Group
Monday October 15, 2012
8:00 pm - 9:00 pm
Location: 449.825 (-) PL 100

Notes:
We are a group of Amatuer Operators that have formed this group to provide emergency communications for two East valley hospitals. The two hospitals are the Chandler Regional Hospital located at 475 S. Dobson Rd. and the Mercy Gilbert Hospital located at 3555 S. Val Vista Dr.
Our home repeater is located in Gilbert AZ on the Mercy Gilbert hospital with a coordinated frequency of 449.825 with a 100.0 PL and a minus offset. A repeater on the Chandler Regional hospital is in the works and when ready will become our back-up frequency.
Everyone is welcome to join our net on Monday night at 8:00 P.M. on the 449.825 repeater.

Arizona Emergency Net - Maricopa
Monday October 15, 2012
9:00 pm - 10:00 pm
Location: 147.24 ( ) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes:
AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

From: Joe Sammartino
Topic: 1835 Message: 1835

Traffic Alerts Map Oct. 18-25
Traffic Alerts Map Oct. 18-25
Posted Date: 10/18/2012

LOCAL TRAFFIC RESTRICTIONS:

1.* Power Road north of Riggs Road*
Traffic restrictions for north and southbound traffic will remain on Power Road through Wednesday, Oct. 31 while work progresses to widen Power Road in this area.

2. *Ocotillo Road east of Rittenhouse Road
*The south shoulder of Ocotillo Road will be closed for utility work through Thursday, Oct. 18.

3. *Ellsworth Loop Road/Victoria Lane*
Traffic restrictions for north and southbound traffic on Ellsworth Loop Road will be in place through Friday, Nov. 9.
Traffic may be restricted to a single north or southbound travel lane during non-peak travel times. Southbound lane restrictions will begin as far north as Queen Creek Road, with northbound restrictions beginning as far south as the Ellsworth Road connection (south of the Queen Creek Wash).
Posted speed limits will be reduced, and off-duty deputies may be controlling traffic.

WORK OUTSIDE TOWN LIMITS:

1. *Power and Williams Field roads
*Construction on Power Road improvements continues. For further information visit http://www.mesaaz.gov/roads/LaneRestrictions.aspx or call 480-644-3800
.

2. *Ellsworth and Ray roads*
Construction for the new State Route 24 is underway. For further information, visit http://www.mesaaz.gov/roads/LaneRestrictions.aspx or call 480-644-3800.

3. *Happy Road and 206th Street intersection*
The intersection of Happy Road and 206th Street is temporarily closed to facilitate drainage improvements. During this time, Empire Blvd., San Tan Boulevard, Hawes Road or Ellsworth Road may be used as alternate routes.
The intersection will reopen by 5 p.m. Friday, Nov. 9.
Traffic Alerts Map Oct.
18-25<http://www.queencreek.org/Modules/ShowDocument.aspx?documentid=11494>

*NOTE: Due to the nature of the work, dates and times are subject to change without prior notice. Motorists are encouraged to obey all posted signs,

traffic control devices, and directions from law enforcement officers or flaggers who are controlling traffic.*

1840. Fwd: Queen Creek: Queen Creek to demolish several Town-owned buildings in Town Center

Yahoo group: Queen_Creek_Hams
Date: 2012-10-25 16:54:56 UTC
From: Joe Sammartino
Topic: 1840 Message: 1840

Queen Creek to demolish several Town-owned buildings in Town Center
Posted Date: 10/25/2012

Over the next several weeks, contractors for the Town of Queen Creek's Public Works Division <http://www.queencreek.org/Index.aspx?page=144> will be tearing down five old buildings in Town Center<http://www.queencreek.org/Index.aspx?page=761>as part of the community's continued work in the Redevelopment District.

Four of the buildings are located just west of Ellsworth on Ocotillo Road, and one is located just south of Town Hall. The demolition work will be completed in several steps, but all work is scheduled to be complete by the end of November. Construction will not affect traffic or any special events, and any noise will be contained to daytime hours only, per the Town's noise ordinance<http://www.queencreek.org/modules/showdocument.aspx?documentid=2974>.

These buildings, which were constructed several decades ago, are considered dilapidated and are not repairable. Each site will be surrounded with caution tape, and residents are discouraged from walking on the property.

To keep updated on Town news and happenings, follow www.facebook.com/queencreek or www.twitter.com/TOQC_official.

From: Joe Sammartino
Topic: 1846 Message: 1846

Traffic Alerts Map Nov. 1-8
Traffic Alerts Map Nov. 1-8
Posted Date: 11/1/2012

LOCAL TRAFFIC RESTRICTIONS:

1. *Julius Road/West of Hawes Road (Roman Estates Subdivision)*
Town Utility Dept. crews will be repairing a section of roadway on Julius Road. This repair will require the closure of Julius Road for a total of two days between the hours of 8:30 a.m. and 4 p.m. Work is currently scheduled for Thursday, Nov. 8 and Friday, Nov. 9.

2. *Ellsworth Loop Road/Victoria Lane*
Traffic restrictions for north and southbound traffic on Ellsworth Loop Road will be in place through Friday, Nov. 16. Traffic may be restricted to a single north or southbound travel lane during non-peak travel times (before 6 a.m. and after 7 p.m.). Southbound lane restrictions will begin as far north as Queen Creek Road, with northbound restrictions beginning as far south as the Ellsworth Road connection (south of the Queen Creek Wash). Posted speed limits will be reduced, and off-duty deputies may be controlling traffic.

3. *Queen Creek Road and Emperor Blvd.
*Crews will be closing the westbound right travel lane on the west side of Emperor Blvd.

4. *Queen Creek and Sossaman roads
*Crews will be closing travel lanes and the shoulders east and westbound on Queen Creek Road just west of Sossaman Road.

5. *Ellsworth and Cloud roads*
Utility crews will be closing the southbound center travel lane on Ellsworth Road from just north of Cloud Road to south of Riggs Road.

6. *Cloud Road and 220th Street*
Crews will be completing the street widening work on the south side of Cloud Road on the west side of 220th Street. The south shoulder of Cloud Road and the west shoulder of 220th Street will be closed while the work progresses.

WORK OUTSIDE TOWN LIMITS:

1. *Power and Williams Field roads
*Construction on Power Road improvements continues. For further information visit http://www.mesaaz.gov/roads/LaneRestrictions.aspx or call 480-644-3800
.

2. *Ellsworth and Ray roads*
Construction for the new State Route 24 is underway. For further information, visit http://www.mesaaz.gov/roads/LaneRestrictions.aspx or call 480-644-3800.

3. *Happy Road and 206th Street intersection*
The intersection of Happy Road and 206th Street is temporarily closed to facilitate drainage improvements. During this time, Empire Blvd., San Tan Blvd., Hawes Road or Ellsworth Road may be used as alternate routes. The intersection will reopen by 5 p.m. Friday, Nov. 9.
Traffic Alerts Map
Nov.1-8<http://www.queencreek.org/Modules/ShowDocument.aspx?documentid=11589>

NOTE: Due to the nature of the work, days and times are subject to change without prior notice. Motorists are encouraged to obey all posted signs, traffic control devices, and directions from law enforcement officers or flaggers who are controlling traffic.

1848. Fox Hunt coming up on November 10th

Yahoo group: Queen_Creek_Hams
Date: 2012-11-04 19:17:35 UTC
From: Joe
Topic: 1848 Message: 1848

Folks,
There will be an announcement soon from Byon, N6BG, regarding an upcoming Fox Hunt on November 10th.
In the meantime, here is some initial information:
See http://n6bg.com/foxhunt/ <http://n6bg.com/foxhunt/> for details as they become available.....
Byon, N6BG, would like to invite members of Queen Creek Hams and the QCECG to participate in this fun event.
From Byon:
"I'm planning on having a driving hunt next Saturday, Nov 10. It will start at noon, and run until the evening, giving people the opportunity to start hunting whenever and wherever they like. I'd estimate it will take about 1-2 hours to find it. I have details on the website http://n6bg.com/foxhunt/ <http://n6bg.com/foxhunt/> and will post any updates there as well. I am planning on using the 443.050 repeater to keep in contact with the hunters during the event. Once I get permission to do that, I'll post it that info to the website."
Be sure to visit the link provided by Byon. There are additional links that will help you learn about Fox Hunting (Direction Finding) and typical equipment used.
And, of course, please visit Byon's commercial site for a great description of his APRS, Weather, FOX Hunting, Automatic Power Shutoff, and Powerwerx products --- www.byonics.com <http://www.byonics.com> .
Regards,
Joe, N2QOJ

1849. East Valley Repeater Group, 11/5/2012, 8:00 pm

East Valley Repeater Group
Monday November 5, 2012
8:00 pm - 9:00 pm
Location: 449.825 (-) PL 100

Notes:
We are a group of Amatuer Operators that have formed this group to provide emergency communications for two East valley hospitals. The two hospitals are the Chandler Regional Hospital located at 475 S. Dobson Rd. and the Mercy Gilbert Hospital located at 3555 S. Val Vista Dr.
Our home repeater is located in Gilbert AZ on the Mercy Gilbert hospital with a coordinated frequency of 449.825 with a 100.0 PL and a minus offset. A repeater on the Chandler Regional hospital is in the works and when ready will become our back-up frequency.
Everyone is welcome to join our net on Monday night at 8:00 P.M. on the 449.825 repeater.

1851. Arizona Emergency Net - Maricopa, 11/5/2012, 9:00 pm

Yahoo group: Queen_Creek_Hams
Date: 2012-11-05 16:01:11 UTC
From: Queen_Creek_Hams@yahoogroups.com
Topic: 1851 Message: 1851

Reminder from: Queen_Creek_Hams Yahoo! Group
http://groups.yahoo.com/group/Queen_Creek_Hams/cal

Arizona Emergency Net - Maricopa
Monday November 5, 2012
9:00 pm - 10:00 pm
Location: 147.24 ( ) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes:
AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

1856. Queen Creek: Traffic Alerts Map Nov. 8-15

Yahoo group: Queen_Creek_Hams
Date: 2012-11-08 17:31:57 UTC
From: Joe Sammartino
Topic: 1856 Message: 1856

Traffic Alerts Map Nov. 8-15
Traffic Alerts Map Nov. 8-15
Posted Date: 11/8/2012

LOCAL TRAFFIC RESTRICTIONS:

1. *Julius Road/West of Hawes Road (Roman Estates Subdivision)*
Town Utility Dept. crews will be repairing a section of roadway on Julius Road. This repair will require the closure of Julius Road for a total of two days between the hours of 8:30 a.m. and 4 p.m. Work is currently scheduled for Thursday, Nov. 8 and Friday, Nov. 9.

2. *Ellsworth Loop Road/Victoria Lane*
Traffic restrictions for north and southbound traffic on Ellsworth Loop Road will be in place through Friday, Nov. 16. Traffic may be restricted to a single north or southbound travel lane during non-peak travel times (before 6 a.m. and after 7 p.m.). Southbound lane restrictions will begin as far north as Queen Creek Road, with northbound restrictions beginning as far south as the Ellsworth Road connection (south of the Queen Creek Wash). Posted speed limits will be reduced, and off-duty deputies may be controlling traffic.

3. *Cloud Road and 220th Street*
Crews will be completing the street widening work on the south side of Cloud Road on the west side of 220th Street. The south shoulder of Cloud Road and the west shoulder of 220th Street will be closed while the work progresses.

WORK OUTSIDE TOWN LIMITS:

**1. *Power and Williams Field roads
*Construction on Power Road improvements continues. For further information visit http://www.mesaaz.gov/roads/LaneRestrictions.aspx or call 480-644-3800
.

2. *Ellsworth and Ray roads*
Construction for the new State Route 24 is underway. For further information, visit http://www.mesaaz.gov/roads/LaneRestrictions.aspx or call 480-644-3800.

3. *Happy Road and 206th Street intersection*
The intersection of Happy Road and 206th Street is temporarily closed to facilitate drainage improvements. During this time, Empire Blvd., San Tan Boulevard, Hawes Road or Ellsworth Road may be used as alternate routes. The intersection will reopen by 5 p.m. Friday, Nov. 9.
Traffic Alerts Map
Nov.8-15<http://www.queencreek.org/Modules/ShowDocument.aspx?documentid=11650>

*NOTE: Due to the nature of the work, dates and times are subject to change without prior notice. Motorists are encouraged to obey all posted signs, traffic control devices, and directions from law enforcement officers or flaggers who are controlling traffic.

1860. QC Portable Repeater

Yahoo group: Queen_Creek_Hams
Date: 2012-11-10 15:02:37 UTC
From: Joe Sammartino
Topic: 1860 Message: 1860

Folks,

The QC portable repeater is now coordinated at 446.600 MHz with a PL of 136.5 Hz and (-) shift.

Please test it out this weekend.

Regards,

Joe, N2QOJ

1864. RADIO IN SPACE: SPOT THE ISS SERVICE FROM NASA

Yahoo group: Queen_Creek_Hams
Date: 2012-11-11 16:42:50 UTC
From: kenn_burnell
Topic: 1864 Message: 1864

A new service from NASA called Spot the Station will send you a text message when the International Space Station is within visual range of your house.

The service will only notify users if the station is easily visible above trees, buildings, and other objects. Spot the Station will calculate the station's proximity to more than 4,600 positions on Earth, updating its information several times each week.

The International Space Station is usually at peak visibility at dawn and dusk. When skies are clear, it typically appears as fast-moving point of light.

You can sign up for the service on line by visiting spotthestation.nasa.gov <spotthestation.nasa.gov> .

1865. Queen Creek Portable Repeater

Yahoo group: Queen_Creek_Hams
Date: 2012-11-11 20:47:33 UTC
From: Joe Sammartino
Topic: 1865 Message: 1865

Attention!!!!

Our Queen Creek Portable Repeater has been coordinated to a new frequency and PL tone.

Please program your radios with this new frequency, shift, and tone:

Portable Repeater:

446.600 MHz
(-) Shift
PL is 136.5 Hz

The repeater is active for the next few days. We are still in a conditional period to monitor performance and assure that it is not conflicting with any other repeaters before it can become official.

Please report to me anything that does not sound right or seems strange in performance.

Regards,

Joe

East Valley Repeater Group
Monday November 12, 2012
8:00 pm - 9:00 pm
Location: 449.825 (-) PL 100

Notes:
We are a group of Amatuer Operators that have formed this group to provide emergency communications for two East valley hospitals. The two hospitals are the Chandler Regional Hospital located at 475 S. Dobson Rd. and the Mercy Gilbert Hospital located at 3555 S. Val Vista Dr.
Our home repeater is located in Gilbert AZ on the Mercy Gilbert hospital with a coordinated frequency of 449.825 with a 100.0 PL and a minus offset. A repeater on the Chandler Regional hospital is in the works and when ready will become our back-up frequency.
Everyone is welcome to join our net on Monday night at 8:00 P.M. on the 449.825 repeater.

1869. Arizona Emergency Net - Maricopa, 11/12/2012, 9:00 pm

Yahoo group: Queen_Creek_Hams
Date: 2012-11-12 16:01:11 UTC
From: Queen_Creek_Hams@yahoogroups.com
Topic: 1869 Message: 1869

Reminder from: Queen_Creek_Hams Yahoo! Group
http://groups.yahoo.com/group/Queen_Creek_Hams/cal

Arizona Emergency Net - Maricopa
Monday November 12, 2012
9:00 pm - 10:00 pm
Location: 147.24 ( ) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes:
AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

K7NRA Special Event Station_11-17-2012
Hello Folks,
There is a special event station today celebrating the NRA's 141st
birthday.
Here's the info:
---K7\
NRAThe Yavapai Amateur Radio Club (YARC) will operate a special
eventstation November 17, 2012, in celebration of the NRA's 141st
birthday.We will be operating from Gunsite Academy in Paulden. The
specialevent call sign will be K7NRA. It will conduct operations on the
following amateur frequencies from 1500Z to 2400Z: 7.250, 14.050, 14.250
and 21.335 MHz.
We will also be operating on 10M in the Technician portion of the
bandand on the Verde Valley Amateur Radio Association repeater onMingus
Mountain, 147.220+ 162.2 PL.
We may also be using the Mt. Elden repeater, 147.140 to link to the Mt.
Ord repeater on 147.360 to allow AZ hams who can't work us on HFto make
a contact if we get permission to do so.
A unique NRA/Gunsite certificate will be provided to those
stationscontacted during the event.
QSL with a 9" x 12" self-addressed, stamped envelope to:
YARC,PO Box 11994Prescott, AZ 86304
Information is in the Nov. issue of QST and at:
http://www.w7yrc.org/nra_birthday.htm
73,
John, WB9VGJ
--John L. Broughtonwb9vgj@...http://users.commspeed.net/wb9vgj/

I made a recording of my contact with them so you can get an idea of
what the HF contact sounded like. It is in the "Files" section of the
online Group web site.
Regards,
Joe, N2QOJ

Thanks..

That's not unusual. Folks experiment and play with backyard repeater
inputs and outputs all the time.

Sometimes for the own EchoLink nodes, sometimes for remote base control,
etc.

It should not bother us (famous last words).

Regards,

Joe

1889. New Feature for the Group

Yahoo group: Queen_Creek_Hams
Date: 2012-11-26 17:08:21 UTC
From: Joe Sammartino
Topic: 1889 Message: 1889

Hi Members,

I've turned on a new feature for the Group.

If you use a news feed reader (commonly referred to as "RSS" feed reader),
you can now add a feed for the Queen Creek Hams Group to that reader.

Just add (sometimes called "subscribing") the following feed:

http://rss.groups.yahoo.com/group/Queen_Creek_Hams/rss

I've been using Google Reader for several years and I am very happy with it.

BTW, this RSS feed will work even if you are not a member of the Group
since it only works with Groups that have unrestricted message viewing.

This feature WILL NOT be available for the QCECG YAHOO Group since that
message system is private.

Please post your questions if you have any.

Regards,

Joe, N2QOJ

1892. ISS will be visible Thursday morning

Yahoo group: Queen_Creek_Hams
Date: 2012-11-29 04:24:41 UTC
From: Joe Sammartino
Topic: 1892 Message: 1892
Attachments: 1 described; binary payloads are missing from this source WARC

Folks,

For those of you interested in spotting the ISS, it will be visible on Thursday morning for about 4 minutes.

Here are the details:

SpotTheStation! Time: Thu Nov 29 6:43 AM, Visible: 4 min, Max Height: 52 degrees, Appears: NW, Disappears: E

I've also attached an illustration that will help you determine how to use this information.

1893. Re: ISS will be visible Thursday morning

Yahoo group: Queen_Creek_Hams
Date: 2012-11-29 17:59:23 UTC
From: uniqueoperator
Topic: 1892 Message: 1893

It was a great sunrise this morning if you waited for it at 7:11am. The main event was the ISS which made an impressive visible pass starting at 6:42am, just as predicted. It should be noted the Moon was almost full and quite bright. The ISS first appeared low in the NE sky rising quickly, slowly moving upwards and then quickly across the sky at an impressive speed and height before beginning its setting track to the E, almost directly into the rising sun. The sun, not yet over the horizon, lit the ISS brightly from its rise and across the sky until it disappeared into the brightening sky to the east. This was one of the more impressive passes over Arizona with the sun in just the right position. Unfortunately, the background sky turned from black to blue just a few seconds before the ISS appeared. Almost all the stars disappeared as if someone just took an eraser and wiped them from the sky before your eyes. I didn't have a camera with the right color contrast settings available to capture the rapidly changing light during the pass.

From: Norm
Topic: 1895 Message: 1896

I watched it in color on my pc sat tracking software. Also watched the gray zone move from the east and finally into a sunrise. Not as spectacular as seeing the real thing, but it was cold outside.

Subject: [Queen_Creek_Hams] Boys Scout Troop Went Missing at Four Peaks

Be sure to read the comments posted by friends and family after the news reporters "version".

http://www.abc15.com/dpp/news/region_phoenix_metro/central_phoenix/scout-troop-missing-in-the-four-peaks-area-did-not-return-from-camping-trip

This kind of this shouldn't happen in this day and age with handheld GPS, maps/compass, and easy-to-use communications gear....

Radios in the Park
Saturday December 8, 2012
10:00 am - 2:00 pm
Location: Several - See Notes

Notes:
Radios in the Park (RitP) will be on Saturday Dec.8 from 10am to 2pm. The objective is to run your radio on non-grid power (battery, generator) and make as many connections as possible. This includes HF and VHF. You'll want to set up an antenna and use your aux power. The VHF frequency to use is 146.46 and encode PL frequency of 77.0 Hz. If you want to find where other folks are set up, come up on that frequency and you'll find somebody local.

Dennis (KF7RYX) will set up in the park on the east side of Remington Heights. Chris (NU0Z) may set up in his neighborhood (Emperor Estates) and Bruce (KF6EZT) will probably set up something in the retention basin next to his house (NE corner of Power and Queen Creek).

1908. Queen Creek Council Session Discussion of Disaster Plan Using Local Hams

Yahoo group: Queen_Creek_Hams
Date: 2012-12-07 05:22:04 UTC
From: Joe Sammartino
Topic: 1908 Message: 1908

Folks,

Last night, Joe LaFortune - QC Public Safety Manager, Chief Van Summers, Dr. Gary Smith, and Bruce - KF6EZT, presented the status of the QC Disaster Plan to the Town Council during their working session.

I attended and noted that the presentation and interaction with the Town Council lasted about 45-50 minutes. Much of the presentation and discussion concerned the successful use of local volunteer ham communicators - you folks, members of the QCECG.

It is very obvious how proud Chief Van, Joe LaFortune, Bruce, and Dr. Smith of this wonderful group of volunteers.

You can view a video of this event here:

http://www.ustream.tv/recorded/27523864

Be patient, it is a slow load.....I'm working on generating our own video file to have available for distribution and viewing.

Regards,

Joe, N2QOJ

1910. Radios in The Park

Yahoo group: Queen_Creek_Hams
Date: 2012-12-07 18:18:19 UTC
From: Joe Sammartino
Topic: 1910 Message: 1910

Folks,

Several local hams will be operating portable mode (off the grid) for the "Radios in the Park" event, scheduled for this Saturday, December 8th from 10 AM to 2 PM local time.

Here's who will be setting up:

Dennis, KF6EZT - Remington Heights in Queen Creek,

Doug, WB7TUJ - Emerald Park in Mesa

Bruce, KF6EZT - Sossaman Estates at Power & Queen Creek Road, Queen Creek

Mark, WX7MB - Tonto National Forest, Phon D. Sutton Recreation Area

Chris, NU0Z - Tentative, TBD

If you would like to participate, this link will show you all these locations and guide you there:

http://aprs.fi/#!call=a%2FRITP_Den%2Ca%2FRITP_Doug%2Ca%2FRITP_Bruc%2Ca%2FRITP_Mark%2Ca%2FQCARC
bf&timerange=3600

The Queen Creek Amateur Radio Club is still holding its monthly breakfast at Flight Deck Cafe at 8 AM. (also shown on the link above)

Have fun,

Joe, N2QOJ

Referring to Dennis using Bruce's call is OK, since Bruce is a cool/good guy.

However making it look like Dennis went to CA land is over the top.

1915. EMP Delivery System by Boeing? - CHAMP

Yahoo group: Queen_Creek_Hams
Date: 2012-12-10 02:51:35 UTC
From: Kenn Burnell
Topic: 1915 Message: 1915

At the Ham Club Breakfast last Saturday we had a lively group. One of the subjects that came up was EMP and what folks could do to prepare. Some folks put some radio gear in an old refrigerator or microwave oven ...

It appears to me as if CHAMP has similar capabilities as an EMP except ituses "radio waves" instead of a pulse. Interesting weapon... One of our
Club members works for Boeing and may comment ... or, he may knot ...

Topic: 1918 Message: 1918

Reminder from: Queen_Creek_Hams Yahoo! Group
http://groups.yahoo.com/group/Queen_Creek_Hams/cal

Arizona Emergency Net - Maricopa
Monday December 10, 2012
9:00 pm - 10:00 pm
Location: 147.24 ( ) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes:
AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

Folks,

For those of you interested in spotting the ISS, it will be visible on Monday evening for only (1) minute! That should test your spotting skills.

Here are the details:

SpotTheStation! Time: Mon Dec 10 7:01 PM, Visible: 1 min, Max Height: 50 degrees, Appears: WSW, Disappears: NW

I've also attached an illustration that will help you determine how to use this information.

1920. Technician Class Coming Up Early Next Year.....

Yahoo group: Queen_Creek_Hams
Date: 2012-12-10 18:28:18 UTC
From: Joe Sammartino
Topic: 1920 Message: 1920
Attachments: 1 described; binary payloads are missing from this source WARC

Folks,

If you have friends, family, or know anyone that may be interested in becoming a ham, let them know about the upcoming class early next year.

It is great for those that prefer taking a class rather than self-study - or in addition to self-study.

Myself, nor QCECG or QCARC, is affiliated with the folks offering the class.

The details are in the attached flyer. If you have a problem downloading the flyer, you can also download it from my drop box:

https://dl.dropbox.com/u/4721475/QCARC/Classes%20and%20Testing/Ham%20Radio%20Class.pdf?dl=1

1921. ICOM IC-703 Plus for Sale

Yahoo group: Queen_Creek_Hams
Date: 2012-12-11 16:28:30 UTC
From: uniqueoperator
Topic: 1921 Message: 1921

I'm selling my ICOM IC-703 Plus 50Mhz QRP Transceiver. This is an HF+50Mhz, all mode, QRP rig. It's pristine, original owner, no scratches or blemishes, clean, mic, power cable with Anderson connector, 500hz filter, user manual, sales brochures, and original boxes. The radio has been used for low power (5 watts) data like PSK31 with excellent performance using a variety of antennas. I've used several computer programs (CI-V converter not included) such as HRD and ic7000bkt with all the control necessary to operate the radio in a hands off mode (not sure why I do this though, other than it's techie fun). This radio has traveled all around the western US (not mobile) and operated from picnic tables on a small 12vdc battery & solar with many types of experimental wire antennas with performance that varied by the antenna used (and geographic location). I recently bench checked the radio receiver and xmtr and it still meets factory specifications. The price is $700

If you're not sure if this radio is something you can use or want more information, I can be contacted off-line directly without your inquiry being public.

Norm, aa7oo

1922. Spot the International Space Station Tonight at 6:10 PM

Folks,

For those of you interested in spotting the ISS, it will be visible *tonight * for (4) minutes at a fantastic elevation of 73 degrees. That's almost straight up overhead. That doesn't happen very often.

The entire visible period will be from about 6:09 PM until 6:14 PM but it will be at its maximum elevation of 73 degrees at exactly 6:12:25 PM.

Here are the details:

SpotTheStation! Time: Tue Dec 11 6:10 PM, Visible: 4 min, Max Height: 73 degrees, Appears: SW (221 degrees), Disappears: NE (48 degrees)

I've also attached an illustration that will help you determine how to use this information. The attached GIF file is animated.

You can watch and track the station in advance at this link:

http://spaceflight.nasa.gov/realdata/tracking/index.html

Regards,

Joe, N2QOJ

Joe -

Thanks for passing this along... I took my kids out to watch the last one the other night and they were very impressed (and that wasn't at 73 degrees)!

I was fortunate enough to watch one pass directly over my house - quite a sight to see. I'll be out there again tonight waiting with them...

Regards,

Alan

I took my D72 out this time and made it up to the ISS. Was picked up by So Cal, and Mexico City. Also saw a couple requests to contact from Las Vegas, NV, and Amarillo, TX!

Thanks again, Joe.

1929. Re: [Queen_Creek_Hams] Re: Spot the International Space Station Tonight at 6:10 PM

Yahoo group: Queen_Creek_Hams
Date: 2012-12-12 17:07:09 UTC
From: Byon Garrabrant
Topic: 1922 Message: 1929

I had both my D7 and my D72. Both received fine, but only the D72 made it to the ISS. It may have been a setting problem on the D7. I was using a tape measure yagi on the one I was transmitting with, and the other had a telescoping 2M antenna for backup receiving, and I switched the yagi between the 2 radios a couple times during the pass. Both antennas seemed to work fine.

I was sending and receiving APRS. I sent my static location up twice, and received about 10 other stations from around the US. I also received a APRS text message from a friend in Vegas, but I don't didn't notice if the D72 sent an ack. I didn't see an ack in the internet logs afterwards. I also had 145.8 tuned in, but didn't hear anything, so I wasn't sure if voice was functional or not. I figured if it was, it would be in use. I never tried to talk to it.

Satellites are brand new to me, so I'm sure I have more to learn, but I had fun. And it was very easy to see the station, both nights.

East Valley Repeater Group
Monday December 17, 2012
8:00 pm - 9:00 pm
Location: 449.825 (-) PL 100

Notes:
We are a group of Amatuer Operators that have formed this group to provide emergency communications for two East valley hospitals. The two hospitals are the Chandler Regional Hospital located at 475 S. Dobson Rd. and the Mercy Gilbert Hospital located at 3555 S. Val Vista Dr.
Our home repeater is located in Gilbert AZ on the Mercy Gilbert hospital with a coordinated frequency of 449.825 with a 100.0 PL and a minus offset. A repeater on the Chandler Regional hospital is in the works and when ready will become our back-up frequency.
Everyone is welcome to join our net on Monday night at 8:00 P.M. on the 449.825 repeater.

Topic: 1935 Message: 1935

Reminder from: Queen_Creek_Hams Yahoo! Group
http://groups.yahoo.com/group/Queen_Creek_Hams/cal

Arizona Emergency Net - Maricopa
Monday December 17, 2012
9:00 pm - 10:00 pm
Location: 147.24 ( ) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes:
AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

Folks,

If you have already received this email directly, my apologies. We are just trying to make sure everyone gets the notice.

A few of us are meeting at San Tan Flat <http://www.santanflat.com/> for a bite to eat and maybe we'll be doing that outdoors around a fire.

It will be for tomorrow, Wednesday, and the time is 6 PM. The address is 6185 West Hunt Highway in Queen Creek. That's just south of Ellsworth Road. See the attached map.

They are well known for great burger dishes and steak dinners. We'll be on the Ocotillo Repeater during the travel to and back. 449.325 (-) PL 100 Hz.

Come join us...

Holiday greetings,

Joe, N2QOJ - On behalf of QCECG and QCARC

Hi Joe, I had not seen that before. It was the luck of the draw that I got the call I think there was at least three of us who applied for the call. Maybe I should run out and get a Lottery ticket?

1945. How to Access Your Router If You Forget the Password

Yahoo group: Queen_Creek_Hams
Date: 2012-12-22 21:07:25 UTC
From: Joe Sammartino
Topic: 1945 Message: 1945

Folks,

This is a very good article (reprint from HowToGeek) regarding routers and some very good port forwarding information.

Since router issues come up from time-to-time, especially for those new to EchoLink PC users, I thought this would be a great article to post on our local YAHOO ham Groups.

Regards,

Joe, N2QOJ

==========

How to Access Your Router If You Forget the Password<http://www.howtogeek.com/131338/how-to-access-your-router-if-you-forget-the-password/>

[image: router-header]

Routers protect their web interfaces, where you can configure their networking, parental control, and port forwarding settings, with a username and password. These default passwords can be changed to protect the router's settings.

If you've forgotten a router's password – or if you acquired a used router and don't know its password – there's a way to reset the password. You may also be able to forward ports without knowing the password.

Image Credit: tnarik on Flickr<http://www.flickr.com/photos/tnarik/442589894/>
Find the Default Username and Password

Before resetting your router to its default settings, you should first try using the default username and password to log in. You'll need these anyway if you plan on resetting the router to its factory default settings. There are several ways to find this information:

- Read your router's manual. Different models of routers – even ones from the same manufacturer – often have different username and password combinations. To locate the default username and password for the router, look in its manual. (If you've lost the manual, you can often find it by searching for your router's model number and "manual" on Google. Or just search for your router's model and "default password".)
- Look for a sticker on the router itself. Some routers – particularly ones that may have come from your Internet service provider – ship with unique passwords. These passwords may sometimes be printed on a sticker on the router itself.

- Try a common username and password combination. Many routers use the password “admin” (don’t type the quotes) and a blank username, a blank password and “admin” as the username, or “admin” as both the password and username. You can find a fairly comprehensive list of default usernames and passwords for various routers onRouterPasswords.com<http://www.routerpasswords.com/>
.

Try to log in with the default credentials after finding them – it’s possible the router was already reset or someone never changed its password. If they don’t work, continue to the next section – you’ll need the default credentials after resetting the router.
Reset the Router to Factory Defaults

Routers come with a button you can press to reset the router to its default factory settings. This resets any configuration changes you’ve made to the router – forwarded ports, network settings, parental controls, and custom passwords will all be wiped away. You’ll be able to access the router with its default username and password, but you may have to spend some time configuring the router again, depending on how many changes you made to its configuration.

The exact process (and location of the reset button) will vary from router to router. For best results, you should consult your router’s manual for any model-specific instructions. However, the process is generally very similar on most routers.

First, look at the back (or perhaps the bottom) of the router. You’ll see a special button labeled Reset. This button is often located in a depressed hole, known as a “pinhole,” so you can’t accidentally press it.

To reset the router, you’ll generally need to press this button and hold it down for about 10 seconds. After you release the button, the router will reset itself to the factory default settings and reboot. If the button is located in a pinhole, you’ll need to use a bent paperclip or another long, narrow object to press and hold it.

Once you’ve pressed the button down for long enough, you can log into the router with its default username and password.

How to Forward Ports Without Knowing the Password

Do you just want to open the router’s web interface and forward ports for a server, game, or other type of networked program<http://www.howtogeek.com/66214/how-to-forward-ports-on-your-router/>?
If so, you don’t necessarily even have to know the password. This trick is also useful if you’re using someone else’s network and don’t have access to the password.

This works because many routers support Universal Plug and Play (UPnP), which allows programs on your computer to “ask” the router to open ports for them. If UPnP is enabled on the router, it will automatically open the port.

If a program supports this option, you’ll generally find it in its connection settings alongside the port configuration. NAT-PMP, which you may also see, is a similar way of automatically forwarding ports that fewer routers support.

If you use a program that doesn’t include integrated support for UPnP, never fear – you can use a program like UPnP PortMapper to quickly forward ports from a desktop application<http://www.howtogeek.com/122227/how-to-quickly-forward-ports-on-your-router-from-a-desktop-application/>.
You can forward any ports you like.

Once you’ve reset the router’s settings, you can log in with the default username and password and change its password from its web interface.

East Valley Repeater Group
Monday December 24, 2012
8:00 pm - 9:00 pm
Location: 449.825 (-) PL 100

Notes:
We are a group of Amatuer Operators that have formed this group to provide emergency communications for two East valley hospitals. The two hospitals are the Chandler Regional Hospital located at 475 S. Dobson Rd. and the Mercy Gilbert Hospital located at 3555 S. Val Vista Dr.
Our home repeater is located in Gilbert AZ on the Mercy Gilbert hospital with a coordinated frequency of 449.825 with a 100.0 PL and a minus offset. A repeater on the Chandler Regional hospital is in the works and when ready will become our back-up frequency.
Everyone is welcome to join our net on Monday night at 8:00 P.M. on the 449.825 repeater.

Arizona Emergency Net - Maricopa
Monday December 24, 2012
9:00 pm - 10:00 pm
Location: 147.24 ( ) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes:
AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

Folks,

There seems to be some new activity these days regarding Ransomware invasion of Windows based PCs.

If your PC or laptop is affected, follow the guidelines in this article:

http://www.computerworld.com/s/article/9235040/Ransomware_scammers_push_panic_button_with_bogus_claims

Then, download this program and follow instructions on the affected computer:

http://security.symantec.com/nbrt/npe.aspx?lcid=1033

This is the best known (proven) fix for Ransomware and it is free.

Regards,

Joe, N2QOJ

Folks,

For those of you interested in spotting the ISS, it will be visible *tonight
* for (3) minutes at a good elevation of 47 degrees. That's about midway
between the horizon and straight up.

This information is valid if you are observing from the Phoenix valley area.

Here are the details:

*SpotTheStation! Time: Sat Dec 29 7:17 PM, Visible: 3 min, Max Height: 47
degrees, Appears: WNW (292 degrees), Disappears: SW (225 degrees)*

I've also attached an illustration that will help you determine how to use
this information.

You can watch and track the station in advance at this link:

http://spaceflight.nasa.gov/realdata/tracking/index.html

1954. Upcoming Hamfests in Arizona

Yahoo group: Queen_Creek_Hams
Date: 2012-12-29 20:10:00 UTC
From: Joe Sammartino
Topic: 1954 Message: 1954

For the new hams.....What is a Hamfest?
*
*
Reprinted from "Ham Radios for Dummies", Page 44:

"Hamfests are ham radio flea markets. The primary sellers are individuals vending treasures from a folding table or a tailgate. You may even find some commercial vendors. Some hamfests are very small and last only a few hours, while a few attract thousands over several days. Hamfests may be held indoors
or outdoors.

A ham radio convention has a much broader slate of activities than a hamfest;
it may include seminars, speakers, licensing test sessions, and commercial vendors. Conventions often include a swap meet along with the rest of the functions. Conventions often have a theme, such as emergency operations, QRP or low-power operating, or digital radio transmissions, to name a few."

1960. Hamfest Tips from N2QOJ

Yahoo group: Queen_Creek_Hams
Date: 2012-12-31 07:29:00 UTC
From: Joe Sammartino
Topic: 1960 Message: 1960
Attachments: 1 described; binary payloads are missing from this source WARC

Hi Folks,

If you plan on attending your first hamfest, try to go with someone who has experience.

In either case, alone or with experienced hams, the following tips from "*Ham Radio for Dummies <http://www.arrl.org/shop/Ham-Radio-for-Dummies>*" are excellent.

I promise you will enjoy your first hamfest and all subsequent hamfests for life!

Here's a couple of tips from me first:

*Important: * If you are looking for antenna adapters, adapter pigtails, etc., look for the RFSTUFF.com<http://rfstuff.com/store/comersus_listCategories.asp>vendor from Congress AZ. They have very reasonable prices. Their website stinks. It used to be great but they are changing over to a new web site format and I don't like it. They have much more than is listed on the website.

*Important: * If you are looking for good COAX antenna line for you base or mobile needs, look for WIREDCO.com vendor from Scottsdale AZ. Great prices on pre-cut lengths of RG-8X coax with already installed PL-259 connectors. They also have great selection and pricing on connectors, audio cables, and a lot of other stuff. Their website is very good. They sell via Internet and also have an eBay storefront<http://stores.ebay.com/Wired-Communications>
.

These two vendors are usually at all the local hamfests. WiredCo also attends the Boy Scout Electronics Swap Meet and Recycling Event every 3rd Sunday at Scottsdale Pavilion. Check out http://electronicfest.com/. I've attended many times just to re-stock on audio cables, connectors, and coax. Map: http://tinyurl.com/cocky2s.

I'll also created a PDF file of this message and place it in the "Files" section of our online Group.

Regards,

Joe, N2QOJ

==========

Hamfest Tips:

After you have a hamfest in your sights, set your alarm for early Saturday morning (most are Saturday-only events) and get ready to be there at the opening bell. Be sure to bring the following things:

* An admission ticket: *You need a ticket, sold at the gate or by advance order through a Web site or e-mail.

Money: Take cash, because most vendors do not take checks or credit cards.

* Something to carry your purchases in:* Take along a sturdy cloth sack, backpack, or other bag that can tolerate somewhat grimy, dusty electronic devices.

A hand-held or mobile rig: Most hamfests have a talk-in frequency, which is almost always a VHF or UHF repeater. If you’re unfamiliar with the area, you can get directions while en route.

If you go with a friend and both of you take hand-held radios, you can share tips about the stuff you find while walking the aisles.

*Water and food: * Don’t count on food being available, but the larger hamfests
almost always have a hamburger stand. Rarely is gourmet food on hand, but expect the same level of quality as that of the concession stands at a ballgame. Taking along a full water bottle is a good idea.

Buying at Hamfests

After parking, waiting, and shuffling along in line, you finally make it inside
the gates. You’re ready to bargain! All hamfests are different, but here are some guidelines to live by, particularly as a novice hamfest customer:

If you’re new to ham radio, buddy up with a more experienced ham to steer you around hamfest pitfalls.

Most prices are negotiable; more so after lunch, but a good deal goes quickly. Most vendors are not interested in trades, but you do no harm by offering.

Hamfests are good places to buy accessories for your radio, often selling for a fraction of the manufacturer’s price if separate from the radio.

Commercial vendors of new batteries often have good deals on spare battery packs.

Many hamfests now have electricity available so that vendors can demonstrate equipment. If a vendor refuses to demonstrate a supposedly functional piece of gear, or won’t open up a piece of equipment for inspection, you may want to move along.

Unless you really know what you are doing, avoid antique radios. They often have quirks that can make using them a pain or require impossible-to-get repair parts.

Be familiar with the smell of burnt or overheated electronics, especially transformers and sealed components. Direct replacements may be difficult to obtain.

Don’t be afraid to ask what something is. Most of the time, the ham behind the table enjoys telling you and, even if you don’t buy it, the discussion may attract a buyer.

If you know exactly what you are looking for, check the auction Web sites and radio swap sites, such as www.eham.net, www.qrz.com, and www.arrl.org/RadiosOnline/, before you attend the hamfest. You can get an idea of the going price and average condition, so you’re less likely to get gouged.

Other activities at Hamfests
*
*
Along with buying and selling, many hamfests also have programs and speakers and even license exam sessions, like small conventions. Look for a flyer or check the hamfest Web site for information about special services that may be available.

Arizona Emergency Net - Maricopa
Monday January 7, 2013
9:00 pm - 10:00 pm
Location: 147.24 ( ) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes:
AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

1966. International Space Station, it will be visible tomorrow morning for (6) minutes

Yahoo group: Queen_Creek_Hams
Date: 2013-01-09 04:24:01 UTC
From: Joe Sammartino
Topic: 1966 Message: 1966
Attachments: 1 described; binary payloads are missing from this source WARC

Folks,

For those of you interested in spotting the *International Space Station*, it will be visible *tomorrow morning *for (6) minutes at a good elevation of 69 degrees. That elevation should provide for excellent viewing, barring any clouds.

This information is valid if you are observing from the Phoenix valley area.

Here are the details:

SpotTheStation! Time: Wed Jan 09 6:47 AM, Visible: 6 min, Max Height: 69 degrees, Appears: SW (225 degrees), Disappears: NE (045 dgrees)

I've also attached an illustration that will help you determine how to use this information.

You can watch and track the station in advance at this link:

http://spaceflight.nasa.gov/realdata/tracking/index.html

Regards,

Joe, N2QOJ

1974. Yahoo Groups Maintenance

Yahoo group: Queen_Creek_Hams
Date: 2013-01-15 04:03:15 UTC
From: Joe Sammartino
Topic: 1974 Message: 1974

Folks,

Yahoo has announced some downtime coming up for YAHOO Groups:

"We're upgrading our systems and Yahoo! Groups will be unavailable for a few hours on the night of January 15th Pacific Standard Time. Emails sent to your groups will be delivered late during this time. For the latest information on this planned maintenance, check our product blog: http://www.ygroupsblog.com/"

Please make note of this event.

Thanks,

Joe, Group Owner/Moderator

Boy Scouts Electronic Swap Meet and Recycling
Sunday January 20, 2013
6:00 am - 10:30 am
Location: Scottsdale Pavilions, 9069 east indian bend Road, Scottsdale, AZ

Notes:
Electronicfest is an electronics recycling event and computer swap meet. It was started more than 25 years ago by the boy scouts and their leaders from Troop 446, chartered by Our Lady of Perpetual Help Church in Scottsdale, Arizona.

The Electronicfest is held the 3rd Sunday morning of every month (come rain or shine), from 5:30am to 10:30am, in Scottsdale, Arizona in the 5 & Diner parking lot of the Scottsdale Pavilions Shopping Center (9062 East Indian Bend Road, Scottsdale). Map: http://tinyurl.com/cocky2s .

Proceeds raised at this event help Boy Scouts earn their way to camp, and pay for scouting program.

Welcome to our newest member, Paul, KJ6EZR of San Tan Valley!
Enjoy the Group. Check out our Calendar page for a comprehensive
listing of local nets.
Please feel free to join our Queen Creek Emergency Communications Group
net tonight at 9 PM. It is an open net and we welcome visitors.
449.325 (-) PL 100 Hz at 21:00 local time.
We meet for breakfast on the second Saturday of the month at about 8 AM
at the Flight Deck Cafe located at the Administration building of
Phoenix Mesa Gateway Airport.
See the calendar for details.
Regards,
Joe, N2QOJ

1980. Thanks for the welcome!

I look forward to participating in the group activities, as well as furthering my knowledge of Amateur Radio through the members here. I will be listening in to Sunday night's net. Until I can put up an outdoor antenna, I can only use my HT. Because of that, I can only hit the repeater by standing in the front yard on one leg, and the return is quite weak! Hope you all have a good night!

Hi Paul,

Remember, you can also access the repeater via EchoLink. Just fire up EchoLink on your PC, iPhone, or Android device and access N2QOJ-R, node number 185734. That will work just fine.

And you can listen in only if you like on the 24/7 streaming via PC at:

http://www.radioreference.com/apps/audio/?action=wp&feedId=10544

Hope to hear you on soon.

Regards,

Joe, N2QOJ

1984. Arizona Emergency Net - Maricopa, 1/21/2013, 9:00 pm

Yahoo group: Queen_Creek_Hams
Date: 2013-01-21 16:01:09 UTC
From: Queen_Creek_Hams@yahoogroups.com
Topic: 1984 Message: 1984

Reminder from: Queen_Creek_Hams Yahoo! Group
http://groups.yahoo.com/group/Queen_Creek_Hams/cal

Arizona Emergency Net - Maricopa
Monday January 21, 2013
9:00 pm - 10:00 pm
Location: 147.24 ( ) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes:
AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

Thanks Joe. I recently added the app to my phone, got the access approved, but have yet to give it a try. Have you tried it yourself using an Android device?

thanks!

1986. Buying Ham Gear Online

Yahoo group: Queen_Creek_Hams
Date: 2013-01-24 23:10:33 UTC
From: pvk_kj6ezr
Topic: 1986 Message: 1986

I have slowly but surely been busy gathering enough gear to set up a home base using an FT-8800R that I won at a Ham breakfast a while back. One of the items I am looking for is a switchable power supply. I just happened to be browsing on ebay last night, and came across quite a selection of gear, including a decently priced supply. What are your feelings regarding ebay and other online sites for purchasing...site unseen....used Ham equipment, and what experiences, good or bad, have you had by doing so?

Thanks!

Paul,

Several of us use the echo link node that Joe manages. It's quite reliable and very useful.

Give it a try.

Cheers,
Bruce

The 30 amp switcher at Powerwerx.com is great. We use them in the repeater and as base station power supplies. Dennis, KF7RYX, has had great success locally with Craig's List.

For eBay, make sure you check out the seller completely. Even then, I would be make sure it has some kind of return policy. I only buy new stuff from eBay.

Regards,

Joe

I have had great luck on Craigslist. The last this I got was a Ft-8800 built into a power supply, a FT-2500, and diamond x50 new in package for $250.00. Otherwise the swapnet has had some good things.

Yeah, if you see a deal like that again Casey, call me immediately! I've not found an FT-8800 for under $320, just for the radio.

Thanks for the great input on buying gear. I was looking at the Powerwerx site last night, and the equipment looks like it would suit my needs. I have looked at Craigslist, but there doesn't seem to much available, at least on the east side of the valley. On the other hand, Ebay seems to have quite a bit of both new and used gear, and I too have had no issues with ordering and successfully receiving good merchandise. Kenn, who is just a minute or two from me, has described his set up. I'll have to swing by for a look see soon.

Paul & Group,

About Craigs List - you must be diligent and check EVERY day for listings.
It's the only way to not miss anything.

Good deals go within minutes to hours of posting.

Regards,

Joe, N2QOJ

1998. EchoLink Node update

Yahoo group: Queen_Creek_Hams
Date: 2013-01-27 19:58:45 UTC
From: Joe Sammartino
Topic: 1998 Message: 1998

Hello Folks,

Users of the N2QOJ-R EchoLink node, which is linked to the Ocotillo Repeater at 449.325 Mhz, will notice a new feature.

If you connect via PC, MAC, smart phone, or tablet, you will now here an audio message confirming your connection upon a successful connection attempt.

The message is not transmitted via the Repeater - only the connected party via EchoLink will hear it.

Regards,

Joe, N2QOJ

Location: 147.24 ( ) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes:
AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

Topic: 2006 Message: 2006

Welcome to our newest member, Rodney, KJ7MV, who stopped to visit us at Dennis's RITP station on Saturday.
Enjoy the Group. Check out our Calendar page for a comprehensive listing of local nets.
Our local repeaters:
Ocotillo Repeater - 449.325 (-) PL 100 Hz - Large RF footprint, valley wide
QC Repeater - 449.475 (-) PL 136.5 Hz - Local to Queen Creek area
We meet for breakfast on the second Saturday of the month at about 8 AM at the Flight Deck Cafe located at the Administration building of Phoenix Mesa Gateway Airport.
See the Group calendar for details.
Regards,
Joe, N2QOJ

East Valley Repeater Group
Monday February 4, 2013
8:00 pm - 9:00 pm
(GMT-07.00) Mountain Time (US & Canada)
Location: 449.825 (-) PL 100

Notes:
We are a group of Amatuer Operators that have formed this group to provide emergency communications for two East valley hospitals. The two hospitals are the Chandler Regional Hospital located at 475 S. Dobson Rd. and the Mercy Gilbert Hospital located at 3555 S. Val Vista Dr.
Our home repeater is located in Gilbert AZ on the Mercy Gilbert hospital with a coordinated frequency of 449.825 with a 100.0 PL and a minus offset. A repeater on the Chandler Regional hospital is in the works and when ready will become our back-up frequency.
Everyone is welcome to join our net on Monday night at 8:00 P.M. on the 449.825 repeater.

Congrats to two new hams in our area for making their first respective HF contact with N2QOJ as control operator and KF7E as QSO contact.

The contact was made on 40 meters at 7.178 MHz, in LSB.

The station was KF7RYX's new Yaesu FT-857D at Radios in the Park on Saturday, 2-2-2013.

2019. Spot The International Space Station Tonight at 7:20 PM

Yahoo group: Queen_Creek_Hams
Date: 2013-02-06 17:47:36 UTC
From: Joe Sammartino
Topic: 2019 Message: 2019
Attachments: 1 described; binary payloads are missing from this source WARC

Folks,

For those of you interested in spotting the *International Space Station*, it will be visible *this evening *for (3) minutes at an elevation of 54 degrees. That elevation should provide for good viewing, barring any clouds.

This information is valid if you are observing from the Phoenix valley area.

Here are the details:

*Time: Wed Feb 06 7:20 PM, Visible: 3 min, Max Height: 54 degrees, Appears: SSW (203 degrees), Disappears: ESE (113 degrees)
*

I've also attached an illustration that will help you determine how to use this information.

You can watch and track the station in advance at this link:

http://spaceflight.nasa.gov/realdata/tracking/index.html

Regards,

Joe, N2QOJ

2020. Hamfest

Yahoo group: Queen_Creek_Hams
Date: 2013-02-06 20:59:21 UTC
From: Tom
Topic: 1545 Message: 2020

Hi Everyone,

Welcome to the new folks.

Is anyone going to the Hamfest that I could tag along with and get some advise? I'd like to buy a mobile rig for car and carry and could use some help on make, models and more important dealing with the sellers. I've never been to one.

Please let me know.....Thank, Tom (KF7SYE)

PS: For anyone studying at any level for testing Five-by-Five software on a smart phone can't be beat. Email me if you want more info or want to see it work on my phone / tablet.

From: Joe
Topic: 1545 Message: 2021

Tom,
Do your homework before the ham fest. You can research popular mobile radio alternatives in advance so you are prepared on both specs and pricing.
Modern Dual Band radios - Yaesu FT-8800, FT-8900, etc. Kenwood TM-D700A, TM-D710, TM-V71A, and others. All of the major manufacturers list these models plus, recently discontinued models, on their respective web sites.
Do you want:
- single band, dual band, or dual band with cross band repeat capability
- what do you want to spend
- are you planning on incorporating other features in the future - APRS, accessing linked systems, IRLP/EchoLink
- will this radio also be used as a base radio?
- do you want a radio with a detachable head to remote it from the main unit (most do that now)?
Those are just a few questions to consider. But don't wait for Saturday to start researching. It will be too much information to process in real time on Saturday.
As for tagging along, there are plenty of folks that have said they are attending but at all different time windows. I believe some have discussed using 146.500 as the local talk-in for the QC area folks that attend.
Don't forget the additional ham fest tips document that I posted to the Group a few weeks ago:
http://groups.yahoo.com/group/Queen_Creek_Hams/files/Hamfests/
<http://groups.yahoo.com/group/Queen_Creek_Hams/files/Hamfests/>

Hi Joe

I had downloaded your tips and already kinda new the radios but to make it short I got a ft8900 today with a 70 dollar rebate and free remote mount kit. Also picked up the reprogramming cable so I can take full advantage of it the easy way.

See, you didn't need any advice after all.

Good luck with your new quad bander!

Joe, N2QOJ

I assume this is canceled in favor of the HamFest.

Doug was saying we might try to meet for lunch, those who still have money
by then. I guess we'll find each other on 146.5.

Cheers,
Bruce

No, I don't think so. The turn out may be low to none, but not all folks
can make it to the ham fest.

2032. Arizona Emergency Net - Maricopa, 2/11/2013, 9:00 pm

Yahoo group: Queen_Creek_Hams
Date: 2013-02-11 16:01:20 UTC
From: Queen_Creek_Hams@yahoogroups.com
Topic: 2032 Message: 2032

Reminder from: Queen_Creek_Hams Yahoo! Group
http://groups.yahoo.com/group/Queen_Creek_Hams/cal

Arizona Emergency Net - Maricopa
Monday February 11, 2013
9:00 pm - 10:00 pm
(GMT-07.00) Mountain Time (US & Canada)
Location: 147.24 ( ) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes:
AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

Boy Scouts Electronic Swap Meet and Recycling
Sunday February 17, 2013
6:00 am - 10:30 am
(GMT-07.00) Mountain Time (US & Canada)
Location: Scottsdale Pavilions, 9069 east indian bend Road, Scottsdale, AZ

Notes:
Electronicfest is an electronics recycling event and computer swap meet. It was started more than 25 years ago by the boy scouts and their leaders from Troop 446, chartered by Our Lady of Perpetual Help Church in Scottsdale, Arizona.

The Electronicfest is held the 3rd Sunday morning of every month (come rain or shine), from 5:30am to 10:30am, in Scottsdale, Arizona in the 5 & Diner parking lot of the Scottsdale Pavilions Shopping Center (9062 East Indian Bend Road, Scottsdale). Map: http://tinyurl.com/cocky2s .

Proceeds raised at this event help Boy Scouts earn their way to camp, and pay for scouting program.

2036. Malicious interference on Ocotillo Repeater

Yahoo group: Queen_Creek_Hams
Date: 2013-02-16 19:59:21 UTC
From: Joe Sammartino
Topic: 2036 Message: 2036

Folks,

We have some kid on the Ocotillo repeater today who is trying to disrupt conversations.

It is what we hams call "malicious interference".

This is the protocol for dealing with malicious interference:

- never acknowledge it
- never try to communicate with them
- carry on your normal QSO, if you cannot, simply ask your QSO partner to move to another repeater, or end your QSO. BUT NEVER ACKNOWLEDGE THE INTERFERENCE
- Do not discuss the interference with other hams on the air
- IGNORE IT, it will be tracked down and dealt with
- if you hear open carrier, kerchunking, noises, sound effects - IGNORE IT

My guess is that some kid has gotten his hands on a relative's radio or friend's radio. They are intentionally making comments directed at the content of the conversations they are listening to. So, they are not innocently creating this interference. It is intentional.

I am recording this activity and I can also generate an RF fingerprint for analysis and comparison to known users of the repeater.

Regards,

Joe, N2QOJ

2038. Arizona Emergency Net - Maricopa, 2/18/2013, 9:00 pm

Yahoo group: Queen_Creek_Hams
Date: 2013-02-18 16:01:14 UTC
From: Queen_Creek_Hams@yahoogroups.com
Topic: 2038 Message: 2038

Reminder from: Queen_Creek_Hams Yahoo! Group
http://groups.yahoo.com/group/Queen_Creek_Hams/cal

Arizona Emergency Net - Maricopa
Monday February 18, 2013
9:00 pm - 10:00 pm
(GMT-07.00) Mountain Time (US & Canada)
Location: 147.24 ( ) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes:
AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

2039. TNC

Yahoo group: Queen_Creek_Hams
Date: 2013-02-20 02:32:51 UTC
From: ScottM
Topic: 2039 Message: 2039

Hi Guys, I am looking for a VHF Packet TNC. Don't really want to buy a new one as the last time I tried Packet (1995)I lived so ar out I had problems just trying to stay connected to anyone. So needless to say I boxed everything up and sold it. Don't know if I will like it or not but thought I'd give it another try.

Thanks, Scott

In case you would like to try packet without the hardware TNC, there are two software TNC options today: 1 - http://www.soundcardpacket.org/ - The AGWPE packet engine is a sound card based solution and is widely used. Most, if not all, ham applications for TNCs support AGWPE, including APRS client programs. 2 - http://uz7ho.org.ua/packetradio.htm - UZ7HO has developed an alternative software TNC that is a drop in replacement for AGWPE. It can actually support to modem ports at once and gets great reviews. Regards, Joe, N2QOJ

2048. 6m Range

Yahoo group: Queen_Creek_Hams
Date: 2013-02-24 22:38:59 UTC
From: Tom
Topic: 2048 Message: 2048

I know some people were looking at the FT-8900 but were not sure about 6 and 10m being useful. There are 2 repeaters one on White Tanks and 1 on Pinal Peak that saturate the entire area from White Tanks all the way into Mountains on the east and while past Florance to the south and Cave Creek to the north....just from two repeaters and the signal strength is extremely strong through the whole area.

I uploaded 3 files that can be opened in Google Earth showing what a low power mobile in your car or used at home with a higher antenna. You basically dont need a repeater. A antenna at 6 feet (on my car) pushing 10-18 watts covers the entire San Tan Valley area and much farther at a lower but still usable signal strength. Check out the files. You can zoom in / out change viewing angles, extra. The FT-8900 for example can pick up any signal in the blue area which is about - 100dbm.

This would be a geat freq for daily use or as a backupin a emerg if there was a problem with the repeaters.

From: Tom
Topic: 2049 Message: 2049

http://www.hamexam.com/

Great when used on a phone or tablet. Can study anywhere when you have a few minutes and the software automatically keeps track of your weak areas and adjusts as you learn so you are just studying what you need to. Highly recomended!!

Folks,

For those of you interested in spotting the *International Space Station*, it will be visible tonight* *for (4) minutes at a good elevation of 43 degrees. That elevation should provide for good viewing, barring any clouds.

This information is valid if you are observing from the Phoenix valley area.

Here are the details:

SpotTheStation! Time: Mon Feb 25 7:27 PM, Visible: 4 min, Max Height: 43 degrees, Appears: NNW (337 degrees), Disappears: ENE (68 degrees)

I've also attached an illustration that will help you determine how to use this information.

You can watch and track the station in advance at this link:

http://spaceflight.nasa.gov/realdata/tracking/index.html

Also HEAR it, on packet. Take your HT and listen to 145.825 for the packet BBS. You may hear it before you can see it.

Occasionally voice can be heard on 145.800, and rarely (during resupply missions) there is voice (mostly in Russian) on 143.625 using relay sites at either Edwards AFB or White Sands, NM.

Great advice!

Holding your HT so your antenna is parallel to the ground may yield a
better received signal. Give it a try!

2056. [Queen_Creek_Hams] San Tan Valley ham

Yahoo group: Queen_Creek_Hams
Date: 2013-02-27 14:18:27 UTC
From: Jim Henderson
Topic: 2056 Message: 2056

Does anyone know (or know of) a ham Bernard Rettzo, K7BJR? His QRZ.CON address says Chandler, but another source gives Agrarian Hills Drive in San Tan Valley.

I am not sure if he is on HF or VHF, perhaps has moved or has become a Silent Key.

Jim, KF7E

I don't know him but he appears to be a pilot:
http://aircraft-registration.findthedata.org/l/347939/9230M
<http://aircraft-registration.findthedata.org/l/347939/9230M>
I did not find any obits for him.
He also bought another home in Chandler in 2012:
http://phoenix.blockshopper.com/sales/subdivisions/colonia_coronita/prop\
erty/30301758/214_s_eucalyptus_place/1122164
<http://phoenix.blockshopper.com/sales/subdivisions/colonia_coronita/pro\
perty/30301758/214_s_eucalyptus_place/1122164>
Imagine what I can find if I spend some more time digging around the
Net!!!!

I also noticed on ULS that it was updated in 2008 but his QRZ.COM was
Last Update 2013-01-28 19:42:44 and that one is listing the Chandler
address.
BTW, don't do anything wrong! Joe and I will find you!! [:D]

Here is some information that I have complied regarding the frequencies used by the International Space Station - Joe, N2QOJ

From KF7E:

Also HEAR it, on packet. Take your HT and listen to 145.825 for the packet BBS. You may hear it before you can see it.
Occasionally voice can be heard on 145.800, and rarely (during resupply missions).
There is voice (mostly in Russian) on 143.625 using relay sites at either Edwards AFB or White Sands, NM. From N2QOJ:
Here is the entire list of ISS frequencies:

Amateur Radio Frequencies (Note: Only one mode active at a time)

FM VOICE for ITU Region 1: Europe-Middle East-Africa-North Asia

* Downlink 145.800
* Uplink 145.200

FM VOICE for ITU Region 2&3: North and South America-Caribbean-Greenland-Australia-South Asia

* Downlink 145.800
* Uplink 144.490

FM U/v VOICE Repeater (Worldwide)

* Downlink 145.800
* Uplink 437.800

FM V/u with PL VOICE Repeater (Worldwide)

* Downlink 437.800
* Uplink 145.990 with 67.0 PL

FM L/v VOICE Repeater (Worldwide)

* Downlink 145.800
* Uplink 1269.650

AX.25 1200 Bd AFSK Packet Radio (Worldwide)

* Downlink 145.825
* Uplink 145.825

FM SSTV downlink (Worldwide)

* Downlink 145.800

UHF Simplex (rarely used)

* Downlink 437.550
* Uplink 437.550

Other Frequencies

121.125 FMRS EVA from Orlan suit [Credit N5VHO]

121.75 FMDownlink from Soyuz-TM (voice). RS EVA from Orlan suit. Soyuz VHF-2. Progress Telemetry. [Credit N5VHO]

130.167 AMVHF-2 Downlink from Zarya (Service Module). RS EVA to Orlan suits [Credit N5VHO]

143.625 FMVHF-1 downlink. Main Russian communications channel. Often active over Moskow. You can hear air to ground conversations in Russian. Sometimes English when US crews talk to their NASA representative in Star City. [Credit IZ6BYY]

166.000 AMSoyuz-TM and Progress M-1 telemetry This Frequency has not been confirmed yet. Please contribute and post your report as comment

From: Kenn Burnell
Topic: 2056 Message: 2061

Is that Bernard J. Rettzo? ~68 years old? AKA Bernardo J. Rettzo &
Bernard Joseph Rettzo?

San Tan Valley isn't that large a place. What's his full address down here
supposed to be?

I see where he was/is living in Chandler. He was possibly formally living
in Mesa and, before that, various places in CA; and, maybe in PA. But, San
Tan Valley? Dunnow ...

Ref:
http://www.intelius.com/results.php?ReportType=1&formname=name&qf=Bernard+&qmi=&qn=Rettzo&
qcs=San+Tan+Valley%2C+az&focusfirst=1

http://dexknows.whitepages.com/name/Bernard-Rettzo/Chandler-AZ

You're right Paul. Noon at the Chik-fil-a on Power just south of the 202. Talk in on the Ocotillo repeater. Look for the nerdy looking guys holding HT's and wearing baseball caps with call signs on them.

Cheers,
Bruce

http://groups.yahoo.com/group/Queen_Creek_Hams/cal

East Valley Repeater Group
Monday March 4, 2013
8:00 pm - 9:00 pm
(GMT-07.00) Mountain Time (US & Canada)
Location: 449.825 (-) PL 100

Notes:
We are a group of Amatuer Operators that have formed this group to provide emergency communications for two East valley hospitals. The two hospitals are the Chandler Regional Hospital located at 475 S. Dobson Rd. and the Mercy Gilbert Hospital located at 3555 S. Val Vista Dr.
Our home repeater is located in Gilbert AZ on the Mercy Gilbert hospital with a coordinated frequency of 449.825 with a 100.0 PL and a minus offset. A repeater on the Chandler Regional hospital is in the works and when ready will become our back-up frequency.
Everyone is welcome to join our net on Monday night at 8:00 P.M. on the 449.825 repeater.
Ron, 480-510-3025 cell or AJ7T@ cox.net. http://http://eastvalleyrg.ning.com/

From: Queen_Creek_Hams@yahoogroups.com
Topic: 2074 Message: 2074

Reminder from: Queen_Creek_Hams Yahoo! Group
http://groups.yahoo.com/group/Queen_Creek_Hams/cal

Arizona Emergency Net - Maricopa
Monday March 4, 2013
9:00 pm - 10:00 pm
(GMT-07.00) Mountain Time (US & Canada)
Location: 147.24 ( ) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes:
AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

Thank all for the welcome. I'm still trying to figure out frequencies and antennas like many no antennas allowed. I have heard a couple of repeaters so with the new information from the group will see what I can do.

That link doesn't seem to function correctly....

Just go to the Photos section of the online Group or copy and paste the
link into your browser.

Hi Norm and Group -

Keep breakfast in mind....

Dennis and I traveled together to the Superstition ARC last month, arrived at opening and were back at the Flight Deck Cafe for breakfast by 8:30 AM!

Of course, if the ham fest was better attended by sellers and dealers, we probably would have spent more time there.

Good luck with the MARCA effort,

Joe, N2QOJ

Folks,

The QC Repeater and the EchoLink node for the Ocotillo Repeater are down until the storm passes.

Antennas have been disconnected. If you are using base stations with topside antennas, you should disconnect antennas from radios and ground the antenna connector.

Regards,

Joe, N2QOJ

2088. John Elwood, WW7P, and his XYL, Edith join us for breakfast at Flight Deck Cafe

Yahoo group: Queen_Creek_Hams
Date: 2013-03-11 01:09:07 UTC
From: Joe
Topic: 2088 Message: 2088

Folks,
You never know who might show up at one of our QCARC breakfasts!
We were honored to have John Elwood, WW7P, and his XYL, Edith, join us for breakfast at Flight Deck Cafe.
John is well known in the ham world for his expert knowledge and scholarly dating of Vibroplex Code Keys.
Vibroplex has been making telegraph and radio code keyers as early as 1904 with the earliest patent around 1902.
Vibroplex supplied products to the telegraphy market, amateur operators and military agencies since the early 1900's and they are still in business!
Obviously, many of these have become highly collectible. Records were not maintained very well and most of the information of early models were lost.
John, WW7P, took on the very difficult task of dating the complete product offerings since inception. He researched over 3,000 items and published his findings as an article entitiled, "Dating Your Vibroplex Key". You can find it at the Vibroplex website:
http://vibroplex.com/date_your_vibroplex.html
<http://vibroplex.com/date_your_vibroplex.html>
For the history of Vibroplex and some additional information, please visit the Vibroplex website at:
http://vibroplex.com/ <http://vibroplex.com/>
Jim, KF7E, whom most of you know to be an expert CW operator, took the opportunity to present John his QSL card at breakfast. I was lucky to get a couple of photos of this exchange. You can find them at the online YAHOO Group at:
http://groups.yahoo.com/group/Queen_Creek_Hams/photos/album/1422459201/p\
ic/list
<http://groups.yahoo.com/group/Queen_Creek_Hams/photos/album/1422459201/\
pic/list>
Thanks to all who come to breakfast....we always have a great time.
Regards,
Joe, N2QOJ

East Valley Repeater Group
Monday March 11, 2013
8:00 pm - 9:00 pm
(GMT-07.00) Mountain Time (US & Canada)
Location: 449.825 (-) PL 100

Notes:
We are a group of Amatuer Operators that have formed this group to provide emergency communications for two East valley hospitals. The two hospitals are the Chandler Regional Hospital located at 475 S. Dobson Rd. and the Mercy Gilbert Hospital located at 3555 S. Val Vista Dr.
Our home repeater is located in Gilbert AZ on the Mercy Gilbert hospital with a coordinated frequency of 449.825 with a 100.0 PL and a minus offset. A repeater on the Chandler Regional hospital is in the works and when ready will become our back-up frequency.
Everyone is welcome to join our net on Monday night at 8:00 P.M. on the 449.825 repeater.

Topic: 2091 Message: 2091

Reminder from: Queen_Creek_Hams Yahoo! Group
http://groups.yahoo.com/group/Queen_Creek_Hams/cal

Arizona Emergency Net - Maricopa
Monday March 11, 2013
9:00 pm - 10:00 pm
(GMT-07.00) Mountain Time (US & Canada)
Location: 147.24 ( ) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes:
AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

2095. [Baofeng_uv5r] Drivers & Security - WARNING!

Yahoo group: Queen_Creek_Hams
Date: 2013-03-11 16:10:13 UTC
From: kenn_burnell
Topic: 2095 Message: 2095

From: baofeng_uv5r@yahoogroups.com [mailto:baofeng_uv5r@yahoogroups.com]
On Behalf Of James L Reeves
Sent: Sunday, March 10, 2013 10:27 AM
To: baofeng_uv5r@yahoogroups.com <mailto:baofeng_uv5r@yahoogroups.com>
Subject: [baofeng_uv5r] Drivers & Security

My purpose is not to anger anyone; it is to share a possible concern. (I
own
2 Baofeng radios.)

73, (best wishes)

James, KF4AQO

A Dangerous Bargain

Gary Geissler, a Colorado-based IT specialist and high-tech advisor to
Army
sends this caution about a dangerous bargain in the ham radio
marketplace.

The best buy these days in handheld transceivers are the ones from Hong
Kong. The HTs are being purchased by amateurs, public service providers,
and others in government organizations. Some versions have FCC and other
type acceptance.

The transceivers sell for a fraction of the price of comparable units
from
the big three yet can work all the amateur and public service
frequencies
from the civil aircraft band to the top of the public service UHF band.
They have many memories and features and can be programmed from a PC.
Powered by big lithium ion batteries (included) they are a steal for
$55.00.

Or so it would seem.

I work for Digital Globe Incorporated. As our corporation is an
important
government contractor we are working with the USG to resolve issued as
they
appear with regard to computer and Internet security. The software tools
we
use are among the strongest available anywhere (and as a result, the

most
intrusive and painful!)

So when I put the tiny driver CD that came with my [Chinese] handheld transceiver's programming cable into a machine to scan it I had no idea that
the disk would pull an immediate alert. The alert was so strong that I could not go any further and determine contents, files, names of virus, and
so forth.

The CD was given to our computer security department. They will process it
and forward the results to their USG contact. This is only the second time I
have seen an alert this strong. The other time (last week actually) was while downloading a .pdf research paper from a university researcher's site.

Lest anyone think otherwise, we are under attack. One might suspect that the "real" object of the exercise with regard to the very low cost of the
Hong Kong HTs is the unseen present on the CDs. I'm not a conspiracy theory
sort of guy; we can talk more about this at some point.

I might suggest a neutrally worded warning to destroy any driver CDs that
come with Hong Kong HTs; the Prolific USB/RS-232 drivers are available at no
charge from US sites and the public domain open source CHIRP software is more than adequate for programming the radios in any event.

Bottom line - take special care with ANY CD-ROM/software, purchased on eBay, that comes out of Asia!

73,

Kenn, WB7OSR

Subject: [Queen_Creek_Hams] John Elwood, WW7P, and his XYL, Edith join us for breakfast at Flight Deck Cafe

Folks,

You never know who might show up at one of our QCARC breakfasts!

We were honored to have John Elwood, WW7P, and his XYL, Edith, join us for breakfast at Flight Deck Cafe.

John is well known in the ham world for his expert knowledge and scholarly dating of Vibroplex Code Keys.

Vibroplex has been making telegraph and radio code keyers as early as 1904 with the earliest patent around 1902.

Vibroplex supplied products to the telegraphy market, amateur operators and military agencies since the early 1900's and they are still in business!

Obviously, many of these have become highly collectible. Records were not maintained very well and most of the information of early models were lost.

John, WW7P, took on the very difficult task of dating the complete product offerings since inception. He researched over 3,000 items and published his findings as an article entitiled, "Dating Your Vibroplex Key". You can find it at the Vibroplex website:

http://vibroplex.com/date_your_vibroplex.html

For the history of Vibroplex and some additional information, please visit the Vibroplex website at:

http://vibroplex.com/

Jim, KF7E, whom most of you know to be an expert CW operator, took the opportunity to present John his QSL card at breakfast. I was lucky to get a couple of photos of this exchange. You can find them at the online YAHOO Group at:

http://groups.yahoo.com/group/Queen_Creek_Hams/photos/album/1422459201/pic/list

Thanks to all who come to breakfast....we always have a great time.

Regards,

Joe, N2QOJ

Boy Scouts Electronic Swap Meet and Recycling
Sunday March 17, 2013
6:00 am - 10:30 am
(GMT-07.00) Mountain Time (US & Canada)
Location: Scottsdale Pavilions, 9069 east indian bend Road, Scottsdale, AZ

Notes:
Electronicfest is an electronics recycling event and computer swap meet. It was started more than 25 years ago by the boy scouts and their leaders from Troop 446, chartered by Our Lady of Perpetual Help Church in Scottsdale, Arizona.

The Electronicfest is held the 3rd Sunday morning of every month (come rain or shine), from 5:30am to 10:30am, in Scottsdale, Arizona in the 5 & Diner parking lot of the Scottsdale Pavilions Shopping Center (9062 East Indian Bend Road, Scottsdale). Map: http://tinyurl.com/cocky2s .

Proceeds raised at this event help Boy Scouts earn their way to camp, and pay for scouting program.

2103. CHEAP Baofeng UV-5R - U$D 36.69; and Amazon Reviews

Yahoo group: Queen_Creek_Hams
Date: 2013-03-17 19:41:56 UTC
From: kenn_burnell
Topic: 2103 Message: 2103

I am just throwing this out for Informationsal Purposes. I don't know anything about the vender - Sain Store, through Amazon. It is also not completely clear to me which model they are selling. It appears to be the "older" UV-5R.

http://www.amazon.com/BaoFeng-UV-5R-136-174-400-480Mhz-Transceiver/dp/B0\
07UYKG4E/ref=sr_1_6?s=electronics&ie=UTF8&qid=1363212226&sr=1-6&keywords\
=UV-5R
<http://www.amazon.com/BaoFeng-UV-5R-136-174-400-480Mhz-Transceiver/dp/B\
007UYKG4E/ref=sr_1_6?s=electronics&ie=UTF8&qid=1363212226&sr=1-6&keyword\
s=UV-5R>

Some of the newest black model UV-5Rs (with minor firmware updates to the Menu system) appear to be the UV-5RE and the UV-5R+ Plus (firmware is BFB-297).

The, radios are available in five colours from http://www.409shop.com/shop_displaynews.php?id=693&userid=100556 <http://www.409shop.com/shop_displaynews.php?id=693&userid=100556> I have heard good things about 409 Shop. Same goes for Amazon/Etekcity http://www.amazon.com/BaoFeng-136-174-400-480-Dual-Band-Transceiver/dp/B\
009MAXPBU/ref=sr_1_8?ie=UTF8&qid=1363548423&sr=8-8&keywords=Etekcity
<http://www.amazon.com/BaoFeng-136-174-400-480-Dual-Band-Transceiver/dp/\
B009MAXPBU/ref=sr_1_8?ie=UTF8&qid=1363548423&sr=8-8&keywords=Etekcity> but, again, Etekcity seems to be selling the UV-5R at this Web site. They probably have the newer radios for sale elsewhere.

I bought a UV-5+ Plus package from tool_nerd and had it in my hands in three days, shipped from Las Vegas!
(http://www.ebay.com/itm/2013-BaoFeng-UV-5R-PLUS-USB-Cable-Kit-136-174-4\

East Valley Repeater Group
Monday March 18, 2013
8:00 pm - 9:00 pm
(GMT-07.00) Mountain Time (US & Canada)
Location: 449.825 (-) PL 100

Notes:
We are a group of Amatuer Operators that have formed this group to provide emergency communications for two East valley hospitals. The two hospitals are the Chandler Regional Hospital located at 475 S. Dobson Rd. and the Mercy Gilbert Hospital located at 3555 S. Val Vista Dr.
Our home repeater is located in Gilbert AZ on the Mercy Gilbert hospital with a coordinated frequency of 449.825 with a 100.0 PL and a minus offset. A repeater on the Chandler Regional hospital is in the works and when ready will become our back-up frequency.
Everyone is welcome to join our net on Monday night at 8:00 P.M. on the 449.825 repeater.

Followup:

According to a few people on the Baofeng Yahoo Group (
http://groups.yahoo.com/group/baofeng_uv5r/message/23425), the "UV-5R"
radios at Amazon/Etekcity have the latest firmware of BFB-297 in them;
price is $38.69 plus shipping.

The 409shop.com web site has advertised the "new" Baofeng UV5RE radio for
$48.80 and includes shipping.

2111. Arizona Emergency Net - Maricopa, 3/18/2013, 9:00 pm

Yahoo group: Queen_Creek_Hams
Date: 2013-03-18 15:01:05 UTC
From: Queen_Creek_Hams@yahoogroups.com
Topic: 2111 Message: 2111

Reminder from: Queen_Creek_Hams Yahoo! Group
http://groups.yahoo.com/group/Queen_Creek_Hams/cal

Arizona Emergency Net - Maricopa
Monday March 18, 2013
9:00 pm - 10:00 pm
(GMT-07.00) Mountain Time (US & Canada)
Location: 147.24 ( ) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes:
AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

2112. A REAL UV-5R Manual

Yahoo group: Queen_Creek_Hams
Date: 2013-03-20 15:16:29 UTC
From: Kenn Burnell
Topic: 2112 Message: 2112

Group,

The original UV-5R manual runs about 20 small pages. The pdf version also runs 20 pages but can be printed in 8 1/2 x 11" format.

A group of hams led by Lennart Lidberg spent a LOT of time and effort and produced a semi-professional 65-page manual in pdf format. It is available at http://radiodoc.github.com/

2116. Trusted Web Sites to Buy a Baofeng UV-5R From; Baofeng Users' Group

Yahoo group: Queen_Creek_Hams
Date: 2013-03-22 18:16:50 UTC
From: Kenn Burnell
Topic: 2116 Message: 2116

Group,

The question often comes up - where should I buy my Baofeng UV-5R from? First, you should know that there are many UV-5R models on the market. These include:
UV-5R, UV-5+ Plus, UV-5RA , UV-5RA Plus, UV-5RAX, UV-5RB, UV-5RB-UU, UV5R-C, UV5R-D, UV-5RE, UV-5RE-UU, and F-11. Then, the radio comes in at least five colours - Black, yellow, blue, red and camouflage*.* Different colored radios have a different model number.

One of important characteristics of the radio is the firmware version - the radio's internal software. There is supposed to be little difference between firmware versions (mostly in the Menus), but we would all like to have a recent one. One of the latest 2013 firmware versions is *BFB-297*.

AS of March 20, 2013, the latest UV-5R models include the *UV-5RE, UV-5R+ and the F-11*. The F-11 seems to be a large U.S. distributer's OEM version of the radio and it has its own firmware nomenclature - USA349.

Trusted sites to buy a UV-5R+ from are: On eBay -- Radio Shop 888, Mega 409 Shop or www.409shop.com. In the U.S., Etekcity and Charger Angel. (*WP4AOH*)

I bought my UV-5R+ from tool_nerd/SainStore on eBay. The radios are also available through Amazon. I had my radio *tw**o days* after I placed the order with tool_nerd! See
http://www.ebay.com/sch/tool_nerd/m.html?_nkw=&_armrs=1&_from=&_ipg=<http://www.ebay.com/itm/2013-Baofeng-UV-5R-A-Dual-Band-136-174-4-00-480-MHz-FM-Ham-Two-way-Radio-BFB297/310625570886?ssPageName=WDVW&rd=1&ih=021&category=20381&cmd=ViewItem>

Note that many suppliers ship from China, Hong Kong or from or a warehouse in the USA; purchaser's choice ... "Domestic" shipping is often indicated by the words, "US Stock" in their ads and they offer several "packages."

Again, the radio is available in different colors and case styles. Models available include the UV-5R, UV-5R+, UV-5RA, UV-5RB, UV-5RC, UV-5RE and other variants. The main differences are the case style and the firmware versions, BFB-230 being one of the oldest and BFB-295/297 the newest. There are *rumors* of versions BFB-299, 301 and 307. The firmware versions cannot be upgraded and generally involve very minor changes in a few Menu items.

Warranty? Don't count on one. Your warranty is probably with your dealer, not the manufacturer.

2117. Radios in the Park, Today from 10 AM to 2 PM local time

Yahoo group: Queen_Creek_Hams
Date: 2013-03-23 14:57:04 UTC
From: Joe Sammartino
Topic: 2117 Message: 2117

Folks,

Several local hams (Phoenix Valley Area) will be operating portable mode (off the grid) for the "Radios in the Park" event, scheduled for this Saturday, March 23rd from 10 AM to 2 PM local time.

Here's a sample of some of the folks operating the RITP event:

Dennis, KF6RYX - Remington Heights in Queen Creek

Doug, WB7TUJ - Emerald Park in Mesa

146.460 Mhz is the Valley wide simplex frequency for this event; PL of 77 Hz is employed by some of the event stations.

If you would like to participate and visit one or more of these event locations, this link will show you location via APRS and guide you there:

http://aprs.fi/#!mt=roadmap&z=11&call=a%2FRITP_Den%2Ca%2FRITP_Doug&timerange=3600&tail=3600

2123. When Will the Baofeng UV-5R Scanner Not Stop on a Channel?

Yahoo group: Queen_Creek_Hams
Date: 2013-03-26 04:38:20 UTC
From: Kenn Burnell
Topic: 2123 Message: 2123

Ref: http://groups.yahoo.com/group/baofeng_uv5r/message/24124

Question:

ANSWER: Scanning will not stop on any channels that have a receive CTCSS (PL) tone of *136.5 Hz or lower* programed into it. For example, scanning will not stop for the MARA repeater at 146.720, PL of 100 Hz.

Do you have receive CTCSS tones programmed on the channels that it doesn't stop on? Scanning will not stop on any channels that have a receive CTCSS tone of *136.5 Hz or lower *programed into it.

Reference for UV-5R Menus:

http://kc9hi.dyndns.org/uv5r/programming/UV-5R%20Menus.pdf See Menu option 11 and the Notes.
Now, keep in mind that the author of the Menus, KC9HI, doesn't say which firmware versions are affected. Baofeng makes changes to their menu system from time to time and upgrades their firmware in new radios (only). Eventually, they may fix this problem; maybe they already did ...

Hello, again, Brad.

I'm glad you made it over to the Yahoo! group. I look forward to talking to you again on the Ocotillo repeater.

73, Kenn

2126. What Will We Do If The Repeaters Don't Work?

Yahoo group: Queen_Creek_Hams
Date: 2013-03-28 17:43:44 UTC
From: Kenn Burnell
Topic: 2126 Message: 2126

Group,

Ref: http://groups.yahoo.com/group/baofeng_uv5r/message/24456

Below is one person's response to the questions:

- What bands do you believe will be used the most during either
emergencies or collapse in society ?

- Is it safe to assume that repeaters can be shut down or controlled,
limiting access ?

Excellent question. In case of collapse, don't expect to rely on
repeaters if the power is out. If it has a battery backup it will be off
the air in short order. Same for cell coverage as we know.

Simplex use is what you want to practice. With radio, on any band that
the 5R covers, Antenna and antenna height is might. The stock antenna is
tolerable. search the group for aftermarket antennae suggestions. I have
the "$3.79" (Now $5.50) antenna on both of my 5Rs. There is also a Nagoya
available on eBay that has been thoroughly tested as exceptional for this
rig.

Go to N9TAX website. (Google search) You will find a "Slim Jim" rollup
antenna for fixed use. The antenna is very portable, rolls up to fit into a
go-bag or backpack. It is inexpensive and has excellent gain. I have 2 of
these also. If you have to park yourself, toss a fishing line over a
branch and hike this antenna up and it will provide some range. make sure
to get the "HT saver" cable to keep stress from your connection at the
radio.

Your best option for real range is studying for the general license or
at least taking it when you test for your Tech. It won't cost you any more
to take it at the same time you take your Tech. HF will give you state to
state coverage on certain bands at certain times of day/night.

I hope this helps. The learning process can be intimidating with ham.
Don't let it get you down. We are here to help. There are many in this
group that have the same concerns. Six months or so from now you will
look back and be glad you persevered.

Something else to think about is 6 and 10 meters. You don't need a lot of power or antenna hight to cover a large distance and your not dependant on HF conditions. 5-10 watts and a 20-30 high antenna will cover most of the east valley including Florence and West to about South Mountain. That's using Hunt Hwy and Bella Vista as a transmitting origin. You can also get very good coverage mobile. No repeaters needed and the band are relatively unused.

2130. Radio Repair

Yahoo group: Queen_Creek_Hams
Date: 2013-03-29 21:55:18 UTC
From: ScottM
Topic: 2130 Message: 2130

Does anyone know of someone who could repair my Yaesu FT 847 here locally? I contacted Yaesu they no longer repair my radio.
I am having problems with the power button?
Thanks, Scott

KF7E knows a guy in TEXAS, who repaird Kenwood, some Yaesu maybe. (Clif Holland at http://www.avvid.com/) Highly recommended.

KF7E thinks maybe better to call Burghardt Radio in SOuth Dakota and ask about the 847 parts. They are a Yaesu repair center, and he (Jim Smith) does great work on other Yaesus, other brands, if he can get parts.

KF7E knows of no one in the PHX area that is certified to work on the 847. There used to be a guy in Phoenix that was a Yeesu/Kenwood/Icom repair center, but he apparently has retired.

Amateur repairs now need to be sent someplace out-of area. Maybe phone Ham RAdio Outlet and ask if they have a recommendation for the FT-847.

Scott,

There are a couple of techs in the Valley who work on Ham radios. I don't know if they are licensed First Class techs and I don't know their names or call signs. I've heard people talking about them on the ARA and EAARS repeaters. What has been suggested to others looking for a local tech is to put out a call on the repeaters and see if they can get a response.

Good luck.

Kenn

Topic: 2140 Message: 2140

Reminder from: Queen_Creek_Hams Yahoo! Group
http://groups.yahoo.com/group/Queen_Creek_Hams/cal

Arizona Emergency Net - Maricopa
Monday April 1, 2013
9:00 pm - 10:00 pm
(GMT-07.00) Mountain Time (US & Canada)
Location: 147.24 ( ) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes:
AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

From: Joe Sammartino
Topic: 2145 Message: 2145
Attachments: 1 described; binary payloads are missing from this source WARC

Folks,

For those of you interested in spotting the *International Space Station*,
it will be visible tonight* *for (1) minute at a good elevation of 54
degrees. That elevation should provide for good viewing, barring any
clouds.
It will be a very brief viewing window but worth watching.

This information is valid if you are observing from the Phoenix valley area.

Here are the details:

*Time: Fri Apr 05 8:51 PM, Visible: 1 min, Max Height: 54 degrees, Appears:
WSW **(248 degrees)**, Disappears: WSW **(248 degrees)*
*
*
*Please Note: I believe the above data direct from NASA contains some
errors.*
*
*
Here is what my satellite tracking software reports for this pass:
*
*
Friday, April 05, 2013

ISS (ZARYA) 4/5/13
Time of Aquisition: 20:49:12
Loss of Satellite: 20:59:56
Duration of Pass: 00:10:43
Time elapsed since last pass: 01:26:38
Acquisition Elevation: 234°
Maximum Elevation: 56°
Loss of Satellite Elevation:
43°
Orbit number: 82351

I've also attached an illustration that will help you determine how to use

From: Joe Sammartino
Topic: 2147 Message: 2147
Attachments: 1 described; binary payloads are missing from this source WARC

Folks,

For those of you interested in spotting the *International Space Station*, it will be visible tonight* *for (5) minutes at a good elevation of 67 degrees. That elevation should provide for good viewing, barring any clouds.

This information is valid if you are observing from the Phoenix East Valley area.

Here are the details:

Time: Sat Apr 06 8:01 PM, Visible: 5 min, Max Height: 67 degrees, Appears: SW (225 degrees), Disappears: ENE (68 degrees)

I've also attached an illustration that will help you determine how to use this information.

You can watch and track the station in advance at this link:

http://spaceflight.nasa.gov/realdata/tracking/index.html

Reminder from: Queen_Creek_Hams Yahoo! Group
http://groups.yahoo.com/group/Queen_Creek_Hams/cal

East Valley Repeater Group
Monday April 8, 2013
8:00 pm - 9:00 pm
(GMT-07.00) Mountain Time (US & Canada)
Location: 449.825 (-) PL 100

Notes:
We are a group of Amatuer Operators that have formed this group to provide emergency communications for two East valley hospitals. The two hospitals are the Chandler Regional Hospital located at 475 S. Dobson Rd. and the Mercy Gilbert Hospital located at 3555 S. Val Vista Dr.
Our home repeater is located in Gilbert AZ on the Mercy Gilbert hospital with a coordinated frequency of 449.825 with a 100.0 PL and a minus offset. A repeater on the Chandler Regional hospital is in the works and when ready will become our back-up frequency.
Everyone is welcome to join our net on Monday night at 8:00 P.M. on the 449.825 repeater.

2150. Arizona Emergency Net - Maricopa, 4/8/2013, 9:00 pm

Yahoo group: Queen_Creek_Hams
Date: 2013-04-08 15:01:05 UTC
From: Queen_Creek_Hams@yahoogroups.com
Topic: 2150 Message: 2150

Reminder from: Queen_Creek_Hams Yahoo! Group
http://groups.yahoo.com/group/Queen_Creek_Hams/cal

Arizona Emergency Net - Maricopa
Monday April 8, 2013
9:00 pm - 10:00 pm
(GMT-07.00) Mountain Time (US & Canada)
Location: 147.24 ( ) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes:
AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

Ryan and Members,

Access to the N2SDB-R Echolink Node of the Ocotillo Repeater requires authorization from the node administrator - guess who - me.

Ryan - I will turn on access for you today and you should be good to go by 3:30 PM.

If anyone else needs authorization, please send me an email directly.

Regards,

Joe, N2QOJ

Hi Joe, is it commom for echo link nodes to have pre-authorization?

Without authorization, I assume you can listen but not transmit or is it
both receive and transmit.

Thanks,

Steve

2158. Re: [Queen_Creek_Hams] Re: EchoLink Node update

Yahoo group: Queen_Creek_Hams
Date: 2013-04-10 23:30:14 UTC
From: Joe Sammartino
Topic: 1998 Message: 2158

Hello Steve and Members -

Good questions....

- Is it common for echo link nodes to have pre-authorization?

No, it is not. However, it is good practice to apply some level of access authorization to the node when it is associated with a repeater that is used for local emergency communication, nets, etc. Also, it is not desired to have incoming connections from other links, repeaters, or conferences that may not be properly administered and/or operated. In other words, unwanted kerchunking, connects with no identification, etc. An open EchoLink node can turn a hardly used repeater into an overly used and abused repeater very quickly.

Our repeater owner and trustees have approved the EchoLink node connection with the intent to allow our local repeater users to be able to access the Ocotillo repeater when traveling out of town on business or personal trips. Plus, if you have friends or family in other parts of the country that would like to connect with you locally via Echolink and repeater, then we would be happy to authorize them.

- Without authorization, I assume you can listen but not transmit or is it both receive and transmit.

No, without access authorization, you cannot connect successfully to the node so you can't listen. If you would like to listen only, I recommend that you utilize our 24/7 Internet audio stream of the repeater activity. That service is available to anyone. You can do that by clicking on this link:

http://www.broadcastify.com/listen/feed/10544/web/?rl=rr

Regards,

Joe, N2QOJ

Sorry for being out of the loop folks. You all probably thought I disappeared after just a couple of Friday lunch get-togethers! The truth of the matter is that I have been extremely busy, out of town, etc., excuses, excuses, excuses. And we would love to make tomorrows breakfast, but alas, we are on out way out of town for the weekend. I appreciate all that you folks do to keep us on the air, and am hoping to have a better set up soon. Have a great breakfast...and weekend!

East Valley Repeater Group
Monday April 15, 2013
8:00 pm - 9:00 pm
(GMT-07.00) Mountain Time (US & Canada)
Location: 449.825 (-) PL 100

Notes:
We are a group of Amatuer Operators that have formed this group to provide emergency communications for two East valley hospitals. The two hospitals are the Chandler Regional Hospital located at 475 S. Dobson Rd. and the Mercy Gilbert Hospital located at 3555 S. Val Vista Dr.
Our home repeater is located in Gilbert AZ on the Mercy Gilbert hospital with a coordinated frequency of 449.825 with a 100.0 PL and a minus offset. A repeater on the Chandler Regional hospital is in the works and when ready will become our back-up frequency.
Everyone is welcome to join our net on Monday night at 8:00 P.M. on the 449.825 repeater.

2168. Arizona Emergency Net - Maricopa, 4/15/2013, 9:00 pm

Yahoo group: Queen_Creek_Hams
Date: 2013-04-15 15:01:52 UTC
From: Queen_Creek_Hams@yahoogroups.com
Topic: 2168 Message: 2168

Reminder from: Queen_Creek_Hams Yahoo! Group
http://groups.yahoo.com/group/Queen_Creek_Hams/cal

Arizona Emergency Net - Maricopa
Monday April 15, 2013
9:00 pm - 10:00 pm
(GMT-07.00) Mountain Time (US & Canada)
Location: 147.24 ( ) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes:
AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

Hi Greg,

When we spoke on the phone the other day, you had not received the
programming cable yet.

What exactly do you need help with? Is the program and/or cable not
working?

Regards,

Joe, N2QOJ

http://groups.yahoo.com/group/Queen_Creek_Hams/cal

Boy Scouts Electronic Swap Meet and Recycling
Sunday April 21, 2013
6:00 am - 10:30 am
(GMT-07.00) Mountain Time (US & Canada)
Location: Scottsdale Pavilions, 9069 east indian bend Road, Scottsdale, AZ

Notes:
Electronicfest is an electronics recycling event and computer swap meet. It was started more than 25 years ago by the boy scouts and their leaders from Troop 446, chartered by Our Lady of Perpetual Help Church in Scottsdale, Arizona.

The Electronicfest is held the 3rd Sunday morning of every month (come rain or shine), from 5:30am to 10:30am, in Scottsdale, Arizona in the 5 & Diner parking lot of the Scottsdale Pavilions Shopping Center (9062 East Indian Bend Road, Scottsdale). Map: http://tinyurl.com/cocky2s .

Proceeds raised at this event help Boy Scouts earn their way to camp, and pay for scouting program.

2179. Miklor Website Tip (Baofeng Radios) - SERCHing!

Yahoo group: Queen_Creek_Hams
Date: 2013-04-20 18:43:43 UTC
From: Kenn Burnell
Topic: 2179 Message: 2179

A must visit website for any UV-5R owner is the Miklor website.

http://www.miklor.com

The great thing about it is that it has nearly everything you need to know about the UV-5R withing its pages. Even though the website is very well organized, having so much content makes it more difficult to find what you are looking for. Here's a tip to make that task easier...

1. Open Google in your web browser. Google's website domain is http://www.google.com

Note: You can also perform step 2 in the Address Bar of the Google Chrome web browser.

2. In the Google search box, first enter "site:" followed directly by the name of the website you are going to search "www.miklor.com/uv5r/" followed by your keywords.

Here's an example for finding "$3.79 Special" antenna...

[site:www.miklor.com/uv5r/ $3.79] (without the square brackets)

Considering the tense atmosphere these days their timing might be a little off.....

Announcing the P5 Project.

IDXC 2013 Convention, Visalia, April 20th, 2013.

P5, North Korea is the most wanted DXCC entity world-wide.

Today, the Intrepid-DX Group, in partnership with the World-Wide DX Group, is announcing our sustained and ongoing effort to activate North Korea.

For the past four years, we have been working with professionals in the business and tourism industries who are actively doing business in North Korea. We are leveraging their ideas and contacts towards our goal of a major Dxpedition over a four week period from within the DPRK. We are using the same techniques that were successful in opening up Kurdistan (Northern Iraq) South Sudan and Yemen to Dxpedition activity.

We have prepared a comprehensive, multi-faceted proposal and we have delivered it to the DPRK officials via our Chinese emissary. Several members of our leadership and advisory team and have made multiple visits to the DPRK and are advising us accordingly. We are making further plans to visit
the DPRK in the coming months to further bolster our business contacts and to research and assess various venues.

We expect this ongoing project to require a sustained effort. We are committed to work as hard and as long as it takes to activate this rare and much needed entity. We will continue negotiating and flying into and out of the DPRK as needed during this process to lay the groundwork and to build the trust to ensure that a favorable outcome can be created. We want the DX community to be aware and to understand that a sustained effort is being made to activate this rare and important entity.

Thank you,

N6PSE AH6HY YT1AD K3LP
The Intrepid-DX Group

I have been on many DXpeditions, and think international goodwill is a main plank upon which Amateur radio is based. The penetration of the Iron Curtain by Amateurs bearing friendship and goodwill is well documented.

But with North Korea aggressively pursuing nuclear missile technology, stridently thumbing it's nose at the world, and posturing for war, I feel this is a highly inappropriate and poorly timed effort.

And, I am sure, Pyongyang would be delighted to have some handy western tourists to hold as hostages in a showdown.

Negotiating for such a visit with a regime that starves its own people and worse, just to send a QSL card so hams can 'check off another box', tends to lend support to a government that stands against all that Amateur radio is all about.

Just mi dos centavos.

the DPRK in the coming months to further bolster our business contacts and to research and

assess various venues.

We expect this ongoing project to require a sustained effort. We are committed to work as hard and as long as it takes to activate this rare and much needed entity. We will continue negotiating and flying into and out of the DPRK as needed during this process to lay the groundwork and to build
the trust to ensure that a favorable outcome can be created. We want the DX community to be aware and to understand that a sustained effort is being made to activate this rare and important entity.

Thank you,

N6PSE AH6HY YT1AD K3LP

Tom:

Thanks, but I can be %99 sure my opinion will be in the minority, and widely castigated.

I have great respect for N6PSE, W3LP and the others. They have contributed greatly to the enjoyment and beterment of DXing. But in this case, giving the agressive and enigmatic bullies in Pyongyang goes a major step past what that group of accomplished DXers have done in the past. It is one thing to go help the underdogs in some places, but quite another to ask the #1 most repressive and powder keg government in the world today for 'favors'....

BTW, there have been similar 'demonstration' attempts to P5. And one guy actually got a license there. But he did not spend a fortune and make them look good in the process.

Jim

And, I am sure, Pyongyang would be delighted to have some handy western tourists to hold as hostages in a showdown.

Negotiating for such a visit with a regime that starves its own people and worse, just to send a QSL card so hams can 'check off another box', tends to lend support to a government that stands against all that Amateur radio is all about.

Just mi dos centavos.

Considering the tense atmosphere these days their timing might be a little off.....

Announcing the P5 Project.

IDXC 2013 Convention, Visalia, April 20th, 2013.

P5, North Korea is the most wanted DXCC entity world-wide.

Today, the Intrepid-DX Group, in partnership with the World-Wide DX Group, is announcing our sustained and ongoing effort to activate North Korea.

For the past four years, we have been working with professionals in the business and tourism industries who are actively doing business in North Korea. We are leveraging their ideas and contacts towards our goal of a major Dxpedition over a four week period from within the DPRK. We are using
the same techniques that were successful in opening up Kurdistan (Northern Iraq) South Sudan and Yemen to Dxpedition activity.

We have prepared a comprehensive, multi-faceted proposal and we have delivered it to the DPRK officials via our Chinese emissary. Several members of our leadership and advisory team and have made multiple visits to the DPRK and are advising us accordingly. We are making further plans to visit
the DPRK in the coming months to further bolster our business contacts and to research and assess various venues.

We expect this ongoing project to require a sustained effort. We are committed to work as hard and as long as it takes to activate this rare and much needed entity. We will continue negotiating and flying into and out of the DPRK as needed during this process to lay the groundwork and to build
the trust to ensure that a favorable outcome can be created. We want the DX community to be aware and to understand that a sustained effort is being made to activate this rare and important entity.

I don't know these people who are trying to organize this but we are on the brink of a war with the North than like you stated in your respond could not be better said. They should just walk away from this. I'll gladly stand in that 1% with you.

East Valley Repeater Group
Monday April 22, 2013
8:00 pm - 9:00 pm
(GMT-07.00) Mountain Time (US & Canada)
Location: 449.825 (-) PL 100

Notes:
We are a group of Amatuer Operators that have formed this group to provide emergency communications for two East valley hospitals. The two hospitals are the Chandler Regional Hospital located at 475 S. Dobson Rd. and the Mercy Gilbert Hospital located at 3555 S. Val Vista Dr.
Our home repeater is located in Gilbert AZ on the Mercy Gilbert hospital with a coordinated frequency of 449.825 with a 100.0 PL and a minus offset. A repeater on the Chandler Regional hospital is in the works and when ready will become our back-up frequency.
Everyone is welcome to join our net on Monday night at 8:00 P.M. on the 449.825 repeater.
Ron, 480-510-3025 cell or AJ7T@ cox.net. http://http://eastvalleyrg.ning.com/

2188. Arizona Emergency Net - Maricopa, 4/22/2013, 9:00 pm

Yahoo group: Queen_Creek_Hams
Date: 2013-04-22 15:01:05 UTC
From: Queen_Creek_Hams@yahoogroups.com
Topic: 2188 Message: 2188

Reminder from: Queen_Creek_Hams Yahoo! Group
http://groups.yahoo.com/group/Queen_Creek_Hams/cal

Arizona Emergency Net - Maricopa
Monday April 22, 2013
9:00 pm - 10:00 pm
(GMT-07.00) Mountain Time (US & Canada)
Location: 147.24 ( ) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes:
AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

2189. Mobile Unit

Yahoo group: Queen_Creek_Hams
Date: 2013-04-23 05:36:40 UTC
From: rcunningham8085
Topic: 2189 Message: 2189

Hello,

I am seeking your input on two Yaesu mobile units. The one that I have always been a fan of and have been wanting for several months is the 8800. After some time on the Yaesu website I also found the 8900. So the question is 8800 or 8900? Anyone care to chime in with information or opinions?

Thank you

Ryan Cunningham

I have a 8900. It is a nice radio but for the extra you have to figure out what it will take to make it worth it. If you buy a 8800 then any dual band antenna will work. If you go with the 8900 you will need either a diamond CR8900 quad band antenna which is pre tuned for the 10 n 6 meter Fm section as well as the 2m n 70cm bands or you will need 2-3 different antennas and a duplexer or triplexer. I went with the diamond antenna and have had great luck with it. Of course when I got the radio I didn't plan on the extra $150+ I would have to spend on the antenna and mount. With it I have made several FM contacts via the KQ2H repeater 29.620 in the Catskill Mtns. I have talked as far as Germany East and Rio De J. To the south with this same rptr. But the conditions are not always there. As far as 6m there is a nice link system one in Pinal Peak linked to the White Tanks. The group that runs these also has a irlp node and 2m link that they can turn on.

All in all I am happy with the choice I made and I think I would do it again. I do wish the 8900 had SSB cause that would make it awesome.

From: Joe
Topic: 2189 Message: 2191

Casey,

Very nice review of the 8900 and spot on!

We have standardized on the feature rich 8800 for the Queen Creek Emergency Group as the net control radio for EOC and district command centers. We now have 9 or 10 of them.

Our need was for a very capable vhf/UHF station radio. The 8800 is all the radio anyone would need for for that mission. We also have at least 5 or 6 locals using the 8800 also.

A couple of features worth noting are the band group and hyper functions. I won't descibe here but these features are of great benefit in managing groups of frequencies. Bruce, KF6EZT, is proficient and probably be happy to demonstrate the 8800.

Best regards,

Joe, N2QOJ

I forgot to add...

For whichever radio model you choose, you need to consider very good low loss coax (9913) and a very good high gain dual band antenna for home operation.

For mobile operation, any good quality gain antenna and short run coax of RG-8X or better will be fine.

Regards,

Joe, N2QOJ

Hi Guys

Just my 2 cents having 6m alone is worth the money. If any thing ever happens the UHF and VHF freqs will be jammed and with 6m you get much better progratation than with the higher freqs. As far as antennas you can get creative. I have 2 different diamonds I use with no problems on any band. I also set them up to attach to my buddipole so I can set them up anywhere at a lot higher height. I know not everyone will agree but the 8900 gives you much more flexibility and in a emergency that can be priceless.

Regards

Tom

I gather that the radios are fairly similar in features, with the exception that the 8900 gives you quad-band capability, adding 10 and 6 meters to the 2 meters and 440 capability of the 8800. Power output is the same on both radios. The price difference is not terrible, both are affordable. I guess it comes down to what capability you want. Also remember that you'll need additional antennas for the 10 and 6 meter bands. You'll need to give some thought to an antenna too.

I don't know the model number of hand but Diamond makes one that is not advertised for the 8900 but works great and you can get different coils for down to something like 40m. It covers all four bands easily. The one they make for the 8900 also covers all four. The only issue when placed on a car is location but when placed on say my buddipole they both work great with little to no tuning. It only takes a minute to swap from car to the pole which is great for mobile

good point. someone told a new ham that rg-8x was a good coax (which it is for a short run replacement for rg-58) The new ham ran 200 feet of it to an antenna in the back yard. This 200 ft run is best made with Andrew heilax or better yet don't run 200 feet unless its up a 200 ft tower.

Hey Tom,
Get Real!
Please don't tell us what "new hams" think. I hardly know what I think so I certainly wouldn't suggest telling people what others think.
We've got new hams in QC using all modes and performing long path HF weak signal as well as LOS and troposheric weak signal VHF/UHF coms everyday.
Enjoy OFM - Old Fart Mode!
Regards,
Joe, N2QOJ

Attachments: 1 described; binary payloads are missing from this source WARC

This can go from buddipole to car in about a minute. The mast is shown collapsed but extend to 16 feet. The tripod will go a foot or two higher also. Yes they are FM but so are all the HTs we are using. For HF and Digital I have another radio. With some luck, time and money I'll have a SDR that will cover HF through UHF cover all modes, be portable and battery operated.

Hey Joe

Don't know where that came from but I won't bother you any more since you don't seem open to my opinion and no where did I say anything about what anybody should think or do!!!

Hopefully the new hams coming in will have the curiosity to seek things out for themselfs and outside of the group since it seems kinda one sided.

Tom...

Wrong Tom....I was responding to Tom's, K8PNW, comments, not YOU.

That's the issue with Yahoo group messages sometimes, you must be careful
to read the entire thread of messages.

Tom, k8pnw, is our very own self-professed curmudgeon and has strong
opinions regarding new hams.

I hope that clears up the confusion.

Regards,

Joe, N2WOJ

Arizona Emergency Net - Maricopa
Monday April 29, 2013
9:00 pm - 10:00 pm
(GMT-07.00) Mountain Time (US & Canada)
Location: 147.24 ( ) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes:
AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

2206. Cochise Hamfest - worth attending?

Yahoo group: Queen_Creek_Hams
Date: 2013-05-02 17:12:30 UTC
From: n1rwy
Topic: 2206 Message: 2206

Hello all,
I am new to the area and looking to hit a hamfest for some coax and other items to get my HF station up and on the air before we are in the 100's for weeks on end..

I was thinking of hitting the Cochise Hamfest.

Has anyone been? Worth the 3 hour drive?

Thanks

- Jay N1RWY (San Tan Valley)
over by Coombs Highschool.

HI Jay,

I can't answer about that hamfest but 3 hours seems a bit much. You may want to join the ArizonHams Yahoo Group and ask your question there as well:

http://groups.yahoo.com/group/arizonaham/

I can point you to the best source for HF coax in the Valley --- www.wiredco.com .

100 feet of RG8X with PL-259 connectors will only cost you $29.95 - perfect for HF, just ok for VHF/UHF. Can't beat that with a BFO.

Also, I'll be announcing a "Radios in the Park" event for this Saturday later today. It's in our backyard and you can see radios, antennas, and interact with us there.

Regards,

Joe, N2QOJ

Joe,
Thanks for the links and the information.
Coming from Maine (moved here 2 years ago) traveling 40 minutes one way to hit the local super market was standard OP. hi hi.

I will check out wiredco, and looking for the information on the radios in the park.

- Jay

Jay and other new folks,

I forgot to mention....

Join us on our local repeaters anytime:

449.325 (-) PL 100 "Ocotillo Repeater" - you should be able to hit this repeater with an HT and 1/2 watt from your home.

449.475 (-) PL 136.5 "Queen Creek Repeater"

Someone is usually listening to our unofficial simplex frequency of 146.500 Mhz.

You can hear an Internet feed of our local radio activity at:

http://www.broadcastify.com/listen/feed/10544/web/?rl=rr

Regards,

Joe, N2QOJ

From: Joe
Topic: 2206 Message: 2211

Let me clarify.....
If you have an HT and are in the near vicinity (<3-5 miles) of the Ocotillo Repeater, low power should be fine.
High power HT, with no obstructions, should get you into the repeater reliably from most parts of the East Valley. Mobile radios should have no problem accessing from most anywhere in the valley and then some - Florence, Case Grande, Maricopa, etc.
Repeater location is Ocotillo Road at Schnepf Road and the antenna is about 330 feet above the average terrain. Effective IRP is about 320 watts.
It's a beast!
Regards,
Joe, N2QOJ

Repeater location is Ocotillo Road at Schnepf Road and the antenna is about
330 feet above the average terrain. Effective IRP is about 320 watts.

Heck, I should be able to see that from my backyard.
;-)

Once I get my feedline situated and atennas mounted (this weekend I hope) I
will give this a shout.
Thanks Joe for the info.

Yes, the antenna is mounted about half way up on the massive commercial FM broadcast tower.

2214. Radios in the Park, Saturday, May 4th, 10 AM to 2 PM

Yahoo group: Queen_Creek_Hams
Date: 2013-05-02 18:14:17 UTC
From: Joe Sammartino
Topic: 2214 Message: 2214

Radios in the Park - RITP

What is it?

Here's the recipe:

- take several ham radio stations and antenna systems
- add portable power - generators, batteries, solar power
- add some experienced hams
- include an open invitation to new hams, experienced hams, and anyone
- publish a valley wide talk-in frequency of 146.460 Mhz (PL of 77 Hz, but not necessary)
- and replicate this recipe several times over in the Valley at the same time

What is the result?

- An excellent opportunity to learn about ham radio and ham radio operators.
- A great opportunity to learn about the type of equipment available - portable, mobile, base radios, antennas, coax, cables, solar arrays, solar controllers, and more.
- A great opportunity to learn about the importance of basic emergency radio principles.
- An opportunity to actually use the radio equipment and speak to local hams and distant hams hundreds or thousands of miles away -- even if you are not a ham!

It is a hands-on learning experience that is unequaled. We have had several of these events over the last 18 months and every one of them has been a tremendous success. The organizers of these events have one objective - to relate the fun, facts, and usefulness of ham radio.

Where and When?

Or local RITP will be at the picnic pavilion at Remington Heights park near the intersection (just East) of South 198th Street and East Emperor Road.

May 4th, 2013, From 10 AM till 2 PM.

Doug, WB7TUJ, will host RITP in Mesa at the same time.

Later today, I hope to post a link to an information page at my website that will have full information, maps, and photos of past events.

Again, our local RITP is hosted by Dennis, KF7RYX, at Remington Heights. Here is a link to a map of the location:

http://tinyurl.com/KF7RYX-RITP

* Questions?*

Just respond to this message or send me a private email.

I will also post a link to the APRS.fi website Friday night since these events will also beacon as objects for all hams to see so they can navigate directly to them.

Regards,

Joe, N2QOJ

Track this around the world flight at http://live.solarimpulse.com/ .

Live video & voice from command center and cabin feed. Instrument panel, map, and more.

It will land at Sky Harbor, tomorrow, Saturday about 12:30PM .

Norm, aa7oo

There is no APRS radio on board, that would have been cool.

Is it landing at 12:30 PM or 12:30AM? The elevation graph show it starts descending at approx 1800 and zero elevation just after midnight.

Update:
Doug, WB7TUJ, will be hosting Radios in the Park in North Mesa at the
Cooley Family Park located Southwest of the intersection of East
McLellan Road and North Val Vista Drive.
Here is a link to a map of the location:
http://goo.gl/maps/fMvYK <http://goo.gl/maps/fMvYK>
Remember, the Valley wide frequency to join in the fun is 146.460 Mhz
simplex. A PL of 77 Hz is encouraged but not absolutely necessary.
Regards,
Joe, N2QOJ

East Valley Repeater Group
Monday May 6, 2013
8:00 pm - 9:00 pm
(GMT-07.00) Mountain Time (US & Canada)
Location: 449.825 (-) PL 100

Notes:
We are a group of Amatuer Operators that have formed this group to provide emergency communications for two East valley hospitals. The two hospitals are the Chandler Regional Hospital located at 475 S. Dobson Rd. and the Mercy Gilbert Hospital located at 3555 S. Val Vista Dr.
Our home repeater is located in Gilbert AZ on the Mercy Gilbert hospital with a coordinated frequency of 449.825 with a 100.0 PL and a minus offset. A repeater on the Chandler Regional hospital is in the works and when ready will become our back-up frequency.
Everyone is welcome to join our net on Monday night at 8:00 P.M. on the 449.825 repeater.

Reminder from: Queen_Creek_Hams Yahoo! Group
http://groups.yahoo.com/group/Queen_Creek_Hams/cal

Arizona Emergency Net - Maricopa
Monday May 6, 2013
9:00 pm - 10:00 pm
(GMT-07.00) Mountain Time (US & Canada)
Location: 147.24 ( ) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes:
AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

2225. Re: Mobile Unit

Yahoo group: Queen_Creek_Hams
Date: 2013-05-06 19:40:04 UTC
From: n1rwy
Topic: 2189 Message: 2225

Is the point of the mobile unit to run "mobile" or to use in the home?
Is HF mobile ability one of the considerations at all?

There is a ton of FT100s & FT857s on ebay right now going cheap.
(I saw a 100 go for $320 the other day shipped).

Not bad for a 160M - 432 MHZ all band, all mode, mobile radio.

Just throwing that out there.
(Yes, I am biased, I own both as well).

2226. Special Testing Session, Thursday, 7:30 PM, Queen Creek Town Hall

Yahoo group: Queen_Creek_Hams
Date: 2013-05-06 19:52:29 UTC
From: Joe Sammartino
Topic: 2226 Message: 2226

Folks,

We are holding a special testing session for our Queen Creek area students, thanks to Fred Bollinger, AB7JF, of the East Valley VEC.

Our initial objective was to provide a small session for a handful of our students. However, Fred will be prepared to administer upgrade testing for General and Extra class as well.

If you would like to take advantage of this session, please bring your original license, a copy for the VE team to keep, and $15.

You must confirm with me in advance - that means today or tomorrow, please. My contact information is below.

Our VE examiners will be Fred, Dennis (KF7RYX, Joe (N2QOJ), and Conrad (K1EC).

Thank you,

Joe, N2QOJ

Good discussion point, Jay --

For most newer hams, especially the folks we trained and licensed for QC emergency communications, a more powerful dual band mobile radio for car and home use is the next step.

There are many folks on this Group thought that operater 857s, 897s, IC-2000, IC-706MIIGs, in their vehicles for all band fun.

And of course, lots of us have full home station capabilities on all bands and modes.

Several folks also have complete portable stations for camping, Boy Scout, Father/Son, and vacation outings.

Great hobby - terminal - but loads of fun.

Regards,

Joe - N2QOJ

Date: 2013-05-07 07:11:37 UTC
From: Jay Baack
Topic: 2189 Message: 2228

Thanks Joe,
I was thinking why limit yourself to a single mode and 4 bands, when for less cost you can get a decent all band all mode that can operate mobile, or at home or as we saw last weekend, in the park. Any step up from a HT is a great first step in improving your "reach" and growth in ham radio, whether it be a new band or a new mode.

- Jay

East Valley Repeater Group
Monday May 13, 2013
8:00 pm - 9:00 pm
(GMT-07.00) Mountain Time (US & Canada)
Location: 449.825 (-) PL 100

Notes:
We are a group of Amatuer Operators that have formed this group to provide emergency communications for two East valley hospitals. The two hospitals are the Chandler Regional Hospital located at 475 S. Dobson Rd. and the Mercy Gilbert Hospital located at 3555 S. Val Vista Dr.
Our home repeater is located in Gilbert AZ on the Mercy Gilbert hospital with a coordinated frequency of 449.825 with a 100.0 PL and a minus offset. A repeater on the Chandler Regional hospital is in the works and when ready will become our back-up frequency.
Everyone is welcome to join our net on Monday night at 8:00 P.M. on the 449.825 repeater.

2237. Arizona Emergency Net - Maricopa, 5/13/2013, 9:00 pm

Yahoo group: Queen_Creek_Hams
Date: 2013-05-13 15:01:19 UTC
From: Queen_Creek_Hams@yahoogroups.com
Topic: 2237 Message: 2237

Reminder from: Queen_Creek_Hams Yahoo! Group
http://groups.yahoo.com/group/Queen_Creek_Hams/cal

Arizona Emergency Net - Maricopa
Monday May 13, 2013
9:00 pm - 10:00 pm
(GMT-07.00) Mountain Time (US & Canada)
Location: 147.24 ( ) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes:
AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

Boy Scouts Electronic Swap Meet and Recycling
Sunday May 19, 2013
6:00 am - 10:30 am
(GMT-07.00) Mountain Time (US & Canada)
Location: Scottsdale Pavilions, 9069 east indian bend Road, Scottsdale, AZ

Notes:
Electronicfest is an electronics recycling event and computer swap meet. It was started more than 25 years ago by the boy scouts and their leaders from Troop 446, chartered by Our Lady of Perpetual Help Church in Scottsdale, Arizona.

The Electronicfest is held the 3rd Sunday morning of every month (come rain or shine), from 5:30am to 10:30am, in Scottsdale, Arizona in the 5 & Diner parking lot of the Scottsdale Pavilions Shopping Center (9062 East Indian Bend Road, Scottsdale). Map: http://tinyurl.com/cocky2s .

Proceeds raised at this event help Boy Scouts earn their way to camp, and pay for scouting program.

2245. Video descriptions of the N7DJZ Ocotillo Repeater, AKA "The Beast"

Yahoo group: Queen_Creek_Hams
Date: 2013-05-18 20:59:35 UTC
From: Joe Sammartino
Topic: 2245 Message: 2245

Hey Folks,

Clint, KG7BWD, had a great question about what all makes up the Octotillo Repeater that we all use and love.

Since the actual repeater site is a private and secured commercial site, the next best thing is to show you some videos of the site.

Doug, WB7TUJ, and Dave, N7DJZ, the owners and sponsors of the repeater, along with our ever present repeater user, Dennis, KF7RYX, are on these videos.

The first video describes the installation details. The second video describes the actual repeater components and in the third video, Dave describes the special "Dennis Duty" fan option for the power amplifier. N2QOJ handled the amateur videography.

http://youtu.be/69FEsrTRVSo

http://youtu.be/nD-aoX2BSmw

http://youtu.be/ijVvEiOKG58

These videos, and more, can be found on the Queen Creek Amateur Radio Club Youtube channel:

http://www.youtube.com/queencreekarc

Remember to subscribe to the channel for notifications when new videos are uploaded.

Enjoy,

Joe, N2QOJ

I should have added LMR200 or 300 also depending on the Freq's. They have
all the specs in their catalog.

Times Microwave .89 cents a ft for LM-400, plus PL-259 connectors installed
50 ft price is $70.50
Any place cheaper?

That actually sounds good. LMR-400 can run close to a dollar just for the cable. Be careful on Amazon and Ebay. Heard people we're selling what was advertised as Times Microwave products cheap but turned out to be cheap knockoff.

What freq are we talking?
Lmr 400 is available at HRO right in Phoenix. 25 year cable, great stuff for 144+MHZ if hard line isn't an option. I picked up 100' the other day for my 440 MHZ runs (75' to the antenna).

Buy once, cry once.

Reminder from: Queen_Creek_Hams Yahoo! Group
http://groups.yahoo.com/group/Queen_Creek_Hams/cal

East Valley Repeater Group
Monday May 20, 2013
8:00 pm - 9:00 pm
(GMT-07.00) Mountain Time (US & Canada)
Location: 449.825 (-) PL 100

Notes:
We are a group of Amatuer Operators that have formed this group to provide emergency communications for two East valley hospitals. The two hospitals are the Chandler Regional Hospital located at 475 S. Dobson Rd. and the Mercy Gilbert Hospital located at 3555 S. Val Vista Dr.
Our home repeater is located in Gilbert AZ on the Mercy Gilbert hospital with a coordinated frequency of 449.825 with a 100.0 PL and a minus offset. A repeater on the Chandler Regional hospital is in the works and when ready will become our back-up frequency.
Everyone is welcome to join our net on Monday night at 8:00 P.M. on the 449.825 repeater.

Steve,

Give Art a call at RF Stuff in Congress, AZ. He should have a low-loss cable in stock but, I can't tell you which one. He will make up any length you like with or without your choice-of-quality of PL-259 connectors. He usually ships next day with one day typical delivery. RF Stuff has all kinds of connectors, cable and other goodies in stock. The on-line catalog is NOT complete at RFStuff.com <http://rfstuff.com/> ; you need to phone.

Topic: 2257 Message: 2257

Hi Folks,

For those of you who are members of the Queen Creek Emergency Communications Group but not yet members of the QCECG YAHOO Group, please navigate to the link below and join:

http://groups.yahoo.com/group/QCComGroup/

That Group is only for members of QCECG and is private. It is not publicly listed when searched for in Yahoo Groups Search.

As local area hams, this Queen Creek Hams Group welcomes all and the QCECG is reserved for the QC Emergency Communications volunteers.

Regards,

Joe, N2QOJ

2258. Field Day 2013

Yahoo group: Queen_Creek_Hams
Date: 2013-05-20 09:42:52 UTC
From: Joe Sammartino
Topic: 2258 Message: 2258
Attachments: 1 described; binary payloads are missing from this source WARC

Hi Folks,

We are continuing the success we enjoyed last year when we planned and executed our first Field Day event in Queen Creek.

This year, we do not have the Town facility at Founder's Park available. Since an outdoor event in late June would not be very comfortable here in the Valley, our only option is to hold our event out of the Valley and in a much more comfortable climate. We have chosen the Rim country near Payson.

Firstly, let's describe what Field Day is to hams. Here is what the ARRL<http://www.arrl.org/field-day>has to say about Field Day:

*"ARRL Field Day is the single most popular on-the-air event held annually in the US and Canada. On the fourth *
*weekend of June of each year, more than 35,000 radio amateurs gather with their clubs, groups or simply with *
friends to operate from remote locations.
*
*
*Field Day is a picnic, a campout, practice for emergencies, an informal contest and, most of all, FUN! *
*It is a time where many aspects of Amateur Radio come together to highlight our many roles. While some will treat *
*it as a contest, other groups use the opportunity to practice their emergency response capabilities. It is an excellent *
*opportunity to demonstrate Amateur Radio to the organizations that Amateur Radio might serve in an emergency, *
*as well as the general public. For many clubs, ARRL Field Day is one of the highlights of their annual calendar. *
*The contest part is simply to contact as many other stations as possible and to learn to operate our radio gear in *
abnormal situations and less than optimal conditions
*
*
*We use these same skills when we help with events such as marathons and bike-a-thons; fund-raisers such as walka-thons; celebrations such as parades; and exhibits at fairs, malls and museums – these are all large, preplanned, *
non-emergency activities.
*
*
*But despite the development of very complex, modern communications systems – or maybe because they ARE so *
*complex – ham radio has been called into action again and again to provide

communications in crises when it *
*really matters. Amateur Radio people (also called “hams”) are well known for our communications support in real *
disaster and post-disaster situations."

Field Day 2013 takes place from Saturday, June 22 @ 11 AM local time through Sunday, June 23 @ 2 PM. While some ham radio clubs focus on the contest portion exclusively, we at QCARC / QCECG have several objectives:

1. Expand the event to include non-contest radio operations. This allows for a relaxed environment where teaching, learning, and providing hands-on experience to new and experienced hams is our first and most important priority.

2. Allow for exposure to more than just radio operations. We will be using battery power, solar charging systems, multiple types of antenna systems, and also experiment with communications via VHF and UHF. These activities will provide an excellent opportunity for hams to learn about power management, transmission systems, antenna setups, and to become prepared for their own radio operations for camping, prepping, communications from remote sites, and field operations in general.

3. Combine camping skills with our field radio operation skills. Learn from this experience and share that knowledge with our local ham community. We know many of you enjoy camping. Why not combine radio and camping?

4. Join in with fellow hams across North America in the best field operations event of the year.

We are planning to arrive early - actually 2 days earlier. The plan right now is to arrive on the afternoon of Thursday, June 20 for camp setup and basic radio operations setup. Dennis, KF7RYX, will provide a large community covered space that participants can use for rest and overnight stays. An easy-up will be setup for radio operations before and during the actual contest period. We will probably setup about 3-5 complete stations for HF and VHF/UHF operations.

We encourage day participants, overnight participants, and full event participants. Planning is key. The logistics involved demand great planning and an accurate assessment of participants. For this reason, we will announce a formal planning meeting very soon for all interested parties. We are not limiting this event to hams only! We want anyone interested to attend - ham wannabes, experienced hams, and friends and family of hams. We know that not everyone interested can attend the entire event so if a day trip suits your schedule - great, if an overnight trip works for you, that's great too.

Let's talk about the location. We have chosen the Rim country, just North and East of Payson. It seems the best area for our purposes considering altitude, expected weather, and close proximity to our home area.

Please download the attached Google Earth file. Click on it and it will launch Google Earth (must already be installed on your PC or laptop) and then GE will load a narrated video tour of the three sites we have chosen as potential sites for base camp and Field Day operations.

We ask that you strongly consider joining us for this event and to not pass up the opportunity to have a great time while experiencing one of the most rewarding events that a ham can attend. Our overall goal is to have fun and you won't be disappointed.

There will be more information coming soon, so stay tuned (shameless pun). In the meantime, if you have any questions, just contact me or Dennis by email or via the Ocotillo repeater.

- Dennis, KF7RYX - legal-ease@...

- Joe, N2QOJ - jsammartino@...

I'd also like to thank Dennis for his very strong support of this event. We are fortunate to have several local hams that have been very supportive of any and all efforts to ensure anyone interested in ham radio and emergency communications has the opportunity to learn and gain hands-on experience while having fun.

Best regards,

Joe, N2QOJ

2259. Baofeng uv-5r programming question

Yahoo group: Queen_Creek_Hams
Date: 2013-05-20 14:50:36 UTC
From: corbett.mortensen
Topic: 2259 Message: 2259

Hey, I just picked up a Baofeng UV-5R and I'm wondering if there is a program out there like the Powerwerx program for my Wouxun, that I can use to program the Baofeng? I want to get all of the repeater info that we frequent programmed into it. Maybe it comes with it in the box, but I couldn't tell from the description.

Thanks for the help.

2260. Baofeng UV-5R Purchase Options; Defects

Yahoo group: Queen_Creek_Hams
Date: 2013-05-20 14:59:55 UTC
From: Kenn Burnell
Topic: 2260 Message: 2260

We have a lot of Options when ordering a UV-5Rnnn.

They presently come in five colours, two major case configurations, and a couple of back-light display options; many come standard, with an ear-bud-microphone.

Then, one has to decide where to order the radio from - a U.S.A. distributer, a Chinese distributer, a Hong King distributer or, a foreign distributer with a U.S. warehouse.

Warranties vary from 90 days to one year and some distributors offer an extended warranty. Some credit cards (Discover and some VISA cards) offer an extended warranty. The hardware warranty is with your distributor, not the original
Chinese DISTRIBUTOR, BaoFeng, who are *designers* and distributors, not manufacturers.

Defective radio - if you get a defective radio (like my wife just did), the warranty is with your distributer, If you purchased your radio from the East, return postage is about US$35 and one trip takes about two weeks. Postage in the U.S.A. is about U$D 6.00 and time to the distributor is about two days.

Lots of decisions to make ...

73,

Kenn, WB7OSR

2261. Arizona Emergency Net - Maricopa, 5/20/2013, 9:00 pm

Yahoo group: Queen_Creek_Hams
Date: 2013-05-20 15:01:07 UTC
From: Queen_Creek_Hams@yahoogroups.com
Topic: 2261 Message: 2261

Reminder from: Queen_Creek_Hams Yahoo! Group
http://groups.yahoo.com/group/Queen_Creek_Hams/cal

Arizona Emergency Net - Maricopa
Monday May 20, 2013
9:00 pm - 10:00 pm
(GMT-07.00) Mountain Time (US & Canada)
Location: 147.24 ( ) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes:
AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

2265. Re: [Queen_Creek_Hams] Baofeng UV-5R Purchase Options; Defects

Yahoo group: Queen_Creek_Hams
Date: 2013-05-20 15:21:56 UTC
From: Jay
Topic: 2260 Message: 2265

I'm not super keen on purchasing from overseas markets, having done this several times and then having to cancel credit cards soon after for fraud... COULD have been unrelated.. but..

I went with Kurt at Threeoldcrows.com
http://threeoldcrows.com/shop/magento/ham-radio-equipment/handheld-radios.html

Based upon the Baofeng user group reviews.
Great guy, took the time to trade several detailed emails with me about all of the "models" of the radios as well as what I was looking to do with them (make them into APRS trackers).
He answered CHIRP (programming software) questions as well as dispelled the myths regarding the "models" of the radios.
The short of it is, all of the radios from the UV-5R to the BF-F8 and BF-F9 ALL have the same processor and hardware in them.
The case, button placement, screen color and lack of flashlight (The BF-F8 does not have one) are some of the cosmetic differences.
However, when you power them up to show the firmware, they are all based around the same radio.

Shipping was fast and he had everything one could want for the radio, from better HT antennas to battery eliminators.

From: Bruce Barnes
Topic: 2259 Message: 2266

If you want to stop by I can program your radio Corbett. I'm using CHIRP
and I have the correct cable.

Cheers,
Bruce

From: Jay
Topic: 2259 Message: 2267

I agree with Joe,
CHRIP is the want to go. Simple to use, once you get past the minor display hiccups.

Here is the basic run down.
Get the software. Free download.
Install it.

Get a programming cable (or borrow one). You might have to download some drivers from the web to get it to play nice with your machine.
I got mine off ebay and it shipped with the small CD which is useless to anyone with a laptop, so I emailed them and downloaded the drivers from their site. Works fine.

1. Connect the radio. DOWNLOAD / IMPORT the file from the radio into chirp.
2. This will allow you to later UPLOAD your frequencies back to the radio. You have to download what you have in it now first. (It could be nothing, or a few freqs from the factory).
3. Get a file of existing frequencies that we all use here, and copy and paste them into YOUR file.
3.a Chirp is cool in that it opens "new files" in tabs, so you can just click over.
3.b First "GOT YA" CHIRP wants to only show you the first 25 memories. You can change that by selecting a higher range of the final memory. (I selected 1 to 100).
4. Paste the memories from another CHIRP file (Joe, myself, others have them) into YOUR file.
5. Save the file as an ".img" (Ex. mine is n1rwy_QCAZ_WX_GRMS_FRS_FLAG.img) (As I have frequencies for all of those "areas" in mine).
6. Upload the image file into the radio.
7. Done!

From there you can play with the settings, display, scanning, voice, etc.

This looks like a great plan Joe, wish I would be in the area to ham it up
with you all.
I will be back in Maine for work this weekend.

ANY idea on the club call that will be used?
I will be on the air some over the weekend (20M in my jeep) and I could
look for you, love to work you all.

2272. Fun with BaoFeng Models

Yahoo group: Queen_Creek_Hams
Date: 2013-05-21 00:24:41 UTC
From: kenn_burnell
Topic: 2272 Message: 2272

Is it a BaoFeng UV-B5, UV-B6 ...? No, it's a YueHong! Or. is it ...?

As previously mentioned, there are gobs of Chinese companies creating cases for dual band HTs in Fujian Provence, China that look, feel and operate like the UV-5R that many of us know and love. Many of them have the BaoFeng label on the top front section of the radio. Many of the radios have slight variations in the cases, buttons and knobs. Inside, thay are almost identical.

Q: Which is the Newest version of the UV5R series?
A: The UV-5R is a generic transceiver.
There are various models available, such as
UV-5R, RA, RB, RC, RE, RUU, R+, Mk II, UV-E5, F8, F9, F11,
etc.
Other than Case and Color, they are the same radio.
(rebranded)
If you have the newest firmware, you have the newest radio.

How about the (critical) firmware - the internal "software" that makes the radio run? See below.

Just for fun, are a few of the "alternate" models. Note the two knobs on top of the sleek UV-B5. The UV-B6 looks more like the UV-5 except it has a sleeker looking case. BEWARE, the "alternate" cases do not take the same batteries!

Great info Kenn,
This along with user CHIRP files should be added to the yahoo group page for our expanding Baofeng community.

Thanks Bruce. I'm gone until Friday. I'll ping you then. Or if you have a "CHIRP file" that you use and want to email it to me, that can work too. I have the Wouxun cable which supposedly works. Either way works for me.

Thanks.

Folks,

Now that we have more activity on this Group with many more emails being distributed daily, some of you may not want to receive many emails from the Group every day.

You have some choices on how you receive emails from this Group.

You can visit the Group on-line and edit your membership for the following email options:

- *Individual emails* - Use this setting if you want to receive an email for every Group posting.

- *Daily Diges*t - Use this setting if you want to receive on ONE email per day. That email will contain a digest of all Group postings for each day. RECOMMENDED If you use this setting and wish to respond to a message in the original email, be sure to trim your responses of the original text and to change the subject line to reflect the topic you are responding to.

- *Special Notices* - This setting will only send to you email posting that have been marked as Special Notices. Only use this setting if you like to review the Group messages on-line and not via email. If you select this option, be sure to be diligent about visiting the Group on-line frequently or you will miss out on a lot of useful information.

- *Web Only* - No emails will be distributed to you. DO NOT USE THIS SETTING.

Also, this is the same place to visit to change your email address for Group membership should you have a need to do so.

If you have any questions, direct them to me privately.

Regards,

Joe, N2QOJ

From: kf7mca
Topic: 2258 Message: 2280

Just voted in the poll for field day (planning on being there for entire event and learning as much as I can!). My daughter will probably join me on Sat/Sun (with any luck she'll have her Technician's license by then).

I just passed General test last night... thanks to the QC ARC group for posting the testing center info / reminder for Mesa testing center time and location.
Now all I need is an HF radio (and antenna) and I'm ready to roll. ;)

Thanks,
Rick

Rick,

Thank you for your upcoming participation at our Field Day event. It will be an awesome experience.

And congratulations on passing the General class license!

We'll have plenty of HF radios for you to play with at Field Day. We'll have all night Thursday and Friday to play before the official contest portion. You will be an experienced HF operator by Friday.

Good luck to your daughter - that's great that she is becoming a ham.

Let us know if we can help in any way.

Regards,

Joe, N2QOJ

2282. My first HF radio - need help, what should I buy?

Yahoo group: Queen_Creek_Hams

From: kf7mca
Topic: 2282 Message: 2282

I am a 'new ham'. After many years of wanting to get into ham radio I got my Technician license about 2 years ago but didn't do anything with it.

I got an 2M/70cm HT (Yaesu FT-60) a couple weeks ago and started having fun with VHF/UHF simplex/repeaters/nets, etc.

I just upgraded to General because I really want to do HF.
I understand there is probably no single answer to this question but I'm looking for advice on what I should look at in terms of my first HF radio for home use.

Scott (KB9JTN) provided some ideas at the last QC Hams breakfast but I thought I'd create a topic for this and try to harness the vast knowledge the folks in the group that had an opinion.

Some of the things that would be important to me:
- I'm interested in working the US states for starters and move on to international DX via voice/phone.
- Radio doesn't have to be brand new... New or used equipment is fine with me.
- I would prefer to buy something that had more modes/features in it so I could play around and figure out what I like doing rather than patch a bunch of gear together over time.
- I have an office/den in my house which will be my 'shack' but I don't want to go bananas with stacks of gear filling up a whole wall.
- I'm interested in packet/data (I have a healthy computer/IT/networking background)
- I've heard about software defined radios and this would very interesting to me if they are practical (I have some programming background if that would help in this area).
- In the future I would like to tinker with building kits and dive into the electronics
- I live in a standard HOA type of community... I'm not going to be erecting any massive antennas (Scott said he had some good experience with stealth antennas)
- I am interested in CW but will save that for a later date.
- And most important... I'm impatient and I want to get started NOW!!!!!!! :)

Thanks in advance,
Rick Krieger

Dennis would be a good resource. We has what I would recommend in his go box. On the Software Radios give me a call and I would be happy to talk to you. They are great and a lot of options. You'll need to set a price point and if you want it to be able to be mobile.

About a year and a half ago I was exactly where you are today. Had just passed the General and wanted to get into HF. you will be limited only by your budjet. I put a good deal of study into this and made the decision to go with the Kenwood TS-2000. It is referred to as the Shack in a Box. It is all mode, all bands. In other words, it covers everything from 70cm to 160m and all modes (AM, FM, CW, FSK, SSB, etc.). Now I am not suggesting that you need to buy the same radio that I have. I really like it but it may not be what you want.

What I would suggest is to take a look at my setup and a few others who have HF radios and get a few ideas. My setup is the all in one box. Others have gone with separate radios for HF and U/V. I believe there are advantages and disadvantages to both. A big advantage is the conservation of space with the all in one box. A small disadvantage is that a dedicated HF radio may have a slight advantage in performance. You would most likely not see the difference without test equipment.

Next I would address the antenna. A poor radio with a great antenna will out perform a great radio with a poor antenna every time. Too many people spend a lot of money on the radio and scrimp on the antenna. I went with the GAP Titan DX antenna. It is a vertical antenna that does not need radials (long wires streaching out in all directions). It is a good antenna but not a great antenna. Bigger is usually better. I am in an HOA as well, and it is a good compromise on stealth and perfromance. I talk to people all over the world with little difficulty. It is good for 80m to 10m, so again not need for an antenna farm to draw attention.

I would suggest that after you have looked at a few options and done your own homework, get the best antenna and radio that you can comfortable afford. It will be cheaper in the long run.

Next new vs used. I have done both and so far, had good luck with both. If buying used, either know what you are buying or have someone along who does. If you have a little patience you can shop around on Craigs List and Ebay and get some pretty good deals. Radios do NOT depreciate as much as you might think. Most things on Ebay hold their value well and sell for almost new prices. It is the occasional deal that comes along that you are looking for. I have done very well on both Craigslist and Ebay, but you have to be willing to wait for the deal.

New comes with a warranty that you will not get with used. If you catch a good sale, then there are some definite benefits for getting a new radio. I did have to send one back in for warranty...actually two. The warranty was nice. If the equipment is over a year old, most likely you will not have any problems. If they are defective, it will usually show up in the first year. On the flip side, you do not want a 20 year old radio either.

Hope this helps. I and others with the HF radios will be glad to have you come by and do a little hands on research.

Rick,

Don't pass up the opportunity to visit with Dennis. Many others have visited and they are glad they did.

By the way, the original description of your technical interests and proposed shack layout points to the TS-2000. It even has built in TNC - terminal node controller - for packet operations, computer control, remote control, and many more features that you can grow in to.

Regards,

Joe, N2QOJ

Rick,
Congrats on the upgrade.
Dennis has a great summary below, I think based upon what you are looking for, an all band all mode rig is what you will be looking for, then you can dedicate your ht to packet / aprs. If you are a networking geek, APRS is something to check out.. fun stuff.
Working dx vs working state side isn't any harder when the bands are open, as an example, tonight with 20w and a hamstick dipole, (two hamstick antennas for mobile HF operation configured like a dipole antenna) above the motorhome I worked more DX than US stations!

Antennas and feedline are critical, but know that you can work the world with a dipole up in your attic if HOA is real picky. There are all sorts of stealth options for antennas.
Since Dennis mentioned the Kenwood, I should jump in and say the Yaesu rigs are good as well.. :-)
The Ft847, ft847, ft100 all great rigs.

You posed a great question, or set of questions.. Take lots of good notes. I would be happy to demo what radios I run if you were interested, I lurk on the QC repeater quite a bit.

2287. Re: [Queen_Creek_Hams] My first HF radio - need help, what should I buy?

Yahoo group: Queen_Creek_Hams
Date: 2013-05-23 05:35:48 UTC
From: Joe Sammartino
Topic: 2282 Message: 2287

I second Jay's comment about Yaesu.

The Ft-847 is an excellent all mode, all band radio. That is what Scott has.

It is not in production but would be at the of my list as a used modern rig.

Regards,

Joe, N2QOJ

* As a second to Joe who has been there quite a long while which is actually a good indicator of a good Elmer. Some one who has more than than one radio and antenna system. I can agree
*

* I am a snowbird and use a Kenwood TS-2000X. Its small enough to carry between Michigan and QC. I does everything so I'm ready on either end. It has an available remote control head the size of the one used for a VHF/UHF mobile that connects with standard modular connectors. Or it can be controlled remotely with a mobile or HT dual band FM radio (Kenwood units enhance this feature.) It has built in three CW canned messages. With an available option to have canned voice also. Radios are a very competitive item and the performance of equally priced radios is pretty much the same among the brands. Remember that Ten Tec, and Elecraft are US companies that make radios equal to rice boxes. The K3 has a receiver second to none.
As for antennas I have found all antennas work, just some work better than others. I recommend to my students They leave the availability to add more or change antennas. They're cheaper than radios so you may try to add or change them more often. You may even borrow an extra antenna from an old ham that has six lying around.

Subject: Re: [Queen_Creek_Hams] My first Hits are designed to enhance this. F radio - need help, what should I buy?

Rick,
Don't pass up the opportunity to visit with Dennis. Many others have visited and they are glad they did.
By the way, the original description of your technical interests and proposed shack layout points to the TS-2000. It even has built in TNC - terminal node controller - for packet operations, computer control, remote control, and many more features that you can grow in to.

Hey all,
As I am getting my shack(s) (home, recumbent solar cycle and Motorhome)
back up on the air, I was wondering if there was a majority of folks who
are doing the "activities in the park" as well as the Emergency Comms, and
the Field Day experiences, standardizing their power connectors?

I was leaning towards the Anderson powerpole connections for cross
compliance with others in the group.

What are you all using for power connections?

Thanks

- Jay N1RWY

2294. Queen Creek Field Day 2013 Meeting

Yahoo group: Queen_Creek_Hams
Date: 2013-05-27 03:50:07 UTC
From: Joe Sammartino
Topic: 2294 Message: 2294

Folks,

There will be a planning meeting for QC Field Day 2013 at the Town Hall building on Thursday evening at 7 PM.

If you are planning on attending Field Day, and/or are interested to learn more about this event, please join us. This is an important meeting since we will be reviewing the planned site and discussing the logistics of the event.

There is a lot to get done to make this event successful, so please attend. This event is open to all - hams and non-hams that want to see what ham radio and emergency radio communications are all about.

When: Thursday, May 30th at 7 PM

Where: Queen Creek Town Hall, 22350 S. Ellsworth Road, Queen Creek, AZ 85142 (same as QCECG meeting location)

Regards,

Joe, N2QOJ

2295. Arizona Emergency Net - Maricopa, 5/27/2013, 9:00 pm

Yahoo group: Queen_Creek_Hams
Date: 2013-05-27 15:01:07 UTC
From: Queen_Creek_Hams@yahoogroups.com
Topic: 2295 Message: 2295

Reminder from: Queen_Creek_Hams Yahoo! Group
http://groups.yahoo.com/group/Queen_Creek_Hams/cal

Arizona Emergency Net - Maricopa
Monday May 27, 2013
9:00 pm - 10:00 pm
(GMT-07.00) Mountain Time (US & Canada)
Location: 147.24 ( ) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes:
AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

2296. Re: [Queen_Creek_Hams] My first HF radio - need help, what should I buy?

Yahoo group: Queen_Creek_Hams
Date: 2013-05-28 05:53:00 UTC
From: kf7mca
Topic: 2282 Message: 2296

Thank you everyone... Joe, Jay, Dennis, Jim, Tom & Tom for all of your input!!!!
I really appreciate it!!!!

So here is where I'm at right now...
My plan is to go with the Kenwood TS-2000($1,500 at HRO I Phoenix), a "Ventenna" for VHF/UHF and a horizontal dipole in my attic to get started. Since I live in a new home community I know I need to try and erect a vertical HF antenna ASAP but I'm impatient and want to get on the air now so I will work on that as soon as a I can. (got the stamp of approval on the TS-2000 today from my uncle - retired Xerox, electrical eng, old time ham.... He said he has one of the predecessor models of this).

I am itching to build something such as a Software Defined Radio or small QRP transceiver but that is going to have to wait until I get on the air and make some QSOs and get rolling first.

I've got a lot of research to do and will do my best to update this forum topic with my learnings and progress.

Thanks,
Rick
KF7MCA

P.S. I'm fired up about Field Day!!!!

It has an available remote control head the size of the one used for a VHF/UHF mobile that connects with standard modular connectors. Or it can be controlled remotely with a mobile or HT dual band FM radio (Kenwood units enhance this feature.) It has built in three CW canned messages. With an available option to have canned voice also. Radios are a very competitive item and the performance of equally priced radios is pretty much the same among the brands. Remember that Ten Tec, and Elecraft are US companies that make radios equal to rice boxes. The K3 has a receiver second to none.
>
> As for antennas I have found all antennas work, just some work better than others. I recommend to my students They leave the availability to add more or change antennas. They're cheaper than radios so you may try to add or change them more often. You may even borrow an extra antenna from an old ham that has six lying around.

> About a year and a half ago I was exactly where you are today. Had just passed the General and wanted to get into HF. you will be limited only by your budjet. I put a good deal of study into this and made the decision to go with the Kenwood TS-2000. It is referred to as the Shack in a Box. It is all mode, all bands. In other words, it covers everything from 70cm to 160m and all modes (AM, FM, CW, FSK, SSB, etc.). Now I am not suggesting that you need to buy the same radio that I have. I really like it but it may not be what you want.
>
> What I would suggest is to take a look at my setup and a few others who have HF radios and get a few ideas. My setup is the all in one box. Others have gone with separate radios for HF and U/V. I believe there are advantages and disadvantages to both. A big advantage is the conservation of space with the all in one box. A small disadvantage is that a dedicated HF radio may have a slight advantage in performance. You would most likely not see the difference without test equipment.
>
> Next I would address the antenna. A poor radio with a great antenna will out perform a great radio with a poor antenna every time. Too many people spend a lot of money on the radio and scrimp on the antenna. I went with the GAP Titan DX antenna. It is a vertical antenna that does not need radials (long wires streaching out in all directions). It is a good antenna but not a great antenna. Bigger is usually better. I am in an HOA as well, and it is a good compromise on stealth and perfromance. I talk to people all over the world with little difficulty. It is good for 80m to 10m, so again not need for an antenna farm to draw attention.
>
> I would suggest that after you have looked at a few options and done your own homework, get the best antenna and radio that you can comfortable afford. It will be cheaper in the long run.
>
> Next new vs used. I have done both and so far, had good luck with both. If buying used, either know what you are buying or have someone along who does. If you have a little

patience you can shop around on Craigs List and Ebay and get some pretty good deals. Radios do NOT depreciate as much as you might think. Most things on Ebay hold their value well and sell for almost new prices. It is the occasional deal that comes along that you are looking for. I have done very well on both Craigslist and Ebay, but you have to be willing to wait for the deal.
>
> New comes with a warranty that you will not get with used. If you catch a good sale, then there are some definite benefits for getting a new radio. I did have to send one back in for warranty...actually two. The warranty was nice. If the equipment is over a year old, most likely you will not have any problems. If they are defective, it will usually show up in the first year. On the flip side, you do not want a 20 year old radio either.

Tom,
Have great fun with your purchase.
Make sure to check out PSK31 when you want some "keyboard HF" action, where you don't have to talk to have qso's, rather your type with your keyboard. Well.. the only talking you do is when you say "WHOOP!" and throw your fist in the air when a rare DX contact comes back to your PSK31 signal.. ;-)

Good luck!

- Jay N1RWY

:). LOL
Yes, I'm definitely interested in PSK31.

>>>
>>> I am a snowbird and use a Kenwood TS-2000X. Its small enough to carry between Michigan and QC. I does everything so I'm ready on either end. It has an available remote control head the size of the one used for a VHF/UHF mobile that connects with standard modular connectors. Or it can be controlled remotely with a mobile or HT dual band FM radio (Kenwood units enhance this feature.) It has built in three CW canned messages. With an available option to have canned voice also. Radios are a very competitive item and the performance of equally priced radios is pretty much the same among the brands. Remember that Ten Tec, and Elecraft are US companies that make radios equal to rice boxes. The K3 has a receiver second to none.
>>>
>>> As for antennas I have found all antennas work, just some work better than others. I recommend to my students They leave the availability to add more or change antennas. They're cheaper than radios so you may try to add or change them more often. You may even borrow an extra antenna from an old ham that has six lying around.

>>>
>>> About a year and a half ago I was exactly where you are today. Had just passed the General and wanted to get into HF. you will be limited only by your budjet. I put a good deal of study into this and made the decision to go with the Kenwood TS-2000. It is referred to as the Shack in a Box. It is all mode, all bands. In other words, it covers everything from 70cm to 160m and all modes (AM, FM, CW, FSK, SSB, etc.). Now I am not

suggesting that you need to buy the same radio that I have. I really like it but it may not be what you want.
>>>
>>> What I would suggest is to take a look at my setup and a few others who have HF radios and get a few ideas. My setup is the all in one box. Others have gone with separate radios for HF and U/V. I believe there are advantages and disadvantages to both. A big advantage is the conservation of space with the all in one box. A small disadvantage is that a dedicated HF radio may have a slight advantage in performance. You would most likely not see the difference without test equipment.
>>>
>>> Next I would address the antenna. A poor radio with a great antenna will out perform a great radio with a poor antenna every time. Too many people spend a lot of money on the radio and scrimp on the antenna. I went with the GAP Titan DX antenna. It is a vertical antenna that does not need radials (long wires streaching out in all directions). It is a good antenna but not a great antenna. Bigger is usually better. I am in an HOA as well, and it is a good compromise on stealth and perfromance. I talk to people all over the world with little difficulty. It is good for 80m to 10m, so again not need for an antenna farm to draw attention.
>>>
>>> I would suggest that after you have looked at a few options and done your own homework, get the best antenna and radio that you can comfortable afford. It will be cheaper in the long run.
>>>
>>> Next new vs used. I have done both and so far, had good luck with both. If buying used, either know what you are buying or have someone along who does. If you have a little patience you can shop around on Craigs List and Ebay and get some pretty good deals. Radios do NOT depreciate as much as you might think. Most things on Ebay hold their value well and sell for almost new prices. It is the occasional deal that comes along that you are looking for. I have done very well on both Craigslist and Ebay, but you have to be willing to wait for the deal.
>>>
>>> New comes with a warranty that you will not get with used. If you catch a good sale, then there are some definite benefits for getting a new radio. I did have to send one back in for warranty...actually two. The warranty was nice. If the equipment is over a year old, most likely you will not have any problems. If they are defective, it will usually show up in the first year. On the flip side, you do not want a 20 year old radio either.
>>>
>>> Hope this helps. I and others with the HF radios will be glad to have you come by and do a little hands on research.

2300. Field Day meeting tomorrow night

Yahoo group: Queen_Creek_Hams
Date: 2013-05-29 18:49:12 UTC
From: Joe Sammartino
Topic: 2300 Message: 2300

Folks,

We need more participants for field day!

There will be a calendar reminder coming out later this evening for our meeting tomorrow night at Queen Creek Town Hall @ 7 pm.

Please attend to learn more about this fantastic event.

Regards,

Joe, N2QOJ

2301. QC Field Day 2013 Planning Meeting, 5/30/2013, 7:00 pm

2302. videos from the Rim

Yahoo group: Queen_Creek_Hams
Date: 2013-05-30 06:57:12 UTC
From: Joe Sammartino
Topic: 2302 Message: 2302

Folks,

Check out these short videos of our recent trip to the Rim to scout Field Day sites:

http://youtu.be/4HBTy8tL0kw - Camp site tour

http://youtu.be/3v-sd9QyMYM - Surprising QSO using QC Repeater

http://youtu.be/R8whefQXxi8 - Antenna orientation

http://youtu.be/x3TpnE7jaEo - HF in action

KF7RYX, KF7E, KF7MCA, and N2QOJ had a great time.

Regards,

Joe, N2QOJ

2306. Wouxun HT For Sale

Yahoo group: Queen_Creek_Hams
Date: 2013-05-31 05:44:15 UTC
From: Joe Sammartino
Topic: 2306 Message: 2306

Folks,

AB7JF, Fred, has an almost new Wouxun dual band HT available for sale. It still has the plastic cover protection on the display.

It includes the following items:

- original battery
- battery pack for double A batteries
- Car battery eliminator cable

Price: $90

If you are interested, please contact Fred directly via email fredbollinger@....

Regards,

Joe, N2QOJ

From: Joe
Topic: 2306 Message: 2307

I forgot to add that the HT also comes with all the standard accessories also, i.e. AC charger, etc.

Fred can be reached at 480-242-8606

Regards,

Joe, N2QOJ

Going to the movies???

or....

- erecting a dual band vhf/uhf antenna
- building a long wire HF antenna from number 14 wire and ladder/window line
- learning how to use your new LDG autotuner
- learning how to use your new Kenwood TS-2000
- building your ham shack to make your first contact tonight

or....

finding another lost credit card

LOL.... Unfortunately, none of the above tonight. :(Will have to wait to tomorrow.

Got home, ready to tear onto it and the dog was sick.... I had to take him to animal hospital...
Way out at Ironwood and combs!
(looks like dog will be ok)

Didn't get home till 9:30. I have been scoping out the attic and planning the route for the HF antenna. Will get an early start tomorrow AM.

I 'think' the antenna route is going to be perfect. 44' feet on each side, 90 degree angle at feed point, one side is exactly NS and the other EW.

It will be all horizontal and mounted very close to the top of the rideline of the attic... with the exception of a 3' drop starting at the feed point going about 10' along one of the legs
(ie 10' run to loose 3' of elevation) and then horizontal to the end of that leg (it is the NS leg).
Do you think that is ok or do you think I need to work hard to keep the whole thing horizontal.
Unless someone screams 'stop' I'm going to try it and 'use the force'. :)

Re the tuner... I'm probably going to set it on the desk and not use the ladder line for starters.
I think i want to have the option to manually tune if necessary and more importantly... I 'must' see the flashing lights! :)
It actually has a set of simple LEDs that gives you an idea of what the SWR is which I know will be useful.

Derrick, you saved me $50! They matched that digiparts price. Owe you one.

Thanks for all the help and encouragement everyone!

I was hoping to see an update....

Sorry to hear about the dog, hope all is well in K9 area.

I did find my N to SO-239 adapter. Let me know if you need it.

I read the manual on the Z11-ProII tuner. If you are using the recommended balun with the ladder line and coax run to the radio, you should have all the flexibility you need run the transmission line to the radio anyway that works best.

As for the 90 degree orientation of the antenna, you'll have to experiment to see what results you get.

Looking forward to your next update.

Regards,

Joe, N2QOJ

:). Haha. Thanks for the wakeup call.

Suns up, time for me to get the bagels for the kids, install the antennas and radio and then if I'm lucky (5 hours later) can finally start playing.

Fingers crossed. I'll take some pictures and post progress later.

Thanks for the offer Jay but my dog is sick and I'm back at the vet with him now.
Looks like I have to delay launch... If the dog is feeling better and it's not too late I may work on it some more but I have no idea when that will be.

Thanks Jay. Still at vet.

He is now on 6 medicines and mandatory bed rest. :(

This is not the kind of 'DOg X-ray' you are supposed to get with your first HF station..

Good luck though.

Thanks Jay. Still at vet.

He is now on 6 medicines and mandatory bed rest. :(

Way out at Ironwood and combs!
(looks like dog will be ok)

Didn't get home till 9:30. I have been scoping out the attic and planning the route for the HF antenna. Will get an early start tomorrow AM.

I 'think' the antenna route is going to be perfect. 44' feet on each side, 90 degree angle at feed point, one side is exactly NS and the other EW.

It will be all horizontal and mounted very close to the top of the rideline of the attic... with the exception of a 3' drop starting at the feed point going about 10' along one of the legs
(ie 10' run to loose 3' of elevation) and then horizontal to the end of that leg (it is the NS leg).
Do you think that is ok or do you think I need to work hard to keep the whole thing horizontal.
Unless someone screams 'stop' I'm going to try it and 'use the force'. :)

Re the tuner... I'm probably going to set it on the desk and not use the ladder line for starters.
I think i want to have the option to manually tune if necessary and more importantly... I 'must' see the flashing lights! :)

It actually has a set of simple LEDs that gives you an idea of what the SWR is which I know will be useful.

Derrick, you saved me $50! They matched that digiparts price. Owe you one.

Thanks for all the help and encouragement everyone!

East Valley Repeater Group
Monday June 3, 2013
8:00 pm - 9:00 pm
(GMT-07.00) Mountain Time (US & Canada)
Location: 449.825 (-) PL 100

Notes:
We are a group of Amatuer Operators that have formed this group to provide emergency communications for two East valley hospitals. The two hospitals are the Chandler Regional Hospital located at 475 S. Dobson Rd. and the Mercy Gilbert Hospital located at 3555 S. Val Vista Dr.
Our home repeater is located in Gilbert AZ on the Mercy Gilbert hospital with a coordinated frequency of 449.825 with a 100.0 PL and a minus offset. A repeater on the Chandler Regional hospital is in the works and when ready will become our back-up frequency.
Everyone is welcome to join our net on Monday night at 8:00 P.M. on the 449.825 repeater.

:). Dog is doing better but no bueno on HF. I must have something set wrong on transceiver or antenna tuner not working correctly? No matter what I do I get the same garbly sound on every band when I tune around looking for a QSO. As if I'm finding a conversation but not able to hear it properly.

I'll have to check my antenna tomorrow also.

Yeah, this is fun. :)

2328. Arizona Emergency Net - Maricopa, 6/3/2013, 9:00 pm

Yahoo group: Queen_Creek_Hams
Date: 2013-06-03 15:01:05 UTC
From: Queen_Creek_Hams@yahoogroups.com
Topic: 2328 Message: 2328

Reminder from: Queen_Creek_Hams Yahoo! Group
http://groups.yahoo.com/group/Queen_Creek_Hams/cal

Arizona Emergency Net - Maricopa
Monday June 3, 2013
9:00 pm - 10:00 pm
(GMT-07.00) Mountain Time (US & Canada)
Location: 147.24 ( ) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes:
AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

Shameless self-plug coming!

I'm a distributor for Powerwerx. I operate from my house in SE Chandler,
and ship via USPS, but if you want to make arrangements, you can swing by
and get something most anytime. I don't carry all their stock, but do have
15A and 30A powerpoles. See what I usually have here:
http://byonics.com/cables/powerwerx.php

Byon, N6BG
480 718-9867
Near Gilbert & Chandler Heights Roads

Byon,
I didn't know you followed this group..
Yeah, thank you for the reminder!
I might be hitting you up with a phone call later this week.
Thanks!

From: kf7mca
Topic: 2282 Message: 2332

Big thanks to Joe, Dennis and others that helped me these past few days.
I'll post some pictures of my wacky HF antenna when I get a min.
I was able to make some HF contacts tonight on 20 and 40 meters.
Spoke to Nevada, SoCal, new Mexico and... Wait for it.... Hawaii!!!!

Sent from my iPad

2335. FCC Testing Session, Thursday evening @ 7 PM, June 6

Yahoo group: Queen_Creek_Hams
Date: 2013-06-04 17:35:10 UTC
From: Joe Sammartino
Topic: 2335 Message: 2335

**** Special Announcement ****

This Thursday, June 6th, the Queen Creek Emergency Communications Group will be having a special test session for our students. *The session is also open to all area hams that wish to upgrade to General and Amateur Extra class licenses*. The location is the same as our monthly QCECG meeting - Queen Creek Town Hall, 22350 S. Ellsworth Road, Queen Creek, AZ 85142.

Fred Bollinger, AB7JF, has graciously offered to provide this testing session. If any of you would like to take the test, please bring $15 and a photo ID. If you are already licensed, and wish to test for license upgrade, then you must bring your ORIGINAL license, a copy for the VE team to keep, and the $15 fee. To assist Fred at this session, Volunteer Examiners from QCECG will provide VE services. session.

We need to have an idea of how many folks will attend so If you plan on attending, please send a note directly to Joe, N2QOJ, at jsammartino@.... Feel free to pass this announcement to anyone that may be interested.

Good luck,

Joe, N2QOJ

2337. HF Power Amplifier For Sale

Yahoo group: Queen_Creek_Hams
Date: 2013-06-05 07:50:33 UTC
From: Joe Sammartino
Topic: 2337 Message: 2337
Attachments: 1 described; binary payloads are missing from this source WARC

Folks,

Fred, AB7JF, has an Ameritron AL-80 Power Amplifier for sale.

It is in good condition and recently tested, putting out about 800 watts
from a 110 Volt AC source. It can be rewired for 220 volts also.

Asking Price: $600

The manual for this amplifier is attached.

If you are interested, please contact Fred directly via email
fredbollinger@....

(fredbollinger (at) gmail (dot) com

His phone number is 480-242-8606.

Regards,

Joe, N2QOJ

2343. Finding repeaters at home and for planning trips

Yahoo group: Queen_Creek_Hams
Date: 2013-06-08 21:37:59 UTC
From: Joe Sammartino
Topic: 2343 Message: 2343

Folks,

Recently, two of our local hams had a great question, "Where can I go to find repeaters for my upcoming trip to....".

Here are three good resources that can help you in planning your communications while traveling out of the area:

http://k5ehx.net/repeaters/qrepeater.php

and...

http://www.artscipub.com/repeaters/

and...

http://www.repeaterbook.com/

The one above is interesting. You can get a repeater list by popular highway routes and it also has information on various repeater "systems", i.e. repeaters which are linked to cover very large areas, sometimes multiple states.

For local repeater information, don't forget about the Arizona Frequency Coordinators site at:

http://www.azfreqcoord.org/

This is also a very useful site for hams the Arizona:

http://www.azrepeaters.net/

If you would like to purchase a handy pocket repeater listing book for the entire U.S., then the ARRL has exactly what you need:

http://www.arrl.org/shop/ARRL-Repeater-Directory-Pocket-sized-Edition/

They also have a desktop version:

http://www.arrl.org/shop/ARRL-Repeater-Directory-Desktop-Edition/

And if you would like a CD-ROM version with lots of nice reporting features and real-time tracking:

http://www.arrl.org/shop/TravelPlus-for-Repeaters-CD-ROM/

Regards,

Joe, N2QOJ

East Valley Repeater Group
Monday June 10, 2013
8:00 pm - 9:00 pm
(GMT-07.00) Mountain Time (US & Canada)
Location: 449.825 (-) PL 100

Notes:
We are a group of Amatuer Operators that have formed this group to provide emergency communications for two East valley hospitals. The two hospitals are the Chandler Regional Hospital located at 475 S. Dobson Rd. and the Mercy Gilbert Hospital located at 3555 S. Val Vista Dr.
Our home repeater is located in Gilbert AZ on the Mercy Gilbert hospital with a coordinated frequency of 449.825 with a 100.0 PL and a minus offset. A repeater on the Chandler Regional hospital is in the works and when ready will become our back-up frequency.
Everyone is welcome to join our net on Monday night at 8:00 P.M. on the 449.825 repeater.

Topic: 2349 Message: 2349

Reminder from: Queen_Creek_Hams Yahoo! Group
http://groups.yahoo.com/group/Queen_Creek_Hams/cal

Arizona Emergency Net - Maricopa
Monday June 10, 2013
9:00 pm - 10:00 pm
(GMT-07.00) Mountain Time (US & Canada)
Location: 147.24 ( ) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes:
AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

2350. QCARC website is live!

Yahoo group: Queen_Creek_Hams
Date: 2013-06-10 18:35:11 UTC
From: Joe Sammartino
Topic: 2350 Message: 2350

Folks,

The Queen Creek Amateur Radio Club website is now active.

www.QueenCreekARC.org

The website is not complete but it is a start. Feel free to pass on the
web link to interested parties.

Regards,

Joe, N2QOJ

Thanks, Janet --

I appreciate all input and suggestions for the new website.

If any member would like their photo and info posted, send it to me via
private email.

Likewise, for those of you that have been posted, let me know if you don't
want it there.

Field Day information will be posted there soon.

Thanks,

Joe, N2QOJ

From: Joe Sammartino
Topic: 2258 Message: 2354

Hi Folks,

We have a lot of members in the Group who we haven't heard from regarding the Field Day/Camping trip planned for June 20th through June 23rd.

Please let us know if you are thinking of attending all or part of the event. If you have other commitments but would like to attend a similar event sometime later, let us know.

Just respond here or send me a private email at jsammartino (at) gmail (dot) com. We need to hear from you because we are in the final preparation stage and must have an accurate head count.

Thanks,

Joe, N2QOJ

Joe,

This sounds like a great time, but I will be moving our building/datacenter into a new facility over that weekend.... bummer.

Let me know if you plan another event before year end. I'm hoping to at least try to squeeze in a little hf activity in over that weekend (when I'm not busy with the new building).

Thanks,

Alan

The Dayton Hamfest (*Hamvention 2013*) was held this year from May 17-19.
Now, that was a BIG hamfest!

General Chairman Charles Kaiser, KD8JZR announced today that the
official attendance for Hamvention 2013 was 24,542 attendees.

Without attending this event you won't understand what it is all about. There are four rooms running forums continuously for 2 1/2 days on every subject you an imagine. I only made one this year - APRS with moderator Bob Bruningna. the prizes are drawn continusly and I have won prizes from a T shirt to an Alinco dual band HT. The top 9 prizes totaled $81,000.

Boy Scouts Electronic Swap Meet and Recycling
Sunday June 16, 2013
6:00 am - 10:30 am
(GMT-07.00) Mountain Time (US & Canada)
Location: Scottsdale Pavilions, 9069 east indian bend Road, Scottsdale, AZ

Notes:
Electronicfest is an electronics recycling event and computer swap meet. It was started more than 25 years ago by the boy scouts and their leaders from Troop 446, chartered by Our Lady of Perpetual Help Church in Scottsdale, Arizona.

The Electronicfest is held the 3rd Sunday morning of every month (come rain or shine), from 5:30am to 10:30am, in Scottsdale, Arizona in the 5 & Diner parking lot of the Scottsdale Pavilions Shopping Center (9062 East Indian Bend Road, Scottsdale). Map: http://tinyurl.com/cocky2s .

Proceeds raised at this event help Boy Scouts earn their way to camp, and pay for scouting program.

2383. Mag Mount Antenna Tips

Yahoo group: Queen_Creek_Hams
Date: 2013-06-14 06:38:07 UTC
From: Joe Sammartino
Topic: 2383 Message: 2383

Mag Mount Antenna Tips

Price:

A typical Mag Mount Antenna is priced between $35 and $80.

Remember, the antenna portion - usually the coil base and whip antenna - is reusable on other forms of vehicle mounts such as hatchback mounts, permanent mounts, and larger multiple magnet bases. Just be sure to buy a mount that matches your coil base - NMO or SO-239 (also called UHF) are the most common.

Gain:

Only select a antenna that has clear gain specifications on the packaging or product description.

These type of antennas usually list gain specs for each band that it covers, usually for 2 Meters and 70 Centimeters (440 Mhz).

Acceptable gain specs are about 2.5 db to 4 db for 2 Meters and about 3.5 db to 6 db for 70 centimeters. Of course, the better gain specifications will be higher priced. There are quite a few of dual band antennas that provide no gain for 2 Meters and some gain for 70 centimeters so read the specifications carefully.

About db....most manufactures list db gain without listing whether it is dbi or dbd. It won't matter to much since they all market their products in a similar fashion but dbi is always the larger number so manufactures usually use this in their product descriptions.

dbd is referenced to a dipole. The difference is about 2.15 db between the two.

So, if a manufactures states 6 db of gain at 440 Mhz, you can be pretty sure it is dbi gain and would actually be about 3.85 dbd.

If you want to learn the difference in dbi and dbd, read the following from Wikipedia <http://en.wikipedia.org/wiki/Antenna_gain>:

"Antenna gain is usually defined as the ratio of the power produced by the antenna from a far-field source on the antenna's beam axis to the power produced by a hypothetical lossless *isotropic antenna<http://en.wikipedia.org/wiki/Isotropic_radiator#Antenna_Theory>*, which is equally sensitive to signals from all directions. Usually this ratio is expressed in decibels <http://en.wikipedia.org/wiki/Decibels>, and these units are referred to as "*decibels-isotropic*" (dBi). An alternate definition compares the antenna to the power received by a lossless

half-wave dipole antenna <http://en.wikipedia.org/wiki/Dipole_antenna>, in
which case the units are written as *dBd*. Since a lossless dipole antenna
has a gain of 2.15 dBi, the relation between these units is: *gain in dBd*
= *gain in dBi* - 2.15 dB . For a given frequency the antenna's effective
area <http://en.wikipedia.org/wiki/Effective_area> is proportional to the
power gain. An antenna's effective
length<http://en.wikipedia.org/wiki/Antenna_aperture#Effective_length>
is
proportional to the *square root* of the antenna's gain for a particular
frequency and radiation
resistance<http://en.wikipedia.org/wiki/Radiation_resistance>.
Due to reciprocity<http://en.wikipedia.org/wiki/Reciprocity_(electromagnetism)>,
the gain of any antenna when receiving is equal to its gain when
transmitting."

Here are a couple of examples from HRO and eBay:

Very good antenna but the mount is separate:
http://www.hamradio.com/detail.cfm?pid=H0-000082

An Opek dual band antenna via eBay, good price but minimal gain only:

http://www.ebay.com/itm/2-METER-70-CM-DUAL-BAND-MAGNET-MOUNT-ANTENNA-OPEK-VU-1510-NEW-/190
849167040?pt=US_Radio_Comm_Antennas&hash=item2c6f7f2ec0

A better choice via eBay, this antenna has great gain specs and is 5/8
wavelength, the shipping cost is a little high but overall a very good
value:

http://www.ebay.com/itm/5-8-WAVE-DUAL-BAND-2-METER-440-ANTENNA-BLACK-MAG-MOUNT-/3903381991
79?pt=US_Radio_Comm_Antennas&hash=item5ae1f83e8b

I use a very similar TRAM antenna and mag mount and am very pleased with
it. Do some research and you will quickly start to understand the specs.

Antenna Vendors:

Good Products:

Larsen, Comet, Diamond, Tram

OK Products:

Opek, MFJ

Remember, if you want the most utility from your mag mount, purchase it
with a PL-259 connector and use an adapter with your HT. If you upgrade to
a mobile radio in the future, your initial investment will be directly
usable.

If any of you have some interesting info about your own mag mount purchase
or experience, please share it with us on this Group.

As always, consider your own budget and future needs. You can spend $100-$150 for a very good mobile antenna and may be a better choice if you travel a lot and frequent more remote areas.

One final note - Any mag mount / antenna combination will always outperform a stock handie-talkie.

Regards,

Joe, N2QOJ

Excellent write up Joe, most important part is what you ended with.

One final note - Any mag mount / antenna combination will always outperform a stock handie-talkie.

Even a very cheap mag mount on a baking cookie sheet sitting on you desk next to you will do better than a stock HT antenna. (Not that I encourage sitting next to your antenna.)

A great test for any new ham is to put your HT on 144.390. Listen for the "braaaaaap" sounds of APRS. Count how many you hear in a min, how long they are. Then use you new mag mount antenna. You will hear two to three times the number of signals and they will be stronger. Amazing how much you "miss" when only using an HT antenna. Yes, you can hear the repeater fine, however that mag mount will let you talk further and hear more when running simplex, or trying to reach a more distant repeater.

> >
> > A great test for any new ham is to put your HT on 144.390. Listen for the "braaaaaap" sounds of APRS. Count how many you hear in a min, how long they are. Then use you new mag mount antenna. You will hear two to three times the number of signals and they will be stronger. Amazing how much you "miss" when only using an HT antenna. Yes, you can hear the repeater fine, however that mag mount will let you talk further and hear more when running simplex, or trying to reach a more distant repeater.

If you have a compass in the overhead console mount the antenna rearward.

Subject: [Queen_Creek_Hams] Mag Mount Antenna Tips

Mag Mount Antenna Tips

Price:

A typical Mag Mount Antenna is priced between $35 and $80.

Remember, the antenna portion - usually the coil base and whip antenna - is reusable on other forms of vehicle mounts such as hatchback mounts, permanent mounts, and larger multiple magnet bases. Just be sure to buy a mount that matches your coil base - NMO or SO-239 (also called UHF) are the most common.

Gain:

Only select a antenna that has clear gain specifications on the packaging or product description.

These type of antennas usually list gain specs for each band that it covers, usually for 2 Meters and 70 Centimeters (440 Mhz).

Acceptable gain specs are about 2.5 db to 4 db for 2 Meters and about 3.5 db to 6 db for 70 centimeters. Of course, the better gain specifications will be higher priced. There are quite a few of dual band antennas that provide no gain for 2 Meters and some gain for 70 centimeters so read the specifications carefully.

About db....most manufactures list db gain without listing whether it is dbi or dbd. It won't matter to much since they all market their products in a similar fashion but dbi is always the larger number so manufactures usually use this in their product descriptions.

dbd is referenced to a dipole. The difference is about 2.15 db between the two.

So, if a manufactures states 6 db of gain at 440 Mhz, you can be pretty sure it is dbi gain and would actually be about 3.85 dbd.

If you want to learn the difference in dbi and dbd, read the following from Wikipedia:

"Antenna gain is usually defined as the ratio of the power produced by the antenna from a far-field source on the antenna's beam axis to the power produced by a hypothetical lossless isotropic antenna, which is equally sensitive to signals from all directions. Usually this ratio is expressed in decibels, and these units are referred to as "decibels-isotropic" (dBi). An alternate definition compares the antenna to the power

received by a lossless half-wave dipole antenna, in which case the units are written as dBd. Since a lossless dipole antenna has a gain of 2.15 dBi, the relation between these units is: gain in dBd = gain in dBi - 2.15 dB . For a given frequency the antenna's effective area is proportional to the power gain. An antenna's effective length is proportional to the square root of the antenna's gain for a particular frequency and radiation resistance. Due to reciprocity, the gain of any antenna when receiving is equal to its
gain when transmitting."

Here are a couple of examples from HRO and eBay:

Very good antenna but the mount is separate:
http://www.hamradio.com/detail.cfm?pid=H0-000082

An Opek dual band antenna via eBay, good price but minimal gain only:

http://www.ebay.com/itm/2-METER-70-CM-DUAL-BAND-MAGNET-MOUNT-ANTENNA-OPEK-VU-1510-NEW-/190849167040?pt=US_Radio_Comm_Antennas&hash=item2c6f7f2ec0

A better choice via eBay, this antenna has great gain specs and is 5/8 wavelength, the shipping cost is a little high but overall a very good value:

http://www.ebay.com/itm/5-8-WAVE-DUAL-BAND-2-METER-440-ANTENNA-BLACK-MAG-MOUNT-/390338199179?pt=US_Radio_Comm_Antennas&hash=item5ae1f83e8b

I use a very similar TRAM antenna and mag mount and am very pleased with it. Do some research and you will quickly start to understand the specs.

Antenna Vendors:

Good Products:

Larsen, Comet, Diamond, Tram

OK Products:

Opek, MFJ

Remember, if you want the most utility from your mag mount, purchase it with a PL-259 connector and use an adapter with your HT. If you upgrade to a mobile radio in the future, your initial investment will be directly usable.

If any of you have some interesting info about your own mag mount purchase or experience, please share it with us on this Group.

As always, consider your own budget and future needs. You can spend $100-$150 for a very good mobile antenna and may be a better choice if you travel a lot and frequent more remote areas.

One final note - Any mag mount / antenna combination will always outperform a stock handie-talkie.

Regards,

Joe, N2QOJ

2389. Queen Creek Field Day 2013

Yahoo group: Queen_Creek_Hams
Date: 2013-06-15 16:19:07 UTC
From: Joe Sammartino
Topic: 2389 Message: 2389

Hi Folks,

Here is the latest update (exact site) and some background information regarding our Camping / Field Day event scheduled for June 20th through June 23rd. There is some additional new information regarding the area as well.

Since an outdoor event in late June would not be very comfortable here in the Valley, our only option is to hold our event out of the Valley and in a much more comfortable climate. We have chosen the Rim country near Payson.

Firstly, let's describe what Field Day is to hams. Here is what the ARRL<http://www.arrl.org/field-day> has
to say about Field Day:

*"ARRL Field Day is the single most popular on-the-air event held annually in the US and Canada. On the fourth *
*weekend of June of each year, more than 35,000 radio amateurs gather with their clubs, groups or simply with *
friends to operate from remote locations.
*
*
*Field Day is a picnic, a campout, practice for emergencies, an informal contest and, most of all, FUN! *
*It is a time where many aspects of Amateur Radio come together to highlight our many roles. While some will treat *
*it as a contest, other groups use the opportunity to practice their emergency response capabilities. It is an excellent *
*opportunity to demonstrate Amateur Radio to the organizations that Amateur Radio might serve in an emergency, *
*as well as the general public. For many clubs, ARRL Field Day is one of the highlights of their annual calendar. *
*The contest part is simply to contact as many other stations as possible and to learn to operate our radio gear in *
abnormal situations and less than optimal conditions
*
*
*We use these same skills when we help with events such as marathons and bike-a-thons; fund-raisers such as walka-thons; celebrations such as parades; and exhibits at fairs, malls and museums — these are all large, preplanned, *
non-emergency activities.
*
*
*But despite the development of very complex, modern communications systems — or maybe because they ARE so **complex — ham radio has been called into

action again and again to provide communications in crises when it *
*really matters. Amateur Radio people (also called “hams”) are well known
for our communications support in real *
disaster and post-disaster situations."

Field Day 2013 takes place from Saturday, June 22 @ 11 AM local time
through Sunday, June 23 @ 2 PM. While some ham radio clubs focus on the
contest portion exclusively, we at QCARC / QCECG have several objectives:

1. Expand the event to include non-contest radio operations. This allows
for a relaxed environment where teaching, learning, and providing hands-on
experience to new and experienced hams is our first and most important
priority.

2. Allow for exposure to more than just radio operations. We will be using
battery power, solar charging systems, multiple types of antenna systems,
and also experiment with communications via VHF and UHF. These activities
will provide an excellent opportunity for hams to learn about power
management, transmission systems, antenna setups, and to become prepared
for their own radio operations for camping, prepping, communications from
remote sites, and field operations in general.

3. Combine camping skills with our field radio operation skills. Learn
from this experience and share that knowledge with our local ham community.
We know many of you enjoy camping. Why not combine radio and camping?

4. Join in with fellow hams across North America in the best field operations
event of the year.

We are planning to arrive early - actually 2 days earlier. The plan right
now is to arrive on the afternoon of Thursday, June 20 for camp setup and
basic radio operations setup. Dennis, KF7RYX, will provide a large
community covered space that participants can use for rest and overnight
stays. An easy-up will be setup for radio operations before and during the
actual contest period. We will probably setup about 3-5 complete stations
for HF and VHF/UHF operations.

We encourage day participants, overnight participants, and full event
participants. Planning is key. The logistics involved demand great
planning and an accurate assessment of participants. We are not limiting
this event to hams only! We want anyone interested to attend - ham
wannabes, experienced hams, and friends and family of hams. We know that
not everyone interested can attend the entire event so if a day trip suits
your schedule - great, if an overnight trip works for you, that's great too.

Let's talk about the location. We have chosen the Rim country, just North
and East of Payosn. It seems the best area for our purposes considering
altitude, expected weather, and close proximity to our home area.

Here is the exact location of our selected camp site:

http://tinyurl.com/QCFieldDay2013

We ask that you strongly consider joining us for this event and to not pass up the opportunity to have a great time while experiencing one of the most rewarding events that a ham can attend. Our overall goal is to have fun and you won't be disappointed.

Also, for those of you who are interested but not campers, there are several motels about 7 miles to the East of our camp site in the Forest Lakes Estate area <http://tinyurl.com/ForestLakesEstate> - lots of restaurants too. Check out the link <http://tinyurl.com/ForestLakesEstate>.

There will be more information coming soon, so stay tuned (shameless pun). In the meantime, if you have any questions, just contact me or Dennis by email or via the Ocotillo repeater.

- Dennis, KF7RYX - legal-ease@...

- Joe, N2QOJ - jsammartino@...

I'd also like to thank Dennis for his very strong support of this event. We are fortunate to have several local hams that have been very supportive of any and all efforts to ensure anyone interested in ham radio and emergency communications has the opportunity to learn and gain hands-on experience while having fun.

If you haven't contacted us yet, please let us know as soon as possible if you plan on attending all or a portion of this event. And please pass on this information to any QCARC/QCECG member that is not yet on our YAHOO Group.

Regards,

Joe, N2QOJ

East Valley Repeater Group
Monday June 17, 2013
8:00 pm - 9:00 pm
(GMT-07.00) Mountain Time (US & Canada)
Location: 449.825 (-) PL 100

Notes:
We are a group of Amatuer Operators that have formed this group to provide emergency communications for two East valley hospitals. The two hospitals are the Chandler Regional Hospital located at 475 S. Dobson Rd. and the Mercy Gilbert Hospital located at 3555 S. Val Vista Dr.
Our home repeater is located in Gilbert AZ on the Mercy Gilbert hospital with a coordinated frequency of 449.825 with a 100.0 PL and a minus offset. A repeater on the Chandler Regional hospital is in the works and when ready will become our back-up frequency.
Everyone is welcome to join our net on Monday night at 8:00 P.M. on the 449.825 repeater.
Ron, 480-510-3025 cell or AJ7T@ cox.net. http://http://eastvalleyrg.ning.com/

2394. Arizona Emergency Net - Maricopa, 6/17/2013, 9:00 pm

Yahoo group: Queen_Creek_Hams
Date: 2013-06-17 15:01:05 UTC
From: Queen_Creek_Hams@yahoogroups.com
Topic: 2394 Message: 2394

Reminder from: Queen_Creek_Hams Yahoo! Group
http://groups.yahoo.com/group/Queen_Creek_Hams/cal

Arizona Emergency Net - Maricopa
Monday June 17, 2013
9:00 pm - 10:00 pm
(GMT-07.00) Mountain Time (US & Canada)
Location: 147.24 ( ) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes:
AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

2395. Field Day Frequencies For Communication to the Valley

Yahoo group: Queen_Creek_Hams
Date: 2013-06-19 06:09:09 UTC
From: Joe Sammartino
Topic: 2395 Message: 2395

Folks,

We will be monitoring and working the following repeaters/frequencies during our Field Day activities:

Repeaters:

*Mount Ord *---- 146.920 Mhz (- shift) PL 162.2 Hz

Anyone in the QC area with an outdoor antenna should be able to use the above repeater.

Portable Repeater --- 448.225 (- shift) PL 136.5 Hz

We will be setting up our portable repeater as the camp site repeater for tactical communications. Given the altitude of the RIM, and the fact that we will be erecting a high gain antenna, it is probable that Queen Creek area mobiles and base stations with outdoor antennas should be able to work our camp repeater. Please be sure to try this repeater frequency often.

Important - Double Check your portable repeater frequency, you may have an old frequency pair programmed.

Ocotillo Repeater --- 449.325 (- shift) PL 100 Hz

Simplex:

146.500 Mhz

*HF Frequencies: *

40 Meters: 7.158 Mhz (Extra), 7.178 Mhz (General) These are LSB.

We expect one or both of the above frequencies to be available up until the Field Day Contest begins on Saturday at 11 AM.

We will have some email access and will update the Yahoo Group during the event on any changes to these frequencies. We will also update health and welfare status of our group members regularly.

Regards,

Joe, N2QOJ

Attachments: 2 described; binary payloads are missing from this source WARC

A PDF attachment of the directions and corresponding map is attached to this email. (It is recommended that you print out and bring with you.) There is also a JPEG file showing a bit more detail of the local area.

If you have a navigation unit, input the following coordinates: 34.340134, -110.986129 (These coordinates are in DD.dddddd format, that means degrees and decimal.)

Do not depend on your Smartphone for navigation if you do not have local maps installed in the phone. Coverage is spotty and you may end up a creek without a paddle.

Map Link: http://tinyurl.com/QCFieldDay2013

Directions:

Driving directions to Camp Site #27 turn off--- 3D
Sky View Ranch
4632 E Germann Rd
Gilbert, AZ 85297
1. Head *west* on *E Germann Rd* toward *S Fenceline Way*
0.1 mi
2. Take the 1st right onto *S Fenceline Way*
0.2 mi
3. Take the 2nd right toward *S Posse Trail*
0.1 mi
4. Turn left onto *S Posse Trail*
0.1 mi
5. Take the 3rd right onto *E Los Altos Rd*
0.2 mi
6. Take the 2nd left onto *S Power Rd*
3.2 mi
7. Turn right onto the *AZ-202 E* ramp
0.5 mi
8. Merge onto *AZ-202*
7.9 mi
9. Take exit *27* for *University Dr*
0.2 mi
10. Continue straight
0.1 mi
11. Turn right onto *E University Dr*
0.2 mi
12. Turn left onto *N Ellsworth Rd*
1.5 mi
13. *N Ellsworth Rd* turns slightly left and becomes *N Ellsworth Rd*

0.5 mi
14. Continue onto *N Ellsworth Rd/N Usery Pass Rd*
Continue to follow N Usery Pass Rd

2403. Re: Directions to Field Day 2013 Camp Site

Yahoo group: Queen_Creek_Hams
Date: 2013-06-21 18:05:22 UTC
From: Joe
Topic: 2397 Message: 2403

Folks,
We had to select a different camp site since our original location was already taken by other campers.
Follow the same directions but our camp site is number 16, 17 and 18. Number 16 is the radio station tent. Number 17 is available to be shared for visitors, and number 18 is the main cooking and sleeping area.
We are listening to 146.5 Mhz simplex and Mt. Ord Repeater, 146.920 Mhz (-) PL 162.2 Hz. Call in on these frequencies and we will help you find us.

East Valley Repeater Group
Monday June 24, 2013
8:00 pm - 9:00 pm
(GMT-07.00) Mountain Time (US & Canada)
Location: 449.825 (-) PL 100

Notes:
We are a group of Amatuer Operators that have formed this group to provide emergency communications for two East valley hospitals. The two hospitals are the Chandler Regional Hospital located at 475 S. Dobson Rd. and the Mercy Gilbert Hospital located at 3555 S. Val Vista Dr.
Our home repeater is located in Gilbert AZ on the Mercy Gilbert hospital with a coordinated frequency of 449.825 with a 100.0 PL and a minus offset. A repeater on the Chandler Regional hospital is in the works and when ready will become our back-up frequency.
Everyone is welcome to join our net on Monday night at 8:00 P.M. on the 449.825 repeater.

From: Queen_Creek_Hams@yahoogroups.com
Topic: 2406 Message: 2406

Reminder from: Queen_Creek_Hams Yahoo! Group
http://groups.yahoo.com/group/Queen_Creek_Hams/cal

Arizona Emergency Net - Maricopa
Monday June 24, 2013
9:00 pm - 10:00 pm
(GMT-07.00) Mountain Time (US & Canada)
Location: 147.24 ( ) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes:
AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

2408. EchoLink Access via the Ocotillo Repeater

Yahoo group: Queen_Creek_Hams
Date: 2013-06-27 18:45:41 UTC
From: Joe Sammartino
Topic: 2408 Message: 2408

Folks,

If you want access to the Node of the Ocotillo Repeater so you can communicate via laptop, pc, mac, smartphone (android and iOS only), then *you must request access to me directly via email*. We secure the repeater from public EchoLink access so we don't tie up the repeater with lots of incoming Internet visitors and reserve it's use only for our local community while they travel or don't have access to a radio locally.

If you are new to EchoLink, you will need to look for N2QOJ-R or node number 185734. Look for the node by name under US, Region 2. Once you access, you can save it as a favorite.

Do not access the node unless you first connect to the **EchoTest** server to very your connection and to verify that both your received and transmitted audio levels are good. The node operates well with good to slightly loud audio.

The Ocotillo repeater has a looooooooonnnnnngggggg hang time. That means you won't be able to transmit until it drops! Be patient, press transmit, wait 1 second and then speak, then wait another half second or so and release your transmit. The delays will make the connection perform well.

Be sure to visit www.echolink.org and familiarize yourself with EchoLink features and protocol.

Installing EchoLink on a pc or laptop to operate at home will require you to set some router port settings or your connection will not work reliably. Smartphones and tablets connect differently and should always be used in "Relay" mode under Settings, Network Connection whether you are using cellular or Wi-FI service.

Don't forget, if you are new to EchoLink, you must get validation from Echolink.org to use the worldwide system. It's easy, just follow directions at:

http://echolink.org/validation/

Questions? Respond to this email for everyone's benefit.

Enjoy,

Joe, N2QOJ

2415. East Valley Repeater Group, 7/1/2013, 8:00 pm

Yahoo group: Queen_Creek_Hams
Date: 2013-07-01 02:01:06 UTC
From: Queen_Creek_Hams@yahoogroups.com
Topic: 2415 Message: 2415

Reminder from: Queen_Creek_Hams Yahoo! Group
http://groups.yahoo.com/group/Queen_Creek_Hams/cal

East Valley Repeater Group
Monday July 1, 2013
8:00 pm - 9:00 pm
(GMT-07.00) Mountain Time (US & Canada)
Location: 449.825 (-) PL 100

Notes:
We are a group of Amatuer Operators that have formed this group to provide emergency communications for two East valley hospitals. The two hospitals are the Chandler Regional Hospital located at 475 S. Dobson Rd. and the Mercy Gilbert Hospital located at 3555 S. Val Vista Dr.
Our home repeater is located in Gilbert AZ on the Mercy Gilbert hospital with a coordinated frequency of 449.825 with a 100.0 PL and a minus offset. A repeater on the Chandler Regional hospital is in the works and when ready will become our back-up frequency.
Everyone is welcome to join our net on Monday night at 8:00 P.M. on the 449.825 repeater.
Ron, 480-510-3025 cell or AJ7T@ cox.net. http://http://eastvalleyrg.ning.com/

2417. Arizona Emergency Net - Maricopa, 7/1/2013, 9:00 pm

Yahoo group: Queen_Creek_Hams
Date: 2013-07-01 15:01:08 UTC
From: Queen_Creek_Hams@yahoogroups.com
Topic: 2417 Message: 2417

Reminder from: Queen_Creek_Hams Yahoo! Group
http://groups.yahoo.com/group/Queen_Creek_Hams/cal

Arizona Emergency Net - Maricopa
Monday July 1, 2013
9:00 pm - 10:00 pm
(GMT-07.00) Mountain Time (US & Canada)
Location: 147.24 ( ) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes:
AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

2418. Important: Queen Creek Repeater, 449.475 (-) PL 136.5

Yahoo group: Queen_Creek_Hams
Date: 2013-07-03 14:27:19 UTC
From: Joe Sammartino
Topic: 2418 Message: 2418

Folks,

The QC Repeater will be shut down today around mid-day.

It will finally be installed at the Queen Creek Municipal Services Building later today. Assuming we don't run into any problems, It should be operational again by 5 PM.

Assisting me with the installation will be Jim, KC7QPI.

An update will be posted later today.

Regards,

Joe, N2QOJ

Folks,

The Queen Creek repeater went live from its new location at QC Municipal Services Building. Big thanks to Jim, KC7QPI, for his assistance.

Please take the opportunity to try your handhelds and mobiles with this repeater over the next few days. It appears to be functioning well.

I would appreciate reports from your use of it, e.g. location, using HH or mobile, type of antenna, etc.

449.475 (-) PL 136.5 Hz

Regards,

Joe, N2QOJ

Hey Joe, I can get into the QC repeater on my Baofeng UV5R @ 5 watts on my J-pole up at 20 ft. When I switch to my rubber ducky the report back is very scratchy. From my back yard, I get into the Ocotillo repeater with the rubber ducky OK. I'm located in Seville major cross streets power and Chandler Heights.

I'm probably about 8 miles from the repeater

Looks like no courtesy tone and a very quick hang time.

Can we put the antenna up a little bit higher :)

Hello Steve,

Thanks for the report - it was very helpful.

Question - Were you able to get into the QC repeater before? If so, is the access improved?

As for the antenna height - sorry, that is as high as it is going to get.

We encourage users to utilize some type of roof top antenna while operating at home.

We may add a courtesy tone soon and adjust the hang time a bit. This repeater is built with radios that were not meant for 100 % duty so the short hang time insures the transmitter cycles often.

Regards,

Joe, N2QOJ

FYI:
I was using my UV-5RE with the diamond 771 antenna (bigger rubber duck).

Sent from my iPad

Hi Jeff,

You beat me to the question, thanks. And were you inside your home or outside?

Thanks,

Joe, N2QOJ

Hi Joe:
I had to go outside, then everything was fine. I just tried again from inside, but didn't get through. You could hear me, but I didn't make it to the repeater (that was me a minute ago).

Hi Joe, I did try to get into the QC repeater when it was in your backyard with my HT, but no luck, so it's better now that its higher.

Might try to use this as a good reason to get a mobile radio with my wife.

Steve

I think Eric, KF7JKL, may have an interest in it.

I have some interest in it and have reviewed it in the past. I like it for possible transmission of remote web cam video from an incident site, event, or simple surveillance.

Ok,
This could be an interesting topic to start up.
Having a high speed wireless network made from $10-15 dollar routers could
have a lot of uses for the club as well as members.

2437. East Valley Repeater Group, 7/8/2013, 8:00 pm

Yahoo group: Queen_Creek_Hams
Date: 2013-07-08 02:01:05 UTC
From: Queen_Creek_Hams@yahoogroups.com
Topic: 2437 Message: 2437

Reminder from: Queen_Creek_Hams Yahoo! Group
http://groups.yahoo.com/group/Queen_Creek_Hams/cal

East Valley Repeater Group
Monday July 8, 2013
8:00 pm - 9:00 pm
(GMT-07.00) Mountain Time (US & Canada)
Location: 449.825 (-) PL 100

Notes:
We are a group of Amatuer Operators that have formed this group to provide emergency communications for two East valley hospitals. The two hospitals are the Chandler Regional Hospital located at 475 S. Dobson Rd. and the Mercy Gilbert Hospital located at 3555 S. Val Vista Dr.
Our home repeater is located in Gilbert AZ on the Mercy Gilbert hospital with a coordinated frequency of 449.825 with a 100.0 PL and a minus offset. A repeater on the Chandler Regional hospital is in the works and when ready will become our back-up frequency.
Everyone is welcome to join our net on Monday night at 8:00 P.M. on the 449.825 repeater.
Ron, 480-510-3025 cell or AJ7T@ cox.net. http://http://eastvalleyrg.ning.com/

2439. Arizona Emergency Net - Maricopa, 7/8/2013, 9:00 pm

Yahoo group: Queen_Creek_Hams
Date: 2013-07-08 15:01:06 UTC
From: Queen_Creek_Hams@yahoogroups.com
Topic: 2439 Message: 2439

Reminder from: Queen_Creek_Hams Yahoo! Group
http://groups.yahoo.com/group/Queen_Creek_Hams/cal

Arizona Emergency Net - Maricopa
Monday July 8, 2013
9:00 pm - 10:00 pm
(GMT-07.00) Mountain Time (US & Canada)
Location: 147.24 ( ) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes:
AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

Thanks for the information this is new to me. I saw your node in goggle maps
Sounds very interesting and a good project to do. I will be looking for the router.

George,
Right now my node it is just the factory antennas on the router sitting here in my office. (N1RWY-100)
Range might be to the road ;-) . However, I am adding gear to the collective and hope to get it mast mounted soon with at least a 15 dbi directional antenna(s) beaming towards the queen creek area. If folks are interested we could talk about this at one end of the table at the breakfast on Saturday there at the Flight Deck Cafe.

Having our "own" mesh network could have many possibilities from casual digital qsos, as well as more "serious" weather spotting, traffic passing, race support, all on a network that could be utilized by a mobile station with gear that was within the mesh "zone".

Hi Guy's,

I have a NanoStation2 and experience installing third party firmware on various routers. I could setup the NanoStation in Copper Basin facing North at about 25-30 feet above ground level in a few weeks after I finish something else I'm working on.

Tom,
That sounds great! I am not sure if the NanStation can be flashed with the hsmm software, from what I am hearing *any day* they(the hsmm_mesh team) will be releasing a new software package that can go on any router, however, will require some manual adjustments. The software for the Linksys WRT54 (G/S/L) series is literally plug and play. Very easy to flash and get a node up and running.
That makes 4....

I think I have a WRT54 or two. Will have to check. I don't have a external antenna for it but I have hooked up the NanoStation to it. Anyway I'll see what I can do with it.

Great!
I don't know if this attachment will carry through to the list.. however,
there is a "buying guide" which documents which versions of the WRT54xxx
can be used with the current hsmm_mesh software.

The link is here as well.

It looks like this may grow into a nice local community project.
For all interested folks, let's take this project to a new Group I
created today for us:
http://groups.yahoo.com/group/QC_HSMM-MESH/
Anyone on this Group that is interested in participating in this
project, please visit the new Group and join!
Regards,
Joe, N2QOJ

2449. Re: anyone playing with HSMM-MESH?

Yahoo group: Queen_Creek_Hams
Date: 2013-07-10 23:24:21 UTC
From: kf7jkl
Topic: 2433 Message: 2449

Howdy,
The HSSM-MESH software is fairly restrictive to what routers it will work on. Thier is a list, buying guide, identification guide on the HSSM-MESH site that is fairly comprehensive. The software requires a linux kernel so the hardware requirements are quite specific. Though new routers are available from amazon for ~50$, The wrt54gL (L is for linux)

I have not tested trying to join a MESH with another DDWRT router but this is something that is on my list of things to try. From what ive read thier isnt anything that would necessarily prevent it, however thier have been reported endian problems with how the routing mesh software works that may not work correctly on other routers. Rumor has it that this has been rewritten to work correctly - but might only be in dailys - so would need to be compiled on the router.

Personally I think that there is a great deal more potential with the atheros chipset. Beyond the hardware, being able to run exclusivly in G mode, not a or b, could be very adventagous. If you take a look at the bands a and b are both slightly restricted, but G is still wide open at 1000w PEP - as least to my recolection.

Would love to get together and play with this some time when we can get a few nodes online in close enough proximity to form a mesh.

While possible to provide an internet connection is that someting what you would want to do? How does internet use affect the terms of our license?

Are you kidding me?!?!?! This is cool!

If we are feeling really spunky next year for field day we could network 'easyup1' and 'easyup2' via a respectable distance for the logging software, webcams, etc.

Sent from my iPad

Hey all,
Here is a quick .mov file of the dust storm approaching and hitting my
house here in STV.

https://dl.dropboxusercontent.com/u/3981055/7-12-duststorm_STV.mov

Winds over 40, knocked out the power as well. Nice chatting with Tom,
Brian, Joe, and everyone else on the Ocotillo machine.

2462. East Valley Repeater Group, 7/15/2013, 8:00 pm

Yahoo group: Queen_Creek_Hams
Date: 2013-07-15 02:01:05 UTC
From: Queen_Creek_Hams@yahoogroups.com
Topic: 2462 Message: 2462

Reminder from: Queen_Creek_Hams Yahoo! Group
http://groups.yahoo.com/group/Queen_Creek_Hams/cal

East Valley Repeater Group
Monday July 15, 2013
8:00 pm - 9:00 pm
(GMT-07.00) Mountain Time (US & Canada)
Location: 449.825 (-) PL 100

Notes:
We are a group of Amatuer Operators that have formed this group to provide emergency communications for two East valley hospitals. The two hospitals are the Chandler Regional Hospital located at 475 S. Dobson Rd. and the Mercy Gilbert Hospital located at 3555 S. Val Vista Dr.
Our home repeater is located in Gilbert AZ on the Mercy Gilbert hospital with a coordinated frequency of 449.825 with a 100.0 PL and a minus offset. A repeater on the Chandler Regional hospital is in the works and when ready will become our back-up frequency.
Everyone is welcome to join our net on Monday night at 8:00 P.M. on the 449.825 repeater.
Ron, 480-510-3025 cell or AJ7T@ cox.net. http://http://eastvalleyrg.ning.com/

2464. Arizona Emergency Net - Maricopa, 7/15/2013, 9:00 pm

Yahoo group: Queen_Creek_Hams
Date: 2013-07-15 15:01:06 UTC
From: Queen_Creek_Hams@yahoogroups.com
Topic: 2464 Message: 2464

Reminder from: Queen_Creek_Hams Yahoo! Group
http://groups.yahoo.com/group/Queen_Creek_Hams/cal

Arizona Emergency Net - Maricopa
Monday July 15, 2013
9:00 pm - 10:00 pm
(GMT-07.00) Mountain Time (US & Canada)
Location: 147.24 ( ) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes:
AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

Folks,

Another camping with radios trip in the Rim Country is set for Thursday, July 25 through July 27, Saturday.

Anyone interested is welcome. This is a bring-your-own-everything camping trip. That means bring your own tent, food, water, toilet, radios, etc,

We will have an easy-up with two radio stations, power, and antennas for you to use in addition to your own radios.

There is no contest, just lots of radio fun, real hamming

Dennis and I will arrive Thursday afternoon to claim a camp site. Come Thursday or Friday. We plan on leaving late Saturday afternoon or evening.

If you are planning on coming, let Dennis, KF7RYX or Joe, N2QOJ know.

Regards,

Joe, N2QOJ

2467. Digital name badge

Yahoo group: Queen_Creek_Hams
Date: 2013-07-16 17:56:07 UTC
From: n1rwy
Topic: 2467 Message: 2467

Some of you at the Saturday breakfast last weekend were asking me about the digital sign name badge that I was sporting...

I picked mine up several years ago, however, this is the URL.

http://www.digitalbadge.com/Default.asp?Redirected=Y

I see today that the RED LED badge (like mine) is now on sale.
It is pretty slick, you can program something like 150 characters into it as well as adjust the scrolling speed. Works of a simple CR2032 battery.

If you are looking to increase your nerd factor, or have a scrolling message as to what you are looking for at hamfests.. this is a nice addition to the shack.

http://groups.yahoo.com/group/Queen_Creek_Hams/cal

Boy Scouts Electronic Swap Meet and Recycling
Sunday July 21, 2013
6:00 am - 10:30 am
(GMT-07.00) Mountain Time (US & Canada)
Location: Scottsdale Pavilions, 9069 east indian bend Road, Scottsdale, AZ

Notes:
Electronicfest is an electronics recycling event and computer swap meet. It was started more than 25 years ago by the boy scouts and their leaders from Troop 446, chartered by Our Lady of Perpetual Help Church in Scottsdale, Arizona.

The Electronicfest is held the 3rd Sunday morning of every month (come rain or shine), from 5:30am to 10:30am, in Scottsdale, Arizona in the 5 & Diner parking lot of the Scottsdale Pavilions Shopping Center (9062 East Indian Bend Road, Scottsdale). Map: http://tinyurl.com/cocky2s .

Proceeds raised at this event help Boy Scouts earn their way to camp, and pay for scouting program.

2471. Re: Baofeng uv-5r programming question

Yahoo group: Queen_Creek_Hams
Date: 2013-07-21 16:04:37 UTC
From: avonap
Topic: 2259 Message: 2471

Hello, i just got a Baofeng UV-5R. Does someone have a AZ repeater file that they could send me to upload into my UV-5R? i have already setup the driver/cable and I have the standard Baofeng software program called UV_5R_VIP. I also have a Yaesu FT-60 (that already has all the AZ repeater data in it) but haven't been able to find a way to load the FT-60 file into the Baofeng.
any help would be great!
thanks,
Paul

Use Chirp software to upload your FT60 memories into one tab.

Then, upload your Baofeng memories as is into a second tab.

Then, copy and paste from the FT60 tab to the Baofeng tab.

Chirp is very powerful. You can export your Yaesu info to a comma delimited file and edit that with Excel. Then import it and do the copy and paste to the Baofeng tab as you like.

Never upload someone else's file to your radio. Always read your new radio first, back it up, and work with its own image.

Regards,

Joe, N2QOJ

thanks Joe. I got Chirp software. for some reason I have not figured out how to upload my FT-60 data to Chirp. Keep getting an error,

but what I did was use the 'Query data source' option and 'RepeaterBook' source and found a listing of AZ repeaters there. then was able to copy that info over to my UV-5R. so that worked!

thanks again,
Paul

Paul,

Be sure to explore "stock configurations" under the file drop down. You will find very useful frequency sets there like FRS/gmrs, NOAA, MURS, Marine, and more. Research MURS and Gmrs before using those frequencies.

Yaesu radios have to be in cloning mode. Reference your user manual for details.

got the Yaesu to upload to Chirp (had to hold the PTT button for a good second to transmit in the Clone mode)! and then downloaded info to UV-5r. thanks for the 'stock configs' tip too!

http://groups.yahoo.com/group/Queen_Creek_Hams/cal

Arizona Emergency Net - Maricopa
Monday July 22, 2013
9:00 pm - 10:00 pm
(GMT-07.00) Mountain Time (US & Canada)
Location: 147.24 ( ) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes:
AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

2479. Help Putting up Antenna

Yahoo group: Queen_Creek_Hams
Date: 2013-07-23 00:06:37 UTC
From: Tom
Topic: 2479 Message: 2479

Hi Everyone,

Some of you know I am looking for help to install an antenna that will be on a 25-30 mast attached to the second story eve.

I was hoping to have a heads up on the rest of the supplies coming but the company did not send me any tracking info and they showed up today.

If anyone can help I would greatly appreciate it. About the only thing I don't have is a ladder to reach the 2nd story. I guessing probably need about a 30 foot ladder and a few people to help put the mast up and mount the antenna.

If anyone is able to help and has access to a ladder please let me know. I'm available after about 9am during the week and Saturdays so whatever would work best for any volunteers works for me.

Thanks much and 73's

Tom

Tom,
if you haven't got this done in the next two weeks, let me know.. will be happy to help. Out of state working right now. I have an 22' ladder which we might be able to use as well.

Thanks to those that have replied so far. I'm still short one or two people and may need someone with a truck to move a ladder that was offered for use if anyone is available. There has not been a date set yet. It will be whatever works best for those that can help.

Thanks again!

Tom,

You need to offer up a date or two so people can plan/respond their availability.

2485. BaoFeng UV-3R $30.. wow

Yahoo group: Queen_Creek_Hams
Date: 2013-07-24 00:33:51 UTC
From: Jay
Topic: 2485 Message: 2485

I realize that this is the older model, and only 2W output.. but.. a dual band HT for $30.
Unreal. There really isn't an excuse not to have one of these in the glove box of every car and go box at that price.

(No I don't work for them, or endorse this company, just found it web browsing)

2489. Radios on the RIM, July 25-27

Yahoo group: Queen_Creek_Hams
Date: 2013-07-24 07:59:37 UTC
From: Joe Sammartino
Topic: 2489 Message: 2489
Attachments: 2 described; binary payloads are missing from this source WARC

If you plan on joining us at the RIM, here is the information you need to find the camp site.

We plan on using the original Field Day camp site #27 for this event. If there is a change, an announcement will be made on this Group.

A PDF attachment of the directions and corresponding map is attached to this email. (It is recommended that you print out and bring with you.) There is also a JPEG file showing a bit more detail of the local area.

If you have a navigation unit, input the following coordinates: 34.340134, -110.986129 (These coordinates are in DD.dddddd format, that means degrees and decimal.)

Do not depend on your Smartphone for navigation if you do not have local maps installed in the phone. Coverage is spotty and you may end up a creek without a paddle.

Map Link: http://tinyurl.com/QCFieldDay2013

Directions:

Driving directions to Camp Site #27 turn off--- 3D
Sky View Ranch
4632 E Germann Rd
Gilbert, AZ 85297
1. Head *west* on *E Germann Rd* toward *S Fenceline Way*
0.1 mi
2. Take the 1st right onto *S Fenceline Way*
0.2 mi
3. Take the 2nd right toward *S Posse Trail*
0.1 mi
4. Turn left onto *S Posse Trail*
0.1 mi
5. Take the 3rd right onto *E Los Altos Rd*
0.2 mi
6. Take the 2nd left onto *S Power Rd*
3.2 mi
7. Turn right onto the *AZ-202 E* ramp
0.5 mi
8. Merge onto *AZ-202*
7.9 mi
9. Take exit *27* for *University Dr*
0.2 mi
10. Continue straight
0.1 mi

11. Turn right onto *E University Dr*
0.2 mi
12. Turn left onto *N Ellsworth Rd*
1.5 mi
13. *N Ellsworth Rd* turns slightly left and becomes *N Ellsworth Rd*
0.5 mi
14. Continue onto *N Ellsworth Rd/N Usery Pass Rd*
Continue to follow N Usery Pass Rd
6.7 mi
15. Turn right onto *N Bush Hwy*
9.6 mi
16. Turn right onto the ramp to *Payson*
0.2 mi
17. Merge onto *AZ-87 N/N Beeline Hwy*
Continue to follow AZ-87 N
51.2 mi
18. Turn right onto *AZ-260 E*
29.2 mi
19. Turn left onto *Forest Service Rd 300/Rim Rd*
This road may be seasonally closed
5.4 mi
20. Turn left
1.0 mi

2502. Last chance for video streaming from the Rim today

Yahoo group: Queen_Creek_Hams
Date: 2013-07-27 19:39:42 UTC
From: Joe Sammartino
Topic: 2502 Message: 2502

Folks,

We will transmit our last installment of streaming video of our portable radio operations from the Rim at about 1:15 pm today:

http://www.ustream.tv/channel/arizona-joe

We hope you get a chance to watch it live!

Regards,

Joe, N2QOJ

jsammartino@...

2503. Byon, N6BG, guest speaker at Scottsdale ARC, August 7th

Yahoo group: Queen_Creek_Hams
Date: 2013-07-29 00:17:07 UTC
From: Joe Sammartino
Topic: 2503 Message: 2503

Folks,

Here's a message from Byon, N6BG, regarding his upcoming presentation at SARC:

==========

I'd like to invite everyone to the Scottsdale Amateur Radio Club meeting on Wed, Aug 7th. I'll be the guest speaker giving a presentation on T-Hunting. I plant to bring lots of gear for show and tell, and hopefully get some more hams interested to try this fun aspect of our hobby.

The meeting starts at 7PM, but they have the club business meeting first, and then the guest presentation after the break. Location is the Scottsdale Senior Center on Granite Reef Rd about 100 yds N of McDowell Rd.

Byon, N6BG

==========

Remember to visit www.byonics.com if you have interest in APRS trackers, Fox Hunt transmitters, and more.

Regards,

Joe, N2QOJ

Joe Sammartino

2506. Arizona Emergency Net - Maricopa, 7/29/2013, 9:00 pm

Yahoo group: Queen_Creek_Hams
Date: 2013-07-29 15:01:00 UTC
From: Queen_Creek_Hams@yahoogroups.com
Topic: 2506 Message: 2506

Reminder from: Queen_Creek_Hams Yahoo! Group
http://groups.yahoo.com/group/Queen_Creek_Hams/cal

Arizona Emergency Net - Maricopa
Monday July 29, 2013
9:00 pm - 10:00 pm
(GMT-07.00) Mountain Time (US & Canada)
Location: 147.24 ( ) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes:
AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

2507. Re: Help Putting up Antenna

Yahoo group: Queen_Creek_Hams
Date: 2013-07-30 04:41:32 UTC
From: Tom
Topic: 2479 Message: 2507

Hi Everyone,

I will be starting on installing my antenna Friday about 1pm. I still may be short a person or two if anyone can help. The mast is no big deal but when it comes time to bolt up the antenna, maybe around 3pm is when having a total of 4 counting myself would be nice because of the roof pitch, antenna size, etc. I have one person for sure and possibly one more if he can get off work early. If anyone is able to help it would be greatly appreciated.

Thanks, Tom
KF7SYE

2509. The Voice of Amrerica Video Tour.

Yahoo group: Queen_Creek_Hams
Date: 2013-08-02 05:18:58 UTC
From: Dave Gorevin
Topic: 2509 Message: 2509

For some of you newer hams and the younger folks The Voice of America is a Government owned broadcast system. There are several sites located around the country. Each site has several high power HF transmitters that can run simultaneously. I have actually toured the station in Delano Calif. a couple of times. It just doesn't get much better than being able to walk inside a transmitter, when it is powered off. Powered up is probably a different story. This video is a pretty good tour of the station in Ohio.

Topic: 2509 Message: 2510

Thanks for this trip down Memory Lane, Dave.

I worked for VOA for a couple years (overseas as a professional monitor, on the receiving end). I have been in both the Greenville, NC site as well as Delano, CA.

Most of these big HF sites have gone bye bye, being replaced by newer forms of media. Most of the HF sites carry less hours and fewer languages due to long standing reprioritization of budgets and politics.

But I still recall the glow of the tubes in the 250 and 500 kilowatt transmitters.

The last operational site I visited was in Selibe Phikwe in northern Botswana. It was amazing what a 100w transceiver will do on 20 meters when fed into a full sized rhombic antenna up 170 feet
and aimed to the USA..

Ahh, the good old days!

Thanks for sharing.

Jim, KF7E

PS a couple times a year local hams near Greenville reactivate some of these old antennas, such as on Field Day. They used to have a cool QSL card, still may.

Hello all,

Just wanted to drop in and say hello. I live in San Tan Valley and just got my ticket (again) in April. Thanks to Joe for quickly responding to my request to join up.

I'm a retired electronics (avionics) technician with time on my hands so if anybody needs a hot soldering iron or a warm oscilloscope just let me know. (Looks like I just missed an antenna hanging exercise -- oh well.)

73's and look forward to meeting you all on the air and in person

Scott

Welcome Scott,

I worked about 25 years line maint / avionics.

I'm going to finish up a antenna install Monday (I hope). Should have enough help but feel free to stop by if you want. Going to start about noon.

2521. Re: [Queen_Creek_Hams] QC HAMS Breakfast, 8/10/2013, 8:00 am

Yahoo group: Queen_Creek_Hams
Date: 2013-08-07 17:39:06 UTC
From: Jay
Topic: 2519 Message: 2521

Looking forward to biking to breakfast!
Should be running APRS for this trip as well as monitoring the QC repeater.
Look out for the fella with an American flag helmet on the yellow recumbent
or a longer black recumbent with a "windshield" (fairing).

See you this week end.

- Jay N1RWY (San Tan Valley)

Topic: 2535 Message: 2535

Reminder from: Queen_Creek_Hams Yahoo! Group
http://groups.yahoo.com/group/Queen_Creek_Hams/cal

East Valley Repeater Group
Monday August 12, 2013
8:00 pm - 9:00 pm
(GMT-07.00) Mountain Time (US & Canada)
Location: 449.825 (-) PL 100

Notes:
We are a group of Amatuer Operators that have formed this group to provide emergency communications for two East valley hospitals. The two hospitals are the Chandler Regional Hospital located at 475 S. Dobson Rd. and the Mercy Gilbert Hospital located at 3555 S. Val Vista Dr.
Our home repeater is located in Gilbert AZ on the Mercy Gilbert hospital with a coordinated frequency of 449.825 with a 100.0 PL and a minus offset. A repeater on the Chandler Regional hospital is in the works and when ready will become our back-up frequency.
Everyone is welcome to join our net on Monday night at 8:00 P.M. on the 449.825 repeater.

2537. Arizona Emergency Net - Maricopa, 8/12/2013, 9:00 pm

Yahoo group: Queen_Creek_Hams
Date: 2013-08-12 15:01:01 UTC
From: Queen_Creek_Hams@yahoogroups.com
Topic: 2537 Message: 2537

Reminder from: Queen_Creek_Hams Yahoo! Group
http://groups.yahoo.com/group/Queen_Creek_Hams/cal

Arizona Emergency Net - Maricopa
Monday August 12, 2013
9:00 pm - 10:00 pm
(GMT-07.00) Mountain Time (US & Canada)
Location: 147.24 ( ) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes:
AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

Boy Scouts Electronic Swap Meet and Recycling
Sunday August 18, 2013
6:00 am - 10:30 am
(GMT-07.00) Mountain Time (US & Canada)
Location: Scottsdale Pavilions, 9069 east indian bend Road, Scottsdale, AZ

Notes:
Electronicfest is an electronics recycling event and computer swap meet. It was started more than 25 years ago by the boy scouts and their leaders from Troop 446, chartered by Our Lady of Perpetual Help Church in Scottsdale, Arizona.

The Electronicfest is held the 3rd Sunday morning of every month (come rain or shine), from 5:30am to 10:30am, in Scottsdale, Arizona in the 5 & Diner parking lot of the Scottsdale Pavilions Shopping Center (9062 East Indian Bend Road, Scottsdale). Map: http://tinyurl.com/cocky2s .

Proceeds raised at this event help Boy Scouts earn their way to camp, and pay for scouting program.

Reminder from: Queen_Creek_Hams Yahoo! Group
http://groups.yahoo.com/group/Queen_Creek_Hams/cal

Arizona Emergency Net - Maricopa
Monday August 19, 2013
9:00 pm - 10:00 pm
(GMT-07.00) Mountain Time (US & Canada)
Location: 147.24 ( ) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes:
AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

2545. Radios at the Rim, September 12-14

Yahoo group: Queen_Creek_Hams
Date: 2013-08-25 14:18:01 UTC
From: Joe Sammartino
Topic: 2545 Message: 2545

Folks,

Another camping with radios trip in the Rim Country is set for Thursday, September 12 through September 14, Saturday.

Anyone interested is welcome. This is a bring-your-own-everything camping trip. That means bring your own tent, food, water, toilet, radios, etc,

We will have an easy-up with two radio stations, power, and antennas for you to use in addition to your own radios.

There is no contest, just lots of radio fun, real hamming

Dennis and I will arrive Thursday afternoon to claim a camp site. Come Thursday or Friday. We plan on returning on Saturday afternoon.

If you are planning on coming, let Dennis, KF7RYX or Joe, N2QOJ know.

Regards,

Joe, N2QOJ

All,

I will be in the area as I already had plans to camp with some extended family but hopefully we won't be too far apart so I'll be able to come by and meet/greet everyone. I plan on having my rig set up so maybe we can have some fun together.

Kind Regards,
Scott, KG7DBJ

2556. Arizona Emergency Net - Maricopa, 9/2/2013, 9:00 pm

Yahoo group: Queen_Creek_Hams
Date: 2013-09-02 15:01:10 UTC
From: Queen_Creek_Hams@yahoogroups.com
Topic: 2556 Message: 2556

Reminder from: Queen_Creek_Hams Yahoo! Group
http://groups.yahoo.com/group/Queen_Creek_Hams/cal

Arizona Emergency Net - Maricopa
Monday September 2, 2013
9:00 pm - 10:00 pm
(GMT-07.00) Mountain Time (US & Canada)
Location: 147.24 ( ) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes:
AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

East Valley Repeater Group
Monday September 9, 2013
8:00 pm - 9:00 pm
(GMT-07.00) Mountain Time (US & Canada)
Location: 449.825 (-) PL 100

Notes:
We are a group of Amatuer Operators that have formed this group to provide emergency communications for two East valley hospitals. The two hospitals are the Chandler Regional Hospital located at 475 S. Dobson Rd. and the Mercy Gilbert Hospital located at 3555 S. Val Vista Dr.
Our home repeater is located in Gilbert AZ on the Mercy Gilbert hospital with a coordinated frequency of 449.825 with a 100.0 PL and a minus offset. A repeater on the Chandler Regional hospital is in the works and when ready will become our back-up frequency.
Everyone is welcome to join our net on Monday night at 8:00 P.M. on the 449.825 repeater.

Boy Scouts Electronic Swap Meet and Recycling
Sunday September 15, 2013
6:00 am - 10:30 am
(GMT-07.00) Mountain Time (US & Canada)
Location: Scottsdale Pavilions, 9069 east indian bend Road, Scottsdale, AZ

Notes:
Electronicfest is an electronics recycling event and computer swap meet. It was started more than 25 years ago by the boy scouts and their leaders from Troop 446, chartered by Our Lady of Perpetual Help Church in Scottsdale, Arizona.

The Electronicfest is held the 3rd Sunday morning of every month (come rain or shine), from 5:30am to 10:30am, in Scottsdale, Arizona in the 5 & Diner parking lot of the Scottsdale Pavilions Shopping Center (9062 East Indian Bend Road, Scottsdale). Map: http://tinyurl.com/cocky2s .

Proceeds raised at this event help Boy Scouts earn their way to camp, and pay for scouting program.

2574. Foxhunt on Oct 19

Yahoo group: Queen_Creek_Hams
Date: 2013-09-26 17:58:21 UTC
From: Byon Garrabrant
Topic: 2574 Message: 2574

Hello Queen Creek Hams,

I plan to put on a beginner's hidden transmitter hunt in the southern east valley, so I wanted to personally invite this group to attend. The hunt will begin at 5PM on Oct 19 in South Chandler, and will last about 2 hours. All the other details can be found at this webpage : http://n6bg.com/foxhunt/

I'd be happy to answer questions via email, loan equipment, and even come speak about it at your next meeting, if there is time. If you would, please extend this invitation during your next net.

Thanks & 73,
Byon, N6BG

East Valley Repeater Group
Monday September 30, 2013
8:00 pm - 9:00 pm
(GMT-07.00) Mountain Time (US & Canada)
Location: 449.825 (-) PL 100

Notes:
We are a group of Amatuer Operators that have formed this group to provide emergency communications for two East valley hospitals. The two hospitals are the Chandler Regional Hospital located at 475 S. Dobson Rd. and the Mercy Gilbert Hospital located at 3555 S. Val Vista Dr.
Our home repeater is located in Gilbert AZ on the Mercy Gilbert hospital with a coordinated frequency of 449.825 with a 100.0 PL and a minus offset. A repeater on the Chandler Regional hospital is in the works and when ready will become our back-up frequency.
Everyone is welcome to join our net on Monday night at 8:00 P.M. on the 449.825 repeater.

Boy Scouts Electronic Swap Meet and Recycling
Sunday October 20, 2013
6:00 am - 10:30 am
(GMT-07.00) Mountain Time (US & Canada)
Location: Scottsdale Pavilions, 9069 east indian bend Road, Scottsdale, AZ

Notes:
Electronicfest is an electronics recycling event and computer swap meet. It was started more than 25 years ago by the boy scouts and their leaders from Troop 446, chartered by Our Lady of Perpetual Help Church in Scottsdale, Arizona.

The Electronicfest is held the 3rd Sunday morning of every month (come rain or shine), from 5:30am to 10:30am, in Scottsdale, Arizona in the 5 & Diner parking lot of the Scottsdale Pavilions Shopping Center (9062 East Indian Bend Road, Scottsdale). Map: http://tinyurl.com/cocky2s .

Proceeds raised at this event help Boy Scouts earn their way to camp, and pay for scouting program.

How about a BaoFeng UV-5R from Sain Store through Amazon - for about $30.32, including shipping, with one day delivery available!

Note that the UV-5R is an "older" model but, perfect as a spare.

73, Kenn, WB7OSR

2598. Arizona Emergency Net - Maricopa, 10/21/2013, 9:00 pm

Yahoo group: Queen_Creek_Hams
Date: 2013-10-21 15:01:02 UTC
From: Queen_Creek_Hams@yahoogroups.com
Topic: 2598 Message: 2598

Reminder from: Queen_Creek_Hams Yahoo Group
http://groups.yahoo.com/group/Queen_Creek_Hams/cal

Arizona Emergency Net - Maricopa
Monday October 21, 2013
9:00 pm - 10:00 pm
(GMT-07.00) Mountain Time (US & Canada)
Location: 147.24 ( ) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes:
AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

Wow! If the clouds clear, this next visible pass of the International Space Station should be outstanding:

Time: Tue Oct 29 6:23 PM

Visible:* 6 min*

Max Height: *86 degrees*

Appears: NW (315 degrees)

Disappears: SE (135 degrees)

You can watch and track the station in advance at this link:

http://spaceflight.nasa.gov/realdata/tracking/index.html

Regards,

Joe, N2QOJ

2615. The Next Visible Pass on Saturday Morning of the International Space Station

Yahoo group: Queen_Creek_Hams
Date: 2013-11-09 03:58:23 UTC
From: Joe Sammartino
Topic: 2615 Message: 2615

Hi Folks,

It looks like the next visible pass on Saturday morning of the
International Space Station should be very good:

Time: Sat Nov 09 6:15 AM

Visible: 6 min

Max Height: 65 degrees

Appears: SW (225 degrees)

*Disappears: NE (45 degrees) *

You can watch and track the station in advance at this link:

http://spaceflight.nasa.gov/realdata/tracking/index.html

The attached graphic will help you to find the ISS using the information
above.

Regards,

Joe, N2QOJ

2621. Arizona Emergency Net - Maricopa, 11/11/2013, 9:00 pm

Yahoo group: Queen_Creek_Hams
Date: 2013-11-11 16:01:08 UTC
From: Queen_Creek_Hams@yahoogroups.com
Topic: 2621 Message: 2621

Reminder from: Queen_Creek_Hams Yahoo Group
http://groups.yahoo.com/group/Queen_Creek_Hams/cal

Arizona Emergency Net - Maricopa
Monday November 11, 2013
9:00 pm - 10:00 pm
(GMT-07.00) Mountain Time (US & Canada)
Location: 147.24 ( ) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes:
AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

2622. Finally ! ! ! An alternative battery option for FT-60r owners

Yahoo group: Queen_Creek_Hams
Date: 2013-11-12 18:04:28 UTC
From: Joe Sammartino
Topic: 2622 Message: 2622
Attachments: 1 described; binary payloads are missing from this source WARC

Hi Folks,

Recently, I learned that Doug, WB6TUJ, had sourced a Lithium ION battery for his FT-60r hand-held radio.

This Li-ION has clear benefits with longer operating time at the top of the list.

I decided to put together a detailed informational document for FT-60r users. After a bit of research and writing, it is completed and available for distribution. It even includes online sources and calculated operating times for standard and optional batteries.

I have attached it to this email and will also post it to the QC Ham Group and the QC Emergency Communications Group YAHOO Group sites.

If you have any trouble receiving or downloading this document, please let me know.

Enjoy,

Joe, N2QOJ

Folks,

Please use this revised version. After many proof readings, it still managed to get by me with an incorrect call sign for Doug, WB7TUJ.

Thanks,

Joe, N2QOJ

Boy Scouts Electronic Swap Meet and Recycling
Sunday November 17, 2013
6:00 am - 10:30 am
(GMT-07.00) Mountain Time (US & Canada)
Location: Scottsdale Pavilions, 9069 east indian bend Road, Scottsdale, AZ

Notes:
Electronicfest is an electronics recycling event and computer swap meet. It was started more than 25 years ago by the boy scouts and their leaders from Troop 446, chartered by Our Lady of Perpetual Help Church in Scottsdale, Arizona.

The Electronicfest is held the 3rd Sunday morning of every month (come rain or shine), from 5:30am to 10:30am, in Scottsdale, Arizona in the 5 & Diner parking lot of the Scottsdale Pavilions Shopping Center (9062 East Indian Bend Road, Scottsdale). Map: http://tinyurl.com/cocky2s .

Proceeds raised at this event help Boy Scouts earn their way to camp, and pay for scouting program.

This question is a bit off topic.

Are you the owner of any of those groups? If not, you cannot change anything.

Joe, n2qoj - Group Owner

If any of you have SiriusXM satellite radios in your car that you're not paying for:

From now until Dec 3rd they will all be turned on so you can experience SiriusXM radio - FREE!

I always listen to Radio Classics on channel 82 - radio like it was BTV (before television).

I even have it on my computer.

Bil

East Valley Repeater Group
Monday November 25, 2013
8:00 pm - 9:00 pm
(GMT-07.00) Mountain Time (US & Canada)
Location: 449.825 (-) PL 100

Notes:
We are a group of Amatuer Operators that have formed this group to provide emergency communications for two East valley hospitals. The two hospitals are the Chandler Regional Hospital located at 475 S. Dobson Rd. and the Mercy Gilbert Hospital located at 3555 S. Val Vista Dr.
Our home repeater is located in Gilbert AZ on the Mercy Gilbert hospital with a coordinated frequency of 449.825 with a 100.0 PL and a minus offset. A repeater on the Chandler Regional hospital is in the works and when ready will become our back-up frequency.
Everyone is welcome to join our net on Monday night at 8:00 P.M. on the 449.825 repeater.

Arizona Emergency Net - Maricopa
Monday November 25, 2013
9:00 pm - 10:00 pm
(GMT-07.00) Mountain Time (US & Canada)
Location: 147.24 ( ) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes:
AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

Hi Folks,

It looks like the next visible pass of the International Space Station is on Friday morning and should be very good. Something to do while you are starting Black Friday shopping.

Time: Fri Nov 29 6:14 AM

Visible: 4 min

Max Height: 74 degrees

Appears: NW (315 degrees)

Disappears: ESE (112.5 degrees)

You can watch and track the station in advance at this link:

http://spaceflight.nasa.gov/realdata/tracking/index.html

The attached graphic will help you to find the ISS using the information above.

Regards,

Joe, N2QOJ

2647. Field Day Results for QCARC are Here

Yahoo group: Queen_Creek_Hams
Date: 2013-11-29 05:58:33 UTC
From: Joe Sammartino
Topic: 2647 Message: 2647

Folks,

The ARRL finally posted Field Day 2013 results on 12/14/13. Here is some information from that post:

"The results <http://www.arrl.org/files/file/ContestResults/2013/2013-FD-QST.pdf> of the 2013 ARRL Field Day have been posted. Less-than-ideal conditions this past June likely accounted for a slight drop in participation from 2012. Nonetheless, there were more than 2500 entries, and more than 35,500 people participated.

The team at W3AO (Potomac Valley Radio Club <http://www.pvrc.org/>/Columbia Amateur Radio Association <http://www.columbiaara.org/>) claimed top honors this year, running class 29A(!) to compile a score of 33,724 points. But small club efforts remain the most popular entries. Class 2A Field Day operations accounted for the greatest number of entries — 440 — by class. By the way, all that activity resulted in more than 1.2 million contacts! Using the results database <http://www.arrl.org/results-database?event_id=47575>, you can find your club or group's score and compare with others. Time to get ready for the next Field Day. It will take place June 28-29, 2014."

*We participated as one of those "small clubs", Class 2A, under the club name of Queen Creek Amateur Radio Club and our contest call sign was N2QOJ. *

Of the total 2,548 entries, we ranked at number 1,246 by point score with a total score of 1,388. That puts us at almost a median point in the total set of participating clubs.

Here is an interesting observation: Of the 399 small clubs operating as Class 2A (i.e. 2 contest stations using off-grid power), we ranked 274th by total score. And all of our confirmed 249 contacts were made with power derived from solar charging of batteries.

My take away from this is that not only did we have a great time playing radio, contesting, and camping -- but we also earned a very respectable score while having a ton of fun.

Thanks to all our operators, and especially to Dennis, KF7RYX, for supplying just about all the radios, antennas, power systems, and most of the kitchen/cooking support (input). I helped arrange for the Porta-Potty (output) :-) .

Next year should be even more fun now that we know what we are doing.

Regards,

Joe, N2QOJ

2652. EchoLink Node

Yahoo group: Queen_Creek_Hams
Date: 2013-12-06 18:08:52 UTC
From: Joe Sammartino
Topic: 1808 Message: 2652

Folks,

The EchoLink node for the Ocotillo repeater is down. The node radio has failed and needs to be replaced.

I'll send another update when it is back online. Until another radio is found to replace the failed radio, the node may be down several days.

Regards,

Joe, N2QOJ

Please note that the EchoLink node will be working for tonight's QCECG Net
at 9 PM.

Thanks,

Joe, N2QOJ

2656. Arizona Emergency Net - Maricopa, 12/9/2013, 9:00 pm

Yahoo group: Queen_Creek_Hams
Date: 2013-12-09 16:01:06 UTC
From: Queen_Creek_Hams@yahoogroups.com
Topic: 2656 Message: 2656

Reminder from: Queen_Creek_Hams Yahoo Group
http://groups.yahoo.com/group/Queen_Creek_Hams/cal

Arizona Emergency Net - Maricopa
Monday December 9, 2013
9:00 pm - 10:00 pm
(GMT-07.00) Mountain Time (US & Canada)
Location: 147.24 ( ) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes:
AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

2657. next visible pass of the International Space Station is this evening

Yahoo group: Queen_Creek_Hams
Date: 2013-12-09 16:06:47 UTC
From: Joe Sammartino
Topic: 2657 Message: 2657
Attachments: 1 described; binary payloads are missing from this source WARC

Hi Folks,

It looks like the next visible pass of the International Space Station is this evening and should be very good.

Time: Mon Dec 09 5:55 PM

Visible: 6 min

Max Height: 41 degrees

Appears: SSW (202.5 degrees)

Disappears: ENE (67.5 degrees)

You can watch and track the station in advance at this link:

http://spaceflight.nasa.gov/realdata/tracking/index.html

The attached graphic will help you to find the ISS using the information above.

Regards,

Joe, N2QOJ

2662. Queen Creek Holiday Festival and Parade Duty, Recording Available

Yahoo group: Queen_Creek_Hams
Date: 2013-12-12 05:13:02 UTC
From: Joe Sammartino
Topic: 2662 Message: 2662

Folks,

I have prepared an edited recording of the QC Repeater transmissions during the QC Holiday Festival and Parade event.

This is an edited MP3 file that is 1 hour and 28 minutes in duration. The actual event period was over 6 hours long. All of the silence gaps have been removed.

It's a great way to review radio protocol, tactical call sign usage, and much more.

You can download the file from this link:

https://dl.dropboxusercontent.com/u/4721475/QCARC/QCECG/Holiday%20Festival%20and%20Parade%2012-01-2013/2013%20QC%20HF%20Radio%20Log.mp3?dl=1

or...

http://tinyurl.com/QCHolidayParade

Thanks again to Brad, N7LZD, and his many volunteers for a job well done.

Regards,

Joe, N2QOJ

Boy Scouts Electronic Swap Meet and Recycling
Sunday December 15, 2013
6:00 am - 10:30 am
(GMT-07.00) Mountain Time (US & Canada)
Location: Scottsdale Pavilions, 9069 east indian bend Road, Scottsdale, AZ

Notes:
Electronicfest is an electronics recycling event and computer swap meet. It was started more than 25 years ago by the boy scouts and their leaders from Troop 446, chartered by Our Lady of Perpetual Help Church in Scottsdale, Arizona.

The Electronicfest is held the 3rd Sunday morning of every month (come rain or shine), from 5:30am to 10:30am, in Scottsdale, Arizona in the 5 & Diner parking lot of the Scottsdale Pavilions Shopping Center (9062 East Indian Bend Road, Scottsdale). Map: http://tinyurl.com/cocky2s .

Proceeds raised at this event help Boy Scouts earn their way to camp, and pay for scouting program.

2664. Geminids meteor shower - radio active!

Yahoo group: Queen_Creek_Hams
Date: 2013-12-12 16:06:44 UTC
From: Jay
Topic: 2664 Message: 2664

Hey all,
Some of you might have heard that the Geminids meteor shower is going on now.

http://earthsky.org/astronomy-essentials/earthskys-meteor-shower-guide

It is a good shower that provides quite a few meteors that are visible (assuming a clear sky) in the evening and early am hours. If you haven't seen one, it is a very neat experience.

Some of you might not know that you can work other stations via meteor scatter.
Yes.. You can bounce radio signals off meteors as they pass through the atmosphere.
It is possible to work stations hundreds if not thousands of miles away via 6 meters and two meters. (50 MHz and 144 MHz). If you have the ability to work SSB or CW on your all mode, all band HF rig, that has 6 meters and two meters, then you are in luck! (There isn't much activity on 2 meters FM, and very little on 6 meter FM).

If nothing else, it is amazing to hear these stations from all over the country for brief periods of time as their signal bounces off a meteor burning through the atmosphere. Most of the activity is in the weak signal portion of the band, 6 meters, 50.100 - 50.300 and 2 meters, 144.100 - 144.250. You will find a lot of stations on the calling frequency as well, 50.125 and 144.200, however, you will want to avoid those due to the hundreds of stations all calling there.

You don't need a massive yagi/amplifier station to work via meteors (but it helps!).
I have worked them with a vertical and 50 watts on both bands. It is all about timing and listening.

There are folks using CW, voice on SSB, even APRS meteor scatter and WSJT, witch is a digital mode similar to PSK31, however, designed for weak signal work.

I will be happy to talk about this more at the breakfast on Saturday if anyone is interested.

Great stuff, Jay!

For all those interested, please watch this 2 minute video on the subject of amateur radio and meteor scatter communications:

http://youtu.be/kPU188fekmg

It stars my good friend, Al Tencza, NX2Q <http://www.qrz.com/db/NX2Q>, a well known satellite operator and AMSAT <http://ww2.amsat.org/> member. I had the good fortune to operate IST, meteor scatter, and several amateur radio satellites (birds) from his mobile amateur radio station when I lived in New Jersey (photo attached). The mobile station is called BV, BackToTheFuture Vehicle.

Al regularly speaks to large groups at the Liberty Science Center regarding amateur radio, astronomy, nautical navigation, and many other topics. The interviewer is Jeffrey Kelly, then son of Al's good friend, Jeff Kelly, K2SDR.

Best regards,

Joe, N2QOJ

If you want to look online to see what stations are on specific freqs, a
lot of the "big guns" post on this board.

http://dxworld.com/144prop.html
and
http://dxworld.com/50prop.html
and
http://dxworld.com/vhfsked.html

Should be a lot of activity this weekend.

Arizona Emergency Net - Maricopa
Monday December 16, 2013
9:00 pm - 10:00 pm
(GMT-07.00) Mountain Time (US & Canada)
Location: 147.24 ( ) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes:
AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

2676. Re: [Queen_Creek_Hams] Queen Creek Holiday Festival and Parade Duty, Recording Available

Yahoo group: Queen_Creek_Hams
Date: 2013-12-23 04:24:44 UTC
From: Bradley Young
Topic: 2662 Message: 2676

Hi Joe and fellow hams,
I plan to set up my station in the Orchard Ranch community part, located here:
https://maps.google.com/maps?hl=en&tab=ml&authuser=0
If any of you care to join me that would be great! I may not be able to stay up the entire 4 hours, but will for a couple of them for sure.
Thanks so much for the support and training you and the others provide to us!
Brad

Hi Brad,

I don't think that is a valid link, doesn't work for me.

Is it Orchard Park in Power Ranch? I'm not sure where you live. The FCC thinks you still live in Texas.

Regards,

Joe

2686. Radio Under Sun Shade - RUSS, Formerly Known As Radio In the Park

Yahoo group: Queen_Creek_Hams
Date: 2014-01-06 04:03:06 UTC
From: Joe Sammartino
Topic: 2686 Message: 2686

RUSS, Radio Under Sun Shade - Formerly Known as "Radio in the Park" - RITP

What is it?

Here's the recipe:

- take several ham radio stations and antenna systems
- add portable power - generators, batteries, solar power
- add some experienced hams
- include an open invitation to new hams, experienced hams, and anyone else
- publish a valley wide talk-in frequency of 146.460 Mhz (PL of 77 Hz, but not necessary)
- and replicate this recipe several times over in the Valley at the same time

What is the result?

- An excellent opportunity to learn about ham radio and ham radio operators.
- A great opportunity to learn about the type of equipment available - portable, mobile, base radios, antennas, coax, cables, solar arrays, solar controllers, and more.
- A great opportunity to learn about the importance of basic emergency radio principles.
- An opportunity to actually use the radio equipment and speak to local hams and distant hams hundreds or thousands of miles away -- even if you are not a ham!

It is a hands-on learning experience that is unequaled. We have had several of these events over the last 2 years and every one of them has been a tremendous success. The organizers of these events have one objective - to relate the fun, facts, and usefulness of ham radio.

Where and When?

January 11th, 2014, From 10 AM till 2 PM.

We have two local RUSS / RITP planned. Dennis, KF7RYX will host his event at the picnic pavilion at Remington Heights park near the intersection (just East) of South 198th Street and East Emperor Road. Here is a link to a map of the location:

http://tinyurl.com/KF7RYX-RITP <http://tinyurl.com/KF7RYX-RITP>

Brad, KF5AZH, will host his first RUSS event in Queen Creek at Orchard Ranch Community Park. Here is a map link to Brad's location:

http://tinyurl.com/KF5AZH-RUSS

If you are looking for an event to visit closer to MESA, Doug, WB7TUJ, will host RUSS / RITP in Mesa at the same time.

Here is a link to a map of Doug's location:

http://tinyurl.com/WB7TUJ-RUSS

Important - If you or anyone you know plans on hosting their own RUSS / RITP event on that date, please send me the details so I can add their location to the map and links.

Questions?

Just respond to this message or send me a private email.

I will also post a link to the APRS.fi website Friday night since these events will beacon as objects for all hams to see so they can navigate directly to them.

Reminder from: Queen_Creek_Hams Yahoo Group
http://groups.yahoo.com/group/Queen_Creek_Hams/cal

Arizona Emergency Net - Maricopa
Monday January 6, 2014
9:00 pm - 10:00 pm
(GMT-07.00) Mountain Time (US & Canada)
Location: 147.24 ( ) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes:
AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

Joe, Thanks for the posting of your collection of field operations.

I am Charlie Hall WB7E a winter visitor from Missouri and a member of Sunlife Amateur Radio Club in Mesa. I am active in ARES in Missouri and enjoy emergency communications and field operations.
We have a Winter Field Day in the Park every Thursday morning at Red Mountain Park off of Brown Road and 202 by he high school. This activity has been going on every week for several years. We have several radios and various antenna setups that we play with. We work out of a pavilion which has shore power, but I have used my solar setup at times. We usually have somewhere around 20 hams that show up every Thursday. Anybody is welcome (Ham or not)to join in and see what we do and join in with the fun or just chat. Bring your own equipment or check out the variations we have. There is a lot of experimental antenna projects always going on.

2691. Radio logging software .. consensus?

Yahoo group: Queen_Creek_Hams
Date: 2014-01-08 20:51:46 UTC
From: <whereisjay@...>
Topic: 2691 Message: 2691

Hey all,
What is the hot logging software that everyone is using out here? OR.. did I just open a huge can of worms on this?

Primary use will be chasing DXCC, WAS and the occasional 1/2 hearted attempt at contesting, as well as general qso logging. I have used the DOS version of log eqf, but want some other options, so I was looking at Win eqf for the ability to interface with qrz.com, winmix digital modes, telnet clusters, rig control, etc.

I like "mouse less" operation, as in, no mouse needed to click tabs, "X"s and other do dads that slow down the process... but look pretty.
(Hence my love for EQF)

Based upon all of that.. what do most of you use out here?

- Jay N1RWY/7

Jay:

The choice likely depends on how well a suite serves your needs, VS how hard it might be to learn and use.

There are a host of choices.

I use an antiquated program called 'CT' for daily stuff, and one called 'SD by I5DI' for my limited contesting. Logger 32 is widely used, as are N1MM, Ham Radio Delux, WINEQF, LOGic, and about a dozen others.

SOme have excellent interfaces for digi modes, some shine as awards trackers; some do a great job of making your rig an extension of your PC, and some do not.

You can try several, and not lose data, as long as each program allows import/export in 'standard' file types such as ADIF.

Selecting a logging program can be vexing, but should not chain you to more record keeping than you desire.

Jim,
Thanks for the reply.
I have heard of all of those and have experience with some.
Great point on the export ability to allow the best software for the given task.

No even more choices to consider..

From: Joe Sammartino
Topic: 2691 Message: 2695

Jay ant the Group,

Here is my take on logging software....

Probably the most popular all-around logging program (free):

N1MM Logger <http://n1mm.hamdocs.com/tiki-index.php> -
http://n1mm.hamdocs.com/tiki-index.php

N1MM's Logger has comprehensive rig control.

N3FJP <http://www.n3fjp.com/index.html> puts out some very good logging programs. He offers Amateur Contact Log <http://www.n3fjp.com/aclog.html> for general logging and a bunch of specialty loggers for contesting.

We use his Field Day Contest logger. N3FJP's loggers offer basic rig control. They are not free but very reasonably priced.

Another popular logger is contained in the very much used Ham Radio Deluxe<http://www.ham-radio-deluxe.com/index.html>suite which contains excellent rig control, DM780 for digital modes,
satellite tracking, and the integrated HRD Logbook. The latest HRD is a "paid for" program.

The older version 5 is free and can be found here:

http://www.iw5edi.com/software/ham-radio-deluxe-5-download-links

2698. Cross band repeating

Yahoo group: Queen_Creek_Hams
Date: 2014-01-11 05:13:18 UTC
From: Joe Sammartino
Topic: 2698 Message: 2698

Hello Folks,

Someone has a dual band radio set to cross band repeat the following frequencies:

146.500 Mhz / Ocotillo Repeater @ 449.325 Mhz. That means any transmission originating on the Ocotillo Repeater will be re-transmitted at 146.500 Mhz and vice versa.

Al, KG7BM, and I first noticed this activity at about 8:01 pm Friday night. I don't know if this intentional or unintentional.

If any of you have a cross band capable mobile radio such as a FT-8800, TM-V71, DM700/710 or Yaesu FT-350 that may be unattended, and possibly used in your absence, please check it to be sure it is secure and not in use.

Thanks,

Joe, N2QOJ

From: Scott Reeves
Topic: 2698 Message: 2702

Just to be sure I've covered all the bases it was indeed my rig that was causing the interference. With Joe's (N2QOJ) help I was able to properly program the radio and was corrected with regard to leaving my radio on unattended. My apologies to any and all that were unable to use the repeater because of my mistakes.

Thanks to everyone who helped me understand where I went wrong and how to NOT have this happen again.

2703. East Valley Repeater Group, 1/13/2014, 8:00 pm

Yahoo group: Queen_Creek_Hams
Date: 2014-01-13 03:01:05 UTC
From: Queen_Creek_Hams@yahoogroups.com
Topic: 2703 Message: 2703

Reminder from: Queen_Creek_Hams Yahoo Group
http://groups.yahoo.com/group/Queen_Creek_Hams/cal

East Valley Repeater Group
Monday January 13, 2014
8:00 pm - 9:00 pm
(GMT-07.00) Mountain Time (US & Canada)
Location: 449.825 (-) PL 100

Notes:
We are a group of Amatuer Operators that have formed this group to provide emergency communications for two East valley hospitals. The two hospitals are the Chandler Regional Hospital located at 475 S. Dobson Rd. and the Mercy Gilbert Hospital located at 3555 S. Val Vista Dr.
Our home repeater is located in Gilbert AZ on the Mercy Gilbert hospital with a coordinated frequency of 449.825 with a 100.0 PL and a minus offset. A repeater on the Chandler Regional hospital is in the works and when ready will become our back-up frequency.
Everyone is welcome to join our net on Monday night at 8:00 P.M. on the 449.825 repeater.
Ron, 480-510-3025 cell or AJ7T@ cox.net. http://http://eastvalleyrg.ning.com/

2705. 80 meters... what to do?

Yahoo group: Queen_Creek_Hams
Date: 2014-01-13 05:39:28 UTC
From: Jay
Topic: 2705 Message: 2705

Morning all, (or hello fellow night owl!)..

What are folks running for 80 meter antennas out here in the QC area?
Back east trees and land made this easy... here, where the tallest palm tree on the property is 8'.. Not so much.

What are the HOA folks doing for 80m?

- Jay N1RWY

2706. Re: [Queen_Creek_Hams] 80 meters... what to do?

Dennis,
Thanks. I think I might have found "something" that will work... I will
do a write up if I end up working anyone with it, until then, I will keep
it under the label "super-secret-hidden-80m-desert project".

Is there a "local" frequency that the QC hams gather on 80?

I use a 48 ft fertical with top loading, on top of my flat metal barn.

I have also used a standard mobile whip. The mobile works 'OK' but across a very narrow range, perhaps 25 KHz.

2709. Arizona Emergency Net - Maricopa, 1/13/2014, 9:00 pm

Yahoo group: Queen_Creek_Hams
Date: 2014-01-13 16:01:01 UTC
From: Queen_Creek_Hams@yahoogroups.com
Topic: 2709 Message: 2709

Reminder from: Queen_Creek_Hams Yahoo Group
http://groups.yahoo.com/group/Queen_Creek_Hams/cal

Arizona Emergency Net - Maricopa
Monday January 13, 2014
9:00 pm - 10:00 pm
(GMT-07.00) Mountain Time (US & Canada)
Location: 147.24 ( ) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes:
AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

From: Norm
Topic: 2705 Message: 2711

Jay,

Jim☐s approach is simple and works well when space is difficult. Depending on your operating preference, it works well. If you like switching between CW and Voice, then you can just retune the hamstick each time. Another nice thing about hamsticks is they are inexpensive, so you could have 10 of them on 160M tuned for different areas. The bump up is to use a screwdriver, but even though there can be more bandwidth, it☐s still not enough ..

I use a Scorpion (screwdriver) vertical with elevated ground planes using multiple hamsticks on each band including 160M. It has a little more useable bandwidth (maybe 500hz, flat until it rings). I☐ve tried using a tuned wire (20++ radials) ground plane, with full coverage of 160M, but it takes at least ¾ an acre of space.

Another approach I☐ve done is taking two Scorpion Verticals and configured them as a horizontal dipole. Mounted on a rotor on top of a 8☐ tripod (45 or 75 ft tower does work 10 times better). No ground plane required. It is tunable across the entire 160M band. Can be run at full power with 1:1.2 SWR. No tuner is required since the antenna is remotely adjustable and there is always a good match.

I tried many different types of screwdrivers and happen to like the Scorpion for its ease of use and quality. They are manufactured here in the Phoenix area.

The horizontal vertical dipole will work with hamsticks or any type of screwdriver capable of 160M.

Speaking of dipole, I also run a long wire 160M dipole cut for the cw portion of the band. A tuner is required since I use coax as the feed and not open wire. But I can move into the voice portion of band, tuner a must, (there is some loss) but I can do SSB. This antenna is up about 20☐ in center and 20☐ at ends (not ideal). I planning on moving it up to 30☐ in center leaving the ends a 20☐.

The Scorpion configuration out performs the wire dipole.

Hope you find this food for thought. There are many approaches to 160M on flat dry desert.

The 48' vertical is homebrew and is of an 'unusual' design. Simple, but not textbook. It does, however, work excedingly well on transmit.

A mobile whip can be made to work, although usually with reduced efficiency due to several factors besides being physically short.

Isotron makes 80m antennas, but I have never used one. You can probably find users comments about them on Eham.

There are lots of ideas for 80m stealth antennas to be found in ARRL publications, but another good book is 'Antennas for All Locations', by Les Moxon, and published by the RSGB (may be available from ARRL also)

Yeah, I have been digging through the stealth antenna books as well as the wire antenna classics book.
Mine isn't going to be a pileup buster by any means, but will get me out on the band.

Thanks all for the info.

Hi Jay,
This is my first time posting to the group. I'm hoping I can get out to a breakfast one of these days and meet some of you guys.

Yes, we moved here from Cleveland, Ohio in 2011 and I miss trees and a big lot too.

I'm in an HOA neighborhood in San Tan Valley. I have a 80m inverted V at about 30-35'. The ends droop down to about 5'. I feed it with coax and the SWR is acceptable for the part of the band I typically use. I use a fiberglass push up pole from Max-Gain Systems out of Georgia. The mast is relatively light compared to steel but seems to hold up well. I keep the antenna up all the time. I use a smaller gauge insulated stranded wire and a current choke type balun at the center. I doubt the balun is very effective as there's just not much to it. It does make a convenience for attaching coax and antenna wires. If I strayed down into the CW portion of the band I would probably need to use a tuner.

I've also had success in the past using a 100' inverted V fed through a tuner with 450 ohm ladder line.

I've always found that dipoles are highly efficient and are a good option if you can get a mast of some kind up in the air at your QTH. Just my two cents. Hope that helps.

Kelly WQ5Q

My brother N8WJA built a 80m dipole mounted on a painter's extension pole about 10 feet high. If you have looked at the exam questions you'll see reference to a NVIS antenna. When a dipole is that close to the ground you get a nearly vertical radiation. The radiation is straight up straight down. He says it works well with short range. He covers the Colorado ARES net with a good signal. Low Horizontal antennas do this.

Any two mobile whips mounted horizontal or vertically on an aluminum bracket will work within the frequency range of the whips without the use of any ground. One antenna is the radiator the other the counterpoise (ground plane.) My brother also uses a Buddy Pole (which is a neat little kit of mobile whips and mast assembly in a nylon carrying case) for use in the national park. Which proves Bud can sell a lot of dual mobile whip hoizontal antennas and make a profit. They have been used for DX expeditions .

The smaller the antenna the less bandwidth which will require a re-tuning from time to time.

>>
>>
>>Jay,
>>Jim's approach is simple and works well when space is difficult. Depending on your operating preference, it works well. If you like switching between CW and Voice, then you can just retune the hamstick each time. Another nice thing about hamsticks is they are inexpensive, so you could have 10 of them on 160M tuned for different areas. The bump up is to use a screwdriver, but even though there can be more bandwidth, it's still not enough…..
>>I use a Scorpion (screwdriver) vertical with elevated ground planes using multiple hamsticks on each band including 160M. It has a little more useable bandwidth (maybe 500hz, flat until it rings). I've tried using a tuned wire (20++ radials) ground plane, with full coverage of 160M, but it takes at least ¾ an acre of space.
>>Another approach I've done is taking two Scorpion Verticals and configured them as a horizontal dipole. Mounted on a rotor on top of a 8' tripod (45 or 75 ft tower does work 10 times better). No ground plane required. It is tunable across the entire 160M band. Can be run at full power with 1:1.2 SWR. No tuner is required since the antenna is remotely adjustable and there is always a good match.
>>I tried many different types of screwdrivers and happen to like the Scorpion for its ease of use and quality. They are manufactured here in the Phoenix area.
>>The horizontal vertical dipole will work with hamsticks or any type of screwdriver capable of 160M.
>>Speaking of dipole, I also run a long wire 160M dipole cut for the cw portion of the band. A tuner is required since I use coax as the feed and not open wire. But I can move into the voice portion of band, tuner a must, (there is some loss) but I can do SSB. This antenna is up about 20' in center and 20' at ends (not ideal). I planning on moving it up to 30' in center leaving the ends a 20'.
>>The Scorpion configuration out performs the wire dipole.
>>Hope you find this food for thought. There are many approaches to 160M on flat dry desert.

Good morning, Jay.

First, the HOAs -- in AZ, the HOAs typical do not try to regulate Ham antennas unless there is a complaint or the fact that the antenna is a Ham rather than a TV antenna is flaunted to them, or the antenna(s) bring other attention to them. The reason is that the AZ HOA attorneys have told the HOAs, correctly, that the FCC does not permit them to regulate antennas that are or can be used for (long distance) TV reception, within certain height (12' over the roof line) and size (no towers) restrictions.

I run a 20M inverted V and a long-wire antenna from a 30 foot mast (okay, a bit short) and use it with an MFJ tuner on 10M, 15M, 20M, 40M and 80M. On the top of the mast is a Diamond X30 dual band UHF/VHF antenna.

I did not ask the last two HOAs for "permission" to put up the mast and antennas and they ignored the antennas.

Good luck with your design.

Jay, I have not used that mode yet. You say 5 watts, have you tried ½ watt with any results. I□m moving from my 10 watts digital into the standard definition of QRP below 5 watts at the extreme lower end of ½ watt. It□s getting very cluttered in the shack and SDR at low power simplifies and reduces space requirements.

I enjoy the challenge of digital modes. It really melds radio and computers. You have to work at mastering both.

Topic: 2718 Message: 2727

Hey there Gary & Norm.

The radio antenna combination is a Yaesu ft857 @10w to a Hygain AV640 (40 - 6m) vertical. The antenna is 15' up the in the air, with the lower radials about 3' over the roof. Not idea, but it works. 100' of RG8X coax. signallink usb from the cheap winxp laptop to the 857 to control TX/RX.

I plan was to use my FT817 for a true 5W QRP digital signal.. but, something is up with it, so it is taking a rejuvenation vacation in California at the moment.

Since that post the other day, working a few hours each night and a few during the day, just with the WSJT65 and WSJT9 software, I have grabbed 23 countries and 39 states. 5-10w of power, vertical antenna. (I bump up to 10w for some of the harder DX stations) Everyone I have seen "printed" on the screen I have been able to work with 5 - 10 watts. It might take several calls but I have worked them.

Norm, I watch the K3UK sked page for some spots,
http://www.obriensweb.com/sked/index.php?board=lotw
There are a PILE of guys there who are running less than 1 watt. Antenna plays a big help here. But they are working the world with 1w.

I am chasing my first official WAS / DXCC so I will leave it 5-10w for now, and once I get it, do it all over again at qrp levels.

What is real neat about the WSJT software is that you can be sitting next to the radio and hear "static", yet signals are printed on the screen. So neat to be sitting in a quiet shack watching the waterfall and not hearing the station, but seeing them transmitting.

WSJT was based off of meteor scatter and EME sequences, so each side transmits for 1 min. (well 50 seconds).
So, you set the software to tx for a cycle (odd or even min) and then you RX for a min, and back and forth.

The biggest thing about WSJT is the need for time correcting software to keep your clock in sync with the NIST time servers. Even being a second or 1.3 seconds fast or slow will throw off the ability to decode stations or have stations hear you. You can download free software that runs in the background to keep your clock accurate, which allows you to get the timing right.

In addition, there is the pskreporter function built in to the software, so when enabled, you can go to a website, plug in your call, the mode you are operating, the band.. and SEE where in the country folks are hearing you. That is very neat. You can actually see how the propagation changes in

front of you based upon which stations report seeing you. Again, just a mouse click to turn this on.

I could go on for ever, but I will save that for future emails or maybe write something up and add it to the files section of the group's yahoo page.

Link to the "WSJT for dummies page"

East Valley Repeater Group
Monday January 20, 2014
8:00 pm - 9:00 pm
(GMT-07.00) Mountain Time (US & Canada)
Location: 449.825 (-) PL 100

Notes:
We are a group of Amatuer Operators that have formed this group to provide emergency communications for two East valley hospitals. The two hospitals are the Chandler Regional Hospital located at 475 S. Dobson Rd. and the Mercy Gilbert Hospital located at 3555 S. Val Vista Dr.
Our home repeater is located in Gilbert AZ on the Mercy Gilbert hospital with a coordinated frequency of 449.825 with a 100.0 PL and a minus offset. A repeater on the Chandler Regional hospital is in the works and when ready will become our back-up frequency.
Everyone is welcome to join our net on Monday night at 8:00 P.M. on the 449.825 repeater.

Reminder from: Queen_Creek_Hams Yahoo Group
http://groups.yahoo.com/group/Queen_Creek_Hams/cal

Arizona Emergency Net - Maricopa
Monday January 20, 2014
9:00 pm - 10:00 pm
(GMT-07.00) Mountain Time (US & Canada)
Location: 147.24 ( ) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes:
AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

Arizona Emergency Net - Maricopa
Monday February 10, 2014
9:00 pm - 10:00 pm
(GMT-07.00) Mountain Time (US & Canada)
Location: 147.24 ( ) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes:
AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

Boy Scouts Electronic Swap Meet and Recycling
Sunday February 16, 2014
6:00 am - 10:30 am
(GMT-07.00) Mountain Time (US & Canada)
Location: Scottsdale Pavilions, 9069 east indian bend Road, Scottsdale, AZ

Notes:
Electronicfest is an electronics recycling event and computer swap meet. It was started more than 25 years ago by the boy scouts and their leaders from Troop 446, chartered by Our Lady of Perpetual Help Church in Scottsdale, Arizona.

The Electronicfest is held the 3rd Sunday morning of every month (come rain or shine), from 5:30am to 10:30am, in Scottsdale, Arizona in the 5 & Diner parking lot of the Scottsdale Pavilions Shopping Center (9062 East Indian Bend Road, Scottsdale). Map: http://tinyurl.com/cocky2s .

Proceeds raised at this event help Boy Scouts earn their way to camp, and pay for scouting program.

2751. Powerfilm solar, anyone have / used one?

Yahoo group: Queen_Creek_Hams
Date: 2014-02-14 23:35:20 UTC
From: Jay
Topic: 2751 Message: 2751

Hey all,
Looking for some opinions / experience with the powerfilm solar panels.
This are the "bagged" systems which are folded up when not in use, and when used, unfolded like a sheet and lay out on the ground.

I know several hams in the club have the 50 - 100W panels, and I have seen them used at the RUSS / RIPT events. I am looking at these due to light weight for some extended backpacking / hiking as well as SOTA operations.

Right now, from my power calculations I am looking at the 30W range, which will fit my needs of the 817 as well as HT perfectly.

Good Morning All,

Where this article is Technically correct, it's not complete

I served in the Army for 32 years in the Signal Corps

I am a school trained Battle Field Spectrum Manager (2004)

Deployed to Iraq 2005-2006 to FOB Qwest (south of Mosul) in an area controlled by 1st Cav, then 101st, then 10th Mountain.

My assignment was Bridge Com Chief for the 153rd FA Bde, HHB 1SG, and FOB S6 NCOIC, and Area Freq Manager.

BLUF (bottom line up front). I was there for the fielding of the CREW.

I would be happy to discuss this further maybe as a topic at a Breakfast or EMCOM Monthly meeting

2768. Mag Mount Ground Plane Question

Yahoo group: Queen_Creek_Hams
Date: 2014-02-24 04:12:40 UTC
From: <gadinaz@...>
Topic: 2768 Message: 2768

I need some advice. Just starting out with Ham & want to to be able to use my Baofeng as a mini base station (very mini). Live in a Townhouse with CCR's that forbid antennas. Would like to get a Mag Mount to use then take down afterwards. Would attach to the Refrigerator but there is a 60' Steel Covered Parking running parallel. Also, I want to transmit/receive from my second story bedroom.

Which kind do you recommend & how do I calculate the size of the Ground Plane? Could some kind of ground wire be used?

Thanks,
Greg - KG7IDJ

2769. Re: [Queen_Creek_Hams] Mag Mount Ground Plane Question

Yahoo group: Queen_Creek_Hams
Date: 2014-02-24 04:23:02 UTC
From: Jay Baack
Topic: 2768 Message: 2769

Greg,
How big of an antenna are we talking about with the mag mount antenna? 5/8ths 2 meter? 1/2 wave dual band for 2/440?

Jay N1RWY

Jay, yes, dual band for 2/440. 1/2 wave? Sorry, can't really answer/understand that part. Physically, size isn't much of an issue as I'd do most activity in the evening, then take it down till used again.

As a half wave antenna it doesn't need a very large ground plane. I would head to the baking drawer in the house or spend a buck or two at Goodwill for cookie sheet and stick it on that. Should work fine.

A seasoned radio operator can answer your specific question and know that there is a better way to solve your problem. It appears that you have already decided what you want to do then asked for expert advice. The operators that you need are the ones that have installed many stealth antennas under various conditions and understand what each one can do for you. Like:
Do you really need a ground plane style antenna?
Do you really want to take it down every evening after operating?
Are you planning one antenna only, or one for each place?
Are you subject to local complaints (Wife etc.)
How long will you be where you are. Are you going to move or change your mind soon about your setup. That can affect how much work you can do before you plan to change it any way.

Ground plane antennas require that the radiator be an odd multiple of a 1/4 wave. To answer your question where a ground plane is needed, it is a simulation of using the whole earth. It is a conductive surface about 1/2 half wave on the transmitting frequency. It can be simulated by using 3 or 4 pieces of wire spaced evenly around the base equal to or slightly longer than 1/4 wave. If it is straight down, one wire exactly an odd multiple 1/4 wave length will actually work for your purpose.

Oh yes 1/4 wave for an antenna (in inches) is calculated to be very close to 2754 divided by the frequency.

Like:
Do you really need a ground plane style antenna? - No
Do you really want to take it down every evening after operating? - Doesn't matter, not really an issue. A permanent stealth would be ok also.
Are you planning one antenna only, or one for each place? - One only ... the Nagoya HT works pretty well.
Are you subject to local complaints (Wife etc.) - Neighbors yes. No wife.
How long will you be where you are. Are you going to move or change your mind soon about your setup. - Nope. Don't plan on moving

rre A 1/2 wave antenna requires no Ground plane at all. Only odd multiples of 1/4 wave (1,3,5...) If you are trying to convert a mobile antenna you all ready have for home use, sticking it on the refrigerator or any metal surface it will work. If you want a fixed station antenna and have not purchases anything there are other nice considerations such as a roll up J antenna. I stick mine to a window (provided it has no metal screen) with the clear suction cups women use to hold decorations. It's easy to move from room to room, house to house.

Greg,

A few years ago, I hired a lawyer to research HOAs (including townhouses) and TV antennas. HOAs are specifically forbidden from regulating TV antennas on townhouses. There is a minor height restriction - 12' over the roof line. HAM antennas were NOT included in the Rule but, keep in mind that your 2M/80 CM antenna will resonate at TV frequencies; it's obviously up to you what you call the antenna.

I applied for permission to put up a TV antenna on my last three houses with a HOA - in order to RECEIVE LONG DISTANCE TV SIGNALS. I sent them two jpg attachments. One was the largest TV antenna array that I could find. The other was a 5/8 dual band vertical with all references to "ham" in the file cropped out. I told the HOA my preference was the smaller antenna. It was a quick no-brainer decision which was first made verbally, then in writing.

Then, there's the Other Solution - you put up the antenna and see if anyone comments on it. It would be a VERY Good Idea to talk to your closest neighbors and ask if they object to your putting up a very small outdoor TV antenna in order to RECEIVE LONG DISTANCE TV SIGNALS...

Are you assuming that your HOA will reject an application for a TV antenna or have you actually talked to them? If necessary, I can find he FCC regs that the attorney came up with.

Hi Kenn & thank you. You are right. Back in 1996 the FCC adopted the Over-the-Air Reception Devices (“OTARD”) rule concerning restrictions.

http://www.fcc.gov/guides/over-air-reception-devices-rule
http://www.fcc.gov/guides/over-air-reception-devices-rule

Here, we have many Satellite Dish installed without preapproval.

The HOA Board is not especially "resident friendly" and to be honest, I'd simply rather not deal with them, unless I had to.

With the assistance of K8PNW, I've decided to attempt a stealth strategy first. I have a 450 ohm, Ladderline roll up J-Pole that I'm mounting in my upstairs bedroom (there is no attic). Hopefully this will be adequate.

If not, I'm thinking of going this route:

http://www.jpole-antenna.com/wp-content/uploads/2013/03/3.jpg
http://www.jpole-antenna.com/wp-content/uploads/2013/03/3.jpg

A Dummy Satellite Dish but with a Diamond X-30 (or better...?), instead of the copper pipe J-Pole.

What's your opinion?

Date: 2014-03-07 21:13:22 UTC
From: Jay
Topic: 2791 Message: 2791

Hey all,
They are running a class right here in QC.
Great information to learn about.

- Jay N1RWY

---------- Forwarded message ----------
From: <austin.jamison@...>

Subject: Spotter Schedule update
To: whereisjay@...

Hello Spotters,

The schedule for this year's training classes has had some more additions. The schedule is nearly complete with perhaps 2 or 3 more additions to come (if any). The page for the schedule is at the link below. Please take note of the registration requirements.

Remember, to remain current with training everyone needs to attend a Standard/Basic class every other year (once every two years). For instance, if you were last at a Standard/Basic class in 2012 then you need to attend one again this year. Attendance at an Advanced class doesn't count since that class doesn't cover what to report, how to properly identify it, or how to report it - the essentials of Storm Spotting. In order to be eligible for an Advanced class you need to be current with the Standard/Basic class.

http://www.wrh.noaa.gov/psr/general/skywarn/index.php

We look forward to seeing you again this year. If you have any further questions please don't hesitate to contact us.

Regards,

Austin Jamison

Topic: 387 Message: 2792

It was good to see Kenn and Bruce, even though I didn't get to speak to Bruce. It was also good to meet Scott and ???(see told you I was bad with names, was it Chuck?... sorry.) There was a couple others that I said hello to but the names didn't sink in.. I was quite surprised to see so many new faces since the last breakfast I attended. Sorry, I missed Joe and Jim. It was also nice to meet John and Christina, of hamtestonline.com http://hamtestonline.com fame, as that was the website I used to get my Extra class.

Hope to see ya again sometime,

73

I realized it was breakfast day at 9:00am so Dad (KB9ENT) and I (KG7DBJ) missed it. We were both very disappointed to have missed it but we'll catch the next go-round.

2797. HAM TV aboard the ISS

Yahoo group: Queen_Creek_Hams
Date: 2014-03-10 07:32:04 UTC
From: <wmunsil@...>
Topic: 2797 Message: 2797

Amateur radio transmissions have taken place aboard the ISS since 2000 and literally hundreds of school children have talked with the ham astronauts.

Yesterday at approximately 6:30 AM Arizona time marked the first commissioning of the live HAM TV downlink.

It is a project which has been in the works for almost ten years.

When fully operational school children - and everyone else - will be able to watch the ham astronauts.

There will be a maximum of five downlink video channels simultaneously.

You can watch the replay at the following URL:
http://www.southgatearc.org/news/2014/march/iss_ham_tv_success.htm#.Ux1mwIUtuiB

Bil Munsil

2798. Arizona Emergency Net - Maricopa, 3/10/2014, 9:00 pm

Yahoo group: Queen_Creek_Hams
Date: 2014-03-10 15:01:04 UTC
From: Queen_Creek_Hams@yahoogroups.com
Topic: 2798 Message: 2798

Reminder from: Queen_Creek_Hams Yahoo Group
http://groups.yahoo.com/group/Queen_Creek_Hams/cal

Arizona Emergency Net - Maricopa
Monday March 10, 2014
9:00 pm - 10:00 pm
(GMT-07.00) Mountain Time (US & Canada)
Location: 147.24 ( ) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes:
AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

From: Amanda Burnell
Topic: 2799 Message: 2800

For those of you who don't know I am Kenn's daughter-in-law. Kenn is currently in stage 4 pancreatic cancer. Instead of a funeral Kenn has decided to do a living farewell to say goodbye to those he knows. He has been fighting the cancer for 9 months and we have been told that his life expectancy is now around 2 months with a possible 4 month increase with treatment.

Regrettably the survivability of those in stage four pancreatic cancer is less than two percent.

I am sure Kenn would love to see and talk with you at the party and we would likewise like to meet all of his friends!

Please feel free to let me know if you would like to attend.

Folks,

Recently Dennis, KF7RYX and I, spent some time with a prepper group in Mesa. The group is called "Mesa R U Prepared". Along with other prepper topics, these folks have an interest in radio communications.

We presented to them on the basics with an introduction to amateur radio. Feel free to share this narrated presentation with anyone you know that may have a similar interest in radio.

From: Joe Sammartino
Topic: 2815 Message: 2815

Folks,

Due to a technical issue, the QC Portable Repeater will not be active tonight.

Please use the QC Repeater for your regional net if necessary.

Regards,

Joe

From: Queen_Creek_Hams@yahoogroups.com
Topic: 2816 Message: 2816

Reminder from: Queen_Creek_Hams Yahoo Group
http://groups.yahoo.com/group/Queen_Creek_Hams/cal

Arizona Emergency Net - Maricopa
Monday March 17, 2014
9:00 pm - 10:00 pm
(GMT-07.00) Mountain Time (US & Canada)
Location: 147.24 ( ) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes:
AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.

2818. RUSS, Radio Under Sun Shade - Formerly Known as "Radio in the Park" - RITP

Yahoo group: Queen_Creek_Hams
Date: 2014-03-20 18:37:41 UTC
From: Joe Sammartino
Topic: 2818 Message: 2818

RUSS, Radio Under Sun Shade - Formerly Known as "Radio in the Park" - RITP

What is it?

Here's the recipe:

- take several ham radio stations and antenna systems
- add portable power - generators, batteries, solar power
- add some experienced hams
- include an open invitation to new hams, experienced hams, and anyone else
- publish a valley wide talk-in frequency of 146.460 Mhz (PL of 77 Hz, but not necessary); if operating HF, 7.168 Mhz LSB
- and replicate this recipe several times over in the Valley at the same time

What is the result?

- An excellent opportunity to learn about ham radio and ham radio operators.
- A great opportunity to learn about the type of equipment available - portable, mobile, base radios, antennas, coax, cables, solar arrays, solar controllers, and more.
- A great opportunity to learn about the importance of basic emergency radio principles.
- An opportunity to actually use the radio equipment and speak to local hams and distant hams hundreds or thousands of miles away -- even if you are not a ham!

It is a hands-on learning experience that is unequaled. We have had several of these events over the last 2 years and every one of them has been a tremendous success. The organizers of these events have one objective - to relate the fun, facts, and usefulness of ham radio.

Where and When? (Queen Creek and Mesa)

March 22nd, 2014, From 10 AM till 2 PM.

We have two local RUSS / RITP planned. Dennis, KF7RYX will host his event at the picnic pavilion at Remington Heights park near the intersection (just East) of South 198th Street and East Emperor Road. Here is a link to a map of the location:

http://tinyurl.com/KF7RYX-RITP <http://tinyurl.com/KF7RYX-RITP>

If you are looking for an event to visit closer to MESA, Doug, WB7TUJ, will host RUSS / RITP in Mesa at the same time.

Here is a link to a map of Doug's location:

http://tinyurl.com/WB7TUJ-RUSS

Questions?

Just respond to this message or send me a private email.

I will also post a link to the APRS.fi website Friday night since these events will beacon as objects for all hams to see so they can navigate directly to them.

Regards,

Joe

HI Joe,

Reviewing channels that I have programmed into my radio.

Came across

448.225 with PL of 135.5 labeled as Joe Backyard?

Don't think that is valid any longer?

Steve

It is valid but not operational until needed. It is the QC portable repeater.

2826. FS: Kenwood THD7A(G) handheld 2m/440 APRS HT

Yahoo group: Queen_Creek_Hams
Date: 2014-03-27 15:48:46 UTC
From: Jay
Topic: 2826 Message: 2826

Hey all,
I hope that a FS post is ok here, if it is not, Joe, please feel free to kill it.

I have a Kenwood THD7A(G) hand held up for sale.

I am the third owner, (the first two were here in AZ) and I have to say, you "7" land hams know how to treat equipment. (Either that, or 1 land is just harsh!) This thing looks great.

Some very slight scratches on the BOTTOM of the radio where it would sit on a desk.
Screen is clear.

Comes with radio, charger, battery, antenna, and a link to the manual online.
Battery is in good condition. No box.

100% guaranteed to work NO QUESTION. I have it sitting on my desk right next to me as I type this monitoring APRS and the Ocotil repeater.

Over 100 memories, two bands. plus APRS. Which means you can be listening to the QC or Ocotil repeater on one band and using APRS on the other. It is already programmed with the standard set of QC area freqs including the TA's for the repeaters AND ISS and some of the 2m/440 sats.

Easy to use to work the 2m/440 satellites with a turn of the main tuning dail with preset freqs.
(I have done this several times)

It can be used with other kenwood HF rigs for SKY COMMAND, so you can control your HF rig from the couch or other location (I am a Yaesu HF guy, so I have not looked into this).

Works with standard Kenwood HT speaker mics, etc.

Can be used to send, receive, display aprs messages, all from the HT. Can be connected to computer to use with laptop/desktop APRS software.

5W, 1W .5W selectable on each band. So you can be 5W on APRS or 146.52 and 1w on the local 440 repeater.

Why am I selling it? I have two of them. One that I had back in Maine that I am keeping, and this one that I picked up a few months ago. I am just not using it as much as I thought I would be.

With the addition of a GPS and a cable, you have a full GPS tracker in your hand. Without the GPS, you can preset up to THREE locations in the built

in TNC and select them. So, if you are with the folks up to the RIM event or at a RUSS event, you can find your lat / long, then type it in, save it, and then select that position. You are now ready to beacon and report on the APRS network. Send and receive messages, check on weather stations, etc. TNC can do straight packet (old school) as well as connect to VHF/UHF dx cluster nodes and display the DX spots (I think there are two of these in the Phoenix area).

I have used these on my bicycle, hiking, walking, and in the car. (This one has just been in the shack and my office)

Great HT with a ton of features.

Priced to move to a fellow QC member. $165.

If you want a simple (older) garmin GPS and the cable to make this a tracker $200.

If I don't hear anything from you all, I will throw it up on ebay next week. I figured I would let a local get a crack at it first.

East Valley Repeater Group
Monday March 31, 2014
8:00 pm - 9:00 pm
(GMT-07.00) Mountain Time (US & Canada)
Location: 449.825 (-) PL 100

Notes:
We are a group of Amatuer Operators that have formed this group to provide emergency communications for two East valley hospitals. The two hospitals are the Chandler Regional Hospital located at 475 S. Dobson Rd. and the Mercy Gilbert Hospital located at 3555 S. Val Vista Dr.
Our home repeater is located in Gilbert AZ on the Mercy Gilbert hospital with a coordinated frequency of 449.825 with a 100.0 PL and a minus offset. A repeater on the Chandler Regional hospital is in the works and when ready will become our back-up frequency.
Everyone is welcome to join our net on Monday night at 8:00 P.M. on the 449.825 repeater.

Arizona Emergency Net - Maricopa
Monday March 31, 2014
9:00 pm - 10:00 pm
(GMT-07.00) Mountain Time (US & Canada)
Location: 147.24 ( ) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

Notes:
AEN-MAR: Participate in the net - MONDAY, 9:00 PM

The Arizona Emergency Net - Maricopa meets on 2 meters FM in the Maricopa County area every Monday night at 9:00PM -- after dinner and family time. Make plans to join us if you're in range.

FREQUENCY: 147.24 (+) on Shaw Butte in Phoenix linked to 146.92 (-) on Mount Ord in northeast Maricopa County. Both use 162.2 Hz CTCSS tone.

PURPOSE: The Arizona Emergency Net - Maricopa is a training activity for public service -- be it scheduled events or unexpected emergencies. The emphasis is on preparation and readiness. It also activates during threats or emergencies affecting Maricopa County. So, when trouble strikes in Maricopa County, tune here.

AFFILIATION: The net is an activity, not a separate organization. Net participants may choose to get "real-world" experience through public service events organized by MCECG* or respond to drills and emergency activations with ARES** and the Maricopa County EOC***. Membership in MCECG and ARES is definitely is not required for net participation. Net members represent other respected groups as well, such as SATERN, Red Cross, Skywarn, CERT, RACES****,and others. The different missions of these groups are equally served by the net training activities.

FORMAT: The net conducts on-air exercises, practice drills, and equipment tests while honing operator skills. Expect to do and learn real stuff. This is not a quickie "check-in" net, social roundtable, or traffic net. Several good nets serve those purposes already.

PARTICIPANTS: There is no membership roster, no bylaws, no dues. All Amateur Radio Operators are welcome to participate regardless of skills or experience levels. The only criteria are a radio capable of the net frequency, a license to use it, and an interest in using both for the benefit of others. Hams in other counties within range of the net repeaters are invited, too. So are your friends without e-mail; tell them to tune in.
